- 1) Call there host
- 2) Email there host if calling doesn't work.
- 3) Just forget about it.
- 4) Kill yourself.

And if you don't want your number to be shown use google voice

- A) contact their host
- B) leave if be
- C) and boom goes the dynamite

No?????? - October 15, 2011, 5:34 pm

- A) Contact their host.
- B) Contact the software's copyright owners and let them do it.
- C) Infiltrate their site and upload huge amounts of bandwidth using scripts and illegal content such as CP.
- D) Send spoofed emails to the site owner.
- E) If they have limited bandwidth DDoS them until their account is suspended.
