They're out of the +mm Mega Pack, I don't believe they're public here.

Flying Dutch just linked me to this tutorial and I love it! Thank you for providing us with such a nice, well written and easy-to-follow tutorial!

This will surely help me and many others improve a lot!

Oh and I'd like to thank Flashy for releasing the C4D, Fractal and stock pack! Downloading it right now.

Thanks to both of you for the great work.

Monstrosity - December 9, 2011, 2:32 pm

Well good placement of C4Ds to be honest, very detailed tutorial and helpful. Nice adding and placing of the lightnings. Good use of the pen tool. Although the render seems a little odd.

Text is hard to see man, so when I use this tutorial I shall change the effects and stuff.

Also, thanks for the +MM pack.
