What is Port Forwarding ?,How To Port Forward ? Now With Utorrent! :)

What Is Port-forwarding?

Port forwarding is necessary for using different tools, Such as RATs and uTorrent and so on. Please follow this guide on How To Port Forward and you'll have your port forwarded Smiling!

Today i'll teach you how to port forward through the router & modem. (Not with PFConfig Smiling)

Lets Start!

Start off by going to: Start -> Run -> CMD -> And Type IPCONFIG

[IMG]<http://i1184.photobucket.com/albums/z334/1337C0pYCaTpRoDiGy/f512c0.png>[/IMG]

Now Copy That "Standard Gateway // Default Gateway" IP And Type It Into Your Webbrowser & Log in.

My username is Root - nothing. The router // modem accounts usually are these:

Admin - Admin

Admin - Password

Admin - User

Admin - Root

Admin - Custom Password, Check underneath your router for it! Awink

Root - Admin

Root -

Root - Password

Root - Root

Root - Password

Root - Custom Password. Check underneath Awink

User - Root

User -

User - Admin

User - Password

User - User

User - Custom Pass.

And so on.

Once you're logged in, Go to the "port forwarding" or in this case, "Virtual Server"

[IMG]http://i1184.photobucket.com/albums/z334/1337C0pYCaTpRoDiGy/4beaed.png[/IMG]
[IMG]http://i1184.photobucket.com/albums/z334/1337C0pYCaTpRoDiGy/f85ef9.png[/IMG]
Virtual Server: Enable / Disable.
Local IP: Found In IPConfig, As IP Address.
Start Port: The Port You Want To Forward, Start Port.
End Port: The Port You Want To Forward, End Port.
Protocol: TCP & UDP or BOTH
Remark: The Name Of The Wished Forwarded Program.

And When You've Saved The Settings, Go To Canyouseeme.org And Type Your Port In There,
And If It Says

[IMG]http://i1184.photobucket.com/albums/z334/1337C0pYCaTpRoDiGy/f1d55d.png[/IMG]
Then You've Succeeded Your Port Forwarding.

If It Says

[IMG]http://i1184.photobucket.com/albums/z334/1337C0pYCaTpRoDiGy/65ef76.png[/IMG]
[CENTER]

You've Failed. Then I Advice You To Take A Look At Portforward.com And Look For Your Router
Or Modem, Once You Find It They Have A Port Forward Tutorial There.

Or Try To Have The Application You Are Forwarding For Open, Like Cybergate & Try
Again![/CENTER]

Utorrent

IF manually portforwarding doesn't work, then you'll need to use Utorrent. Awink. You still need the
port "100" forwarded in your router for this to work. First of all you want to download Utorrent

Easy instructions;

1. To set a single port, navigate to Options > Preferences > Connections
2. Click "random port" once, and note the port number provided. This will be the port number you
will be forwarding in your router. (You may also assign a port number of your choice)
3. Uncheck "Randomize port each time µTorrent starts." The port number will no longer change
each time µTorrent is started.

Bartholomew - January 5, 2012, 8:35 pm

vn thank you good sir. I hope my server will work >.> But I don't know how you used allied telesyn

gaginoo323 - January 6, 2012, 12:33 pm

does it matter what number you use for start port and end port?

3ch0_3l1t3_c3rb3ruS - November 2, 2012, 2:28 pm

Hello friend please help me

First of all i don't have any modem cable is directly connected in the RJ-45 jack and i have dynamic IP as it says that DHCP Enabled : No
and there is nothing like standard gateway but there is default gateway but its address is 0.0.0.0
and i when i type 0.0.0.0 or 198.168.1.1
its says can't find the server what should i do now

jesuisunhacker - November 2, 2012, 2:31 pm

Good tuto i like it this tuto .. because i like tuto good

??? ?-? ? ??? ??? - March 12, 2013, 3:50 am

I'm gonna try this tutorial out as soon as I'm home, I hope it will fix my probs :)

1King - March 12, 2013, 6:49 am

hi i am using mobile sim internet so there is no modem or modem page so can u guide me how can i do portforward thanks

Troxin - March 12, 2013, 10:01 am

I just have www.howtoportforward.com bookmarked so I can just check it out whenever I need.

Nice tutorial though man.

ultrasonic38 - March 12, 2013, 12:59 pm

thank you! ??????????

Levay - March 12, 2013, 1:30 pm

Very nice Tutorial!, looking forward to trying this method!

[img]<http://sharesend.com/4dovgmc7>[img]

any idea how to port forward this
for dark comet RAT

vendettalogzz - May 15, 2013, 11:50 pm

thanks for the detailed insight, I have no router....how else can i get to activate port forwarding

ranbdr - August 20, 2013, 11:23 pm

internal port mean?? got stuck at that place

leban45 - November 14, 2013, 7:23 am

yeah need abit of help,

i've created a stub it executes and connects when tested on my own system.

when ive tried spreading it, im not getting any connections.

the port is showing on canyouseeme.org

ive used Jrat, No-ip and DUC

i've turned off my firewall and antivirus.

and thanks

ashtonbenn2508 - March 23, 2014, 8:15 pm

excuse me sir... actually I have a doubt here. First of all I'm using my 3G dongel tata-docomo connection to connect to the internet. And when I type ipconfig /all in the cmd prompt, it shows all kinds of things and it doesn't show "DEFAULT GATEWAY" which is 100.x.x.x. so this is the first doubt and the second doubt is that I've tried typing this default gateway in all my browsers namely Chrome, i.e., and firefox but in all the three, it shows PAGE NOT FOUND.

I've set my firefox settings as well so that computer can interact freely with other connections but nothing works.

gork - *January 17, 2017, 3:09 pm*

How do you port forward on Mullvad VPN?
