How to find Original Gamertags quick and easy.

1. [Go to Here](#)
2. What you do now is set the Word Type and Complexity to whatever you want to.
I recommend
Word Type: Adjective
Complexity: Average or Uncommon
3. Once you have your Word you want to make sure if its taken or not
4. Go to www.xbox.com and sign in
5. Go to search a friend and check it

If it shows the person profile then its taken if it gives you error then you can take it

Good Luck I hope this tutorial helps you :)

It most likely means it is either banned or glitched because of the space.
