Thread: [Official Viking EASY Installer || 1 Click Install for any VPS \[100% FREE!\]](#)

Fatality` - October 17, 2011, 10:29 pm

Hello Everyone!

Today I would like to publically release Viking.

Most versions on hackforums today are quite outdated and are missing many key features.

Viking Installer is a free tool that will automatically setup a VPS or dedicated server for Denial of Service attacks.

Connects to MULTIPLE servers/vpses simultaneously! TRUE DDoS! (VIP ONLY)

No need for putty anymore, this tool will automatically open a SSH terminal and connect to viking. (Although putty would of course still work :D)

Automatically installs all dependencies for the tcp/udp flooders as well as website socket overloaders. (Most copys of viking on HF ONLY use the udp flooder)

Includes a calculator to determine your bandwidth consumption!

MAKING THIS FREE FOR EVERYONE

For more info please contact me!

Download below, let us know if this tool helps you!

Vouch copies are for L33T and UB3R with decent rank youngster. ^^

Xatso - October 17, 2011, 10:52 pm

Could I also get a vouch copy? Thanks in advance.

Wise - October 17, 2011, 11:02 pm

I would like a vouch copy. I will write a full and detailed review of Viking. I have a ton of VPS to test this on.

Astro Boy - October 17, 2011, 11:08 pm

May I please also get a vouch copy? Thanks.

Sasori - October 17, 2011, 11:13 pm

Already have Viking VIP, don't like it to much, I'd rather kaiten or something (my custom script).
Good luck to all members !

ISOForest - October 18, 2011, 5:25 am

Whats the actual price you want for it?

Exal - October 18, 2011, 6:34 am

lol, all asking for a vouch copy, anyways good luck on sales ...

To charge for viking itself is really out of the question. I wrote the original copy 2 years ago and since then it has had a lot of public circulation.

I ask for only \$5 for a really useful tool!

Although the free copy is awesome in its own respect, ive added some cool additional tools for a small fee. The new multi-connector lets VIP users control lists of vps'es with only a click of a button! Turn viking into a true DDoS. I also customize/add new features upon request.

Linux. - October 18, 2011, 12:53 pm

I have never used this tool so there is no point in me paying \$5 for it point blank period sorry man ...

Fatality` - April 20, 2012, 1:09 pm

Thread Updated.

Now free for everyone!

Post in the thread if you are interested in this tool!!

Thanks!

I would love this. Havent had an updated version in a long time. If your still offering plz send.

Thanks n advance

BOWT3CH - June 5, 2012, 1:28 pm

im getting an error when i try to install, (class not registered) can someone tell me what im doing wrong?

Fatality` - July 12, 2012, 9:24 am

Ive been rather lazy lately so i have uploaded the files to my website.
You may download them from

www.pdxlogistics.com

As for class not registered, you need to install sshactivex.msi if you are getting such issues.
Feel free to reply or pm me about issues, questions, update requests. I may rebuild the thread and release this tool once more!

This tool was initially \$5 or something a month, but its now free....
If an admin views this feel free to move the thread if possible

Confederate™ - July 12, 2012, 11:12 am

the sad thing is it doesnt look the way u showec

Not quite sure what ya mean, care to elaborate please?

The tool should look quite exact to the picture. I have made alterations
and additions since the creation of this thread, however, the features and abilities are still present.

iTzAHackerr - August 27, 2012, 5:18 pm

Mine wont install its suck at installing for a long time now!

Flaxpicker - August 28, 2012, 3:27 pm

Do you know any hosts that allow ddosing... this looks like an amazing tool

Fatality` - August 28, 2012, 3:28 pm

updated the bug, all clients should work again

Dj?ngo - August 28, 2012, 5:18 pm

Big vouch for my brutha Fatality :)

Fatality` - September 26, 2012, 2:50 pm

lol thanks again for the on this OLD ass tool.

Its still free and should be working fine. It was updated a couple months ago.

I only provide BASIC support for this, I dont like to spend hours on end over TV helping people

setup "putty booters"

-_- lol

Many people may find this is a good tool simply because it installs all the python and perl dependencies needed as well as other extras to make it all work as fast as possible. It also has a large variety of attack scripts included in one single release. If you like this tool make sure to drop me some green ;)

[to clarify - at the time of this post I meant GREEN MONEY.] - 2/3/2014

Fatality` - *January 15, 2015, 3:38 pm*

Grave digging time. I don't know why but ive had at least 6 seperate people ask for the installer in this OP.

Ive updated the installer so its not broken any longer.

Nalum - *February 3, 2015, 7:06 pm*

thanks man! i appreciate it and links still works btw ;)

Fatality` - *February 10, 2015, 6:53 pm*

Thanks for kind appreciation. Enjoy your download!

Nalum - *December 30, 2015, 3:32 pm*

you need to fix the link bruv, #gravedigging.
