Pros & Cons

Getting started

Becoming a Hacker

What You Should Learn

Credits

Notes

Introduction:

Today I'm here to explain what basic hacking is and what you will need to know.

I have seen a lot of users asking "How to hack" & "Where to start in hacking", so I decided to create a thread.

If you're a good learner then you should be able to catch on quick.

I'm going to try and make this have great details attached so that everyone will understand.

Pros & Cons:ProsSome software companies will hire hackers to check for flaws in there programs

Free things

Learning

Adrenaline Rush

ConsPossible jail time

Fines

BlackHat Hacking is Illegal

Take's some time to learn

Getting Started:

First things first.

There are 3 type of hackers you can choose from.

Black Hat, Gray Hat, and White Hat.

Below I will list the definition for each of them.

Black Hat:

Black hatters, also known as crackers, are the ones who destroy private information, deface websites, and do most illegal activity.

Becoming a Black hat can be difficult if you're not willing to devote your time in learning.

Usually these people can not get a decent job because of the illegal activity.

Not of all them have bad reputation, but most of them do.

If you are caught by Law Enforcement then be expecting jail time.

Grey Hat:

Grey hatters are in between Black hat and White hat.

Most grey hat people commit pranks that they think is harmless to other users, but can be illegal also.

It's unlikely for some users to take it as a joke. Some might take it seriously if you go to far.

You can also suspect jail time if you're thinking about becoming a Grey hat.

White Hat:

White hatters basically use there knowledge to fight against malware. More than half of them are friendly & can be trusted.

I'm not saying trust anyone because there are some White hats, but it's more than unlikely for them to do harm to your computer.

White hatter can end up in a good paying job.

Such as computer programming & security consultant.

They most likely will not end up in jail if they do not do illegal activity.

Becoming a Hacker:

You must learn information about any operating system and/or programming language, this way you have some skill in the required fields.

Most people prefer [Python](#) for a coding language because you can create advanced programs.

There is no such thing as learning a "Easy language", it takes time & patients to master your goals.

You will be able to learn computer security, also known as exploits.

Learn a Programming Language:

[Python](#) is a pretty decent language to start with because it has a clean design, very organized, and

easy for beginners.

It's not just a software to joke around with, it is very useful & powerful when creating an advanced project.

Java is also good but some people do not value it as a good language to start off with.

If you are well into programming then you might want to learn C.

It's the closest language related to C++ and is to the core of Unix.

It helps a lot when creating a software but takes time debugging and is often not used because of that reason.

Perl is also good learning for practice reasons and is worth learning.

It is commonly used for web pages and system administration.

Other people use Perl to avoid programming in C.

Most computer jobs do not require C much often.

What's an Exploit:

An exploit is a piece of software and/or information that takes advantage of a bug or vulnerability in order to cause unintended behavior to occur on computer software.

This includes gaining control of a computer system or allowing privilege escalation or a denial-of-service attack.

Finding a bug can cause you to have further access into websites and software.

There are a bunch of methods on finding exploits.

The common found is a vulnerability in the creators software.

A remote exploit can work over a network and exploits the security vulnerabilities without access to the system.

A local exploit requires information before accessing the system.

It also increases the privileges of the person running the exploit past those by the system administrator.

Exploits clients also exist, usually using modified servers that send exploits when accessed with the clients application.

Exploits against applications requires some interaction with the user and is combined with a bit of social engineering.

This is part of the hackers way of gaining access into computers & websites for stealing information.

Normally a single exploit can take advantage of some software.

Often, when the exploit is released to the public, the creators will try and patch the bug.

Later they will release an update for customers to download.

This happens when the software is on the newer version.

The reason on why some black hatters don't publish their exploits is because of the patching method that is done by the creators, so they keep it to themselves or other hackers.

Earn Respect As a Hacker:

Program software & release it to the community with the source attached.

Design software that can be useful to everyone, this way users will download it & leave positive feedback.

Soon it will spread and you will start to become better known.

Test open-source software that users create.

If you can help them in any sort of way to make there software better & easy to use, I'm sure the creator will be thankful and mention you in the credits.

Try and find a program that is in the making.

Contact the creator and ask to beta-test it.

There's a good chance of you beta-testing it before it's released to the public.

You will also learn a lot this way and create good karma with others, so this way if you ever need help, they will offer you help as well.

Last but not least, give credit.

If you have had help in your current software than be sure to give credits.

Who knows, the person you're working with may give you a good ego.

Have fun!

What You Should Learn: Learn advanced information about an operating system

Learn at least one programming language

Learn how exploits work

Do some research

Claire Farron - October 17, 2011, 11:31 pm

Thank you so much for making this. Should be stickied in this section; so many people making the same threads. This is perfect for those people. :)

Nostre - October 17, 2011, 11:31 pm

(Oct 17, 2011 11:31 PM)Herpinderp Wrote: [\[CITE\]](#) Thank you so much for making this. Should be stickied in this section; so many people making the same threads.

Your welcome.

I've seen a lot of threads that have been looking for answers so this should be useful. ?

eight - October 17, 2011, 11:33 pm

Nice tutorial. Deserves a post to keep it alive.

(Oct 17, 2011 11:33 PM)eightworks Wrote: [\[CITE\]](#) Nice tutorial. Deserves a post to keep it alive.

I'm sure it would get more reply's when more users log on.

Thanks :).

Jittery - October 17, 2011, 11:35 pm

Great well constructed thread Genuine, I've been seeing countless threads asking where to begin. ?

Nostre - October 17, 2011, 11:36 pm

So have I. Thanks for the positive feedback :).

zero.xode - October 17, 2011, 11:39 pm

Great thread. Lots of useful insight. Thanks!

Quick question though. Which would be more valuable to learn first? C# or Python?

EatSleepCode - October 17, 2011, 11:42 pm

(Oct 17, 2011 11:39 PM)zero.xode Wrote: [\[CITE\]](#) Great thread. Lots of useful insight. Thanks!

Quick question though. Which would be more valuable to learn first? C# or Python?

I wouldn't recommend starting with C#, nor any C variant for that matter. (C++, C, Obj-C, C#)

Those would give you a very difficult introduction to OOP (Object Oriented Programming). I would suggest learning Java, then moving on to C or Obj-C.

Python is a decent language for beginners, but it may bore you. I find Java the best for beginners because they can run their programs on any OS, and it helps you get your foot in the door for other OOP languages.

Nostre - October 17, 2011, 11:45 pm

(Oct 17, 2011 11:39 PM)zero.xode Wrote: [\[CITE\]](#) Great thread. Lots of useful insight. Thanks!

Quick question though. Which would be more valuable to learn first? C# or Python?

I would start with Python first. Then move on after you have mastered that language. Although it can take a couple months, maybe, it's well worth it because you'll understand coding more.

killer329 - October 18, 2011, 12:29 am

Thank you so much for making this. Should be stickied in this section; so many people making the same threads. This is perfect for those people. :)

Nostre - October 18, 2011, 1:21 am

That's guys for all the feedback. Really appreciate it.

iVision - October 18, 2011, 1:48 am

Nice man! Very nice guide :D I wish you've posted this before I started hehe ;P

Nostre - October 18, 2011, 3:22 am

I wish I would have also. Thanks ?.

Bay - October 18, 2011, 6:28 pm

Another great thread from Genuine!

I love reading through these!

Nostre - October 18, 2011, 6:29 pm

Glad you liked it. I'm thinking about writing some more.

Despairfulness - October 18, 2011, 6:58 pm

Thank you so much for making this. Should be stickied in this section ?

Nostre - October 18, 2011, 6:59 pm

Thanks for the suggestion. Glad I can help you.

asdfhi - October 18, 2011, 7:22 pm

thank you so much for this post very helpful information.

Nostre - October 18, 2011, 7:23 pm

You're welcome. Glad everyone likes it.

Ricklax39 - October 18, 2011, 7:59 pm

Hey man awesome guide! I was wondering though if C++ is an ok place to start for programming? Its the only language class my high school offered so I just took it haha, Its pretty basic stuff so far (just made a 4 function calc). Is this an ok starting point? and where do I go from there?

PrO1337HaCKeR - October 18, 2011, 8:01 pm

Very good and very basic. ANd I agree that python is awesome.

this will help alotta noobs.

Nostre - October 18, 2011, 8:12 pm

(Oct 18, 2011 07:59 PM)Ricklax39 Wrote: [\[CITE\]](#) Hey man awesome guide! I was wondering though if C++ is an ok place to start for programming? You can try and use that first but I recommend you using Python first. I would say to try and learn both but it may be hard on you.

kilikextreme - October 18, 2011, 8:15 pm

Thanks! I am just starting out and was going to post a question asking where should I start. Luckily I found your thread and I am on the right track. Thanks again!

Your welcome. I hope you gather as much information. ?

rinluvr - October 18, 2011, 8:58 pm

Thanks a lot for this thread cuz I had no idead where to look. If you have no destination, you get there every time.

Nostre - October 18, 2011, 9:50 pm

Your welcome.

Glad I could help everyone.

Ghost.13 - October 18, 2011, 10:16 pm

Just bookmarked this page, coz' I'm really fond on answering newbies' question, so I'll just give them a link of this page. :)) Thanks mate, good job! :)

Nostre - October 18, 2011, 11:01 pm

Thanks for redirecting users to this thread. Really appreciate it.

thecompany - October 18, 2011, 11:11 pm

You made some mistake in your post. Companies do not hire hackers as they did 15 - 20 years ago. Those people who hack for them are computer programmers. They get these people by searching colleges and universities. They are basically computer security experts not some random person who they know nothing about.

You also didn't state the grey hat work for big companies as the white hats. An example of grey hat hackers are MIT and CalTech students in there hack day. Most of the time their pranks are harmless.

As far as who is the best, it's a no contest. They all have the same knowledge. If a white hat create

something the black hats will go after it to break it. If the black hat created something the white hats will try to go after it to fix it. I read a article that had someone from Norton, Zone Alarm, and McAfee say that black hat the bad guys are at least a couple of steps ahead. Pretty scary to know some of the world's top security experts claim this.

Aquatic - October 18, 2011, 11:27 pm

Very High Quality thread Genuine

This taught me a lot. If anything I would become a white hat.

I might start learning this, and I understand that it takes commitment.

Nostre - October 18, 2011, 11:32 pm

(Oct 18, 2011 11:27 PM)PrimeOcean Wrote: [\[CITE\]](#) Very High Quality thread Genuine

Oops! Sorry for the double post. Happened by mistake.

Well right there is a good language to learn if you cannot learn Python.

C++ is a great programming language but just make sure you listen to your teacher and learn online at the same time.

It will be confusing just learning by your teacher because mostly all of them teach you the total opposite from what you want to learn.

manu.mbm - October 25, 2011, 10:42 pm

yeah very nice thread bro...i'm just starting with Python...hope it works for me....

but how these languages help us in hacking???

Nostre - October 25, 2011, 10:53 pm

They can give you a better chance of creating useful hacking tools and other programs as well.

pactode - October 25, 2011, 11:21 pm

Great information for a newcomer! Thanks a lot. :-)

Firstname - October 25, 2011, 11:38 pm

I know quite a bit of C and C++. Just that when it comes to pointers it makes my head spin.

Nostre - October 25, 2011, 11:40 pm

Your welcome.

@Firstname, seems like you heading in the right direction.

MafiaZ - October 26, 2011, 1:35 am

(Oct 25, 2011 10:35 PM)Genuine Wrote: [\[CITE\]](#) Well right there is a good language to learn if you cannot learn Python.

That is a fresh start when learning something new. I'm free to answer question at any time. You can either shoot me a PM or post here.

(Nov 19, 2011 02:05 AM)Johnny Gat Wrote: [\[CITE\]](#) Awesome thread dude.Bookmarked.

And VB.NET is an easy programming language.

Glad it could help you & you bookmarked it. VB.NET, for some people, is an easy language.

bckc - November 19, 2011, 3:45 am

(Oct 17, 2011 11:42 PM)EatSleepCode Wrote: [\[CITE\]](#) I wouldn't recommend starting with C#, nor any C variant for that matter. (C++, C, Obj-C, C#)

Those would give you a very difficult introduction to OOP (Object Oriented Programming). I would suggest learning Java, then moving on to C or Obj-C.

Python is a decent language for beginners, but it may bore you. I find Java the best for beginners because they can run their programs on any OS, and it helps you get your foot in the door for other OOP languages.

C and C++ users can be run on any OS aswell.

Also C# is probably easier to learn than Java. C# is like Vb.net with a twist. Similar syntax.

Anyways, nice guide genuine. You might want to add for the white hat section that if you try to pen test for a company without there permission you'll end up in jail. Even if you're doing it for a good cause it still breaches the data protection act 1998.

~Bckc

ClayFace - November 19, 2011, 6:47 am

```
raw_input("press <enter> to peace out")
```

I wasn't going to add the pros and cons but it just looks more professional. I'm glad you enjoyed it. I like the code above also :).

(Nov 30, 2011 02:02 AM)robinojetli04532 Wrote: [\[CITE\]](#) Thanks..For the basic..I would start with java. Is that good choice?

Well Java isn't really considered a first language to start with. It's somewhat advanced. I would recommend you learning Python first, it's a great language for starters and will help you a lot.

It's your choice but before choosing what language you're choosing just make sure you have patients.

Th3-Gh0st - November 30, 2011, 8:18 am

This was very usefull Thnx for making this tut :)

WtFTuga - November 30, 2011, 8:45 am

I wanna start but I really dont know what language I chose : python or Java ??

But awesome topic

Nostre - November 30, 2011, 11:33 am

(Nov 30, 2011 09:45 AM)WtFTuga Wrote: [\[CITE\]](#) I wanna start but I really dont know what language I chose : python or Java ??

But awesome topic

I suggestion starting with Python. Then move up after you master that language.

Chris.. - November 30, 2011, 12:45 pm

I have seen so many of these threads but this is pretty hq good work.

Heroicis - November 30, 2011, 1:04 pm

Nice contribution :).

To bad there are now loads of these,
~regards. ?

?Victory - November 30, 2011, 1:48 pm

Thats a Nice tutorial for beginners ... keep up the good work mate ^^

SiNNak - November 30, 2011, 1:51 pm

wow, thanks for that i really like the way you explain stuff.

but i have one question what shut a do first?

Learn advanced information about an operating system or Learn one programming language

mairenjao - November 30, 2011, 3:17 pm

This thread is helpful to me... thanks for the thread, now what confuse me is whether ill go for java programming or python? ne suggestion iam a beginner!

Hecarim™ - November 30, 2011, 3:24 pm

Thanks a bunch for this info! I will definitely start learning python. Is it easier or harder than java?

LucifersShadowX - November 30, 2011, 5:01 pm

Ok so I'm planning on learning the C languages after Java or Python. So my question is which one is more beneficial to learn, Java, or Python?

Eruditus - November 30, 2011, 5:06 pm

(Nov 30, 2011 06:01 PM)LucifersShadowX Wrote: [\[CITE\]](#) Ok so I'm planning on learning the C languages after Java or Python. So my question is which one is more beneficial to learn, Java, or Python?

This should answer the answers you require:

<http://www.python.org/doc/essays/comparisons.html>

I started with Java first. Generally the syntax of Python is easy and quick to learn, whereas Java is more complicated as it is more complex. I'd suggest you start with Python, or if you really want to learn C, start now.

Beneficial to learn? That's up for you to decide. What do you want out of the language?

LucifersShadowX - November 30, 2011, 5:18 pm

(Nov 30, 2011 06:06 PM)Kurumu Wrote: [\[CITE\]](#) This should answer the answers you require:

Thank You! Helped a lot! I think im going to go into learning Java because I have more use with that.

ViN - November 30, 2011, 5:21 pm

Why hasn't this thread been stickied yet?? :D

kamz89 - November 30, 2011, 8:19 pm

Excellent tutorial..This deserves a sticky and well explained mate

c052463 - December 1, 2011, 4:49 am

WoW Nyc Article I were never surrounded by so many people having same interest of mine. I think this is the perfect place for me to ask:

I wish to become perfect in reverse engineering (I know that's a long long way) Sad and shy/embarrassed to say that I know no programming language (Can call me zero :C) But now I am firm and definite to start any tough way Just tell me where should I start from and where should I end [no classes no teachers need books links sites] ?

UNKNOWN WHO - December 1, 2011, 6:31 am

i would be start of with ddos skills or learn about botnets there is http or irc

Nostre - December 1, 2011, 6:58 pm

I suggest you learn more about DDoS then. It can be pretty simple to learn if you're dedicated.

Viking - December 1, 2011, 8:09 pm

This is a very nice thread OP. Thank's for all the help it has provided me with.

c052463 - December 1, 2011, 9:57 pm

So Any Tutorials, e-books, Link, Sites just anything I can get to get kick started?

iDuL - December 2, 2011, 12:53 am

Very nice thread Genuine.

You will eventually rise to the top man, keep going.

tracer_J - December 2, 2011, 3:33 am

Thank U for making this thread and it is very helpful for me. (my first post in this forum, LOL)

george_torn - December 2, 2011, 3:52 pm

well done mate.. !!

This was very helpful !

t0mb.exe - December 3, 2011, 6:00 am

Thanks alot for this :) , useful insights :D

Broda - December 3, 2011, 7:14 am

Wow, this was very useful. I have always thought what it needs to become "hacker". Thank you!

DizzyGhost - December 3, 2011, 7:55 am

Thanks for the nice tutorial where to start.

zippyzy - December 4, 2011, 2:41 am

thx its god help to learn beginner nice thread HQ

DodongGetch - December 4, 2011, 4:11 am

Thanks for the tutorial man because i'm new here?

chrisinho - December 4, 2011, 4:58 am

Really nice tutorial, helped me al lot, thank you!!

slowhacker - December 5, 2011, 8:28 am

i must say, with these post of yours i am motivated ?

Friedfischer - December 5, 2011, 8:48 am

Nice, I will definitely try it soon

- Friedfischer -

silentshadow91 - December 5, 2011, 8:50 am

Nice guidelines for even the more advanced, thnx!

373rN1745 - December 5, 2011, 7:05 pm

pretty awesome little 'Intro to Hacking' post. I'm a n00b but the more I read each other these tuts, my knowledge grows more and more every day so thanks for this. :)

toxicandy - December 5, 2011, 7:59 pm

Thanks so much, I really wanted to get into hacking but was lost on the whole subject.

abel1337 - December 5, 2011, 8:38 pm

Really good tutorial. Thanks for recommending Python to me. I am majoring in computer science but havent started my computer classes yet so I think itll be good to have a little bit of a head start. Thanks again :)

Ulimited - December 6, 2011, 9:11 am

Thank you so much for making this !

burkspatrick - December 7, 2011, 6:32 pm

Thanks for the tutorial. Trying to learn all I can.

OPPIKI - December 12, 2011, 4:52 pm

Great starting point for us who are just beginning, thank you.

Skier - December 12, 2011, 5:03 pm

Thanks for the guide.. Really does clear a lot of basic info up

cas040 - December 13, 2011, 12:36 pm

thanks for this guide, its working me out.

Gorgonite - December 13, 2011, 9:05 pm

Great thread for us new people to learn from

Nino1 - December 13, 2011, 9:22 pm

Thanks for the tutorial, great work mate.

Zanelot - December 13, 2011, 10:00 pm

Yeah. I learned how to "Hack" Very recently and I'm doing very well. :3

blackassassin24 - December 13, 2011, 10:45 pm

Where can I start to learn python? Please respond thanks.

William - Future Hacker - December 14, 2011, 3:11 pm

Download some E-Books. Google Python E-Books, Click on the top 15 legal Python E-Books and

choose one to download, I started with "How to think like a Computer scientist Learning with Python"

Another good place you can learn Python is from TheNewBoston. Just search him up on YouTube and go to his Python tutorials.

Nostre - December 20, 2011, 3:18 am

(Dec 14, 2011 04:11 PM)William - Future Hacker Wrote: [\[CITE\]](#) Download some E-Books. Google Python E-Books, Click on the top 15 legal Python E-Books and choose one to download, I started with "How to think like a Computer scientist Learning with Python"

eBook online aren't as interesting I noticed. I suggest taking a look at the python section we have to offer.

RixMaster - December 23, 2011, 8:45 pm

Man.. To be honest, I am trying to hack some of my friend fb account.. They have hacked me and i want a revenge thats why i am looking in here if u can help me or teach me how to hack fb account. I would appreciate it. Dude please answer me as soon as u read this

pickledfish97 - December 26, 2011, 1:07 pm

I agree great thread! But also is python the most useful thing you can learn?

ikybadboy - January 3, 2012, 5:30 am

thanks for this tutorial been learning a lot of new stuff

Wall - January 4, 2012, 3:36 am

What type of jobs can you be offered by becoming a White Hat?

kzurk - January 4, 2012, 6:49 pm

nice tut, keep it up, by the way i am new to the forums and this is very helpful

Notsospectre - January 4, 2012, 6:59 pm

Ty for the knowledge man, Really helps.

ufuk - January 6, 2012, 4:53 am

Thx this helps me alot of start hacking thanx alot.

?

BaMBuS - January 6, 2012, 5:20 am

Great and usefull tutorial :) Good Job dude :)

cyb0rg - January 11, 2012, 11:14 pm

LOVE THIS man, thank you so much for helping out noobasses like me

-Exposed- - January 12, 2012, 12:33 am

Nice tut bro...

it helps me a lot !

kwpenney18 - January 17, 2012, 3:06 pm

I literally just joined today and I am a complete noob with this sort of thing. I just want to get this guy back who stole a lot of money out of bank account via PlayStation Network. Any help on how to get people's account details would be really useful Thanks :)

PurplePro - January 21, 2012, 2:11 pm

Good job, I am a beginner in hacking and I understand this.

kakker - January 21, 2012, 2:42 pm

Good one.

Will defenitly help the new guys :)

whiteythec clown88 - January 21, 2012, 2:53 pm

Thanks for this thread.

I'm currently learning Java and this gave me some more insight to the internet world.

Also you should add :

"Knowledge is power in this world. The more you know - read , holds a value."

elvisabc - January 21, 2012, 3:15 pm

I really love these topics, people really spend their time in making these.. Really, thanks.!

Mtk19 - January 21, 2012, 3:29 pm

This is a very nice intro Tut Genuine Thumbs up!

~Mtk

Dem0nkn1ght - January 21, 2012, 8:12 pm

Thanks for the advice. I shall start on Python.

dansklancapu - January 23, 2012, 7:20 am

Good explanation, plain and simple.

I got the message.

Nostre - January 28, 2012, 9:11 am

Also you should add :

"Knowledge is power in this world. The more you know - read , holds a value."

Honestly, I wouldn't add that to the thread. It's just a sentence and isn't that important.

OPJuice - January 28, 2012, 10:05 am

Thanks for the awesome post. Very useful.

greibol - January 29, 2012, 6:53 pm

Hey thanks for the thread it will help me :)

pablo escobar - January 29, 2012, 8:30 pm

can someone hack into my cpu thru the modem?

Thrive™ - January 29, 2012, 10:30 pm

Thank you for posting this, I read all of it.

Mister_ S - January 30, 2012, 1:53 am

I found this very useful, thanks a lot man.

h84fun - January 30, 2012, 2:21 am

Nice one! It should be sticky if you ask me ;)

anonmad - January 30, 2012, 5:50 am

Thank u mate about the post its awesome and help very much jus wondering for any good link for e-book or somethink about learning programing language like mysql or perl would be nice too ty again

Optic-Fiber - January 30, 2012, 6:20 am

Thank you for this information!
I enjoyed reading it!

Tigri - January 30, 2012, 6:46 am

Thanks man, this helped me alot, im pretty new to hacking.

bozzman - January 30, 2012, 6:21 pm

nice post and very informative thanks alot

Alc0hoL - February 4, 2012, 10:53 am

Nice job ! Good Luck and Have Fun for me and other beginners :)

Needhelphacking - February 4, 2012, 11:34 am

This is a great guide. Do you know of any (or have made any) threads that are decent for hacking into e-mails? Because many of the ones I've tried, or have seen do not work, or are for windows computers only. I prefer non rat or key logger techniques. A reply would be appreciated. Thanks.

fikokis - February 4, 2012, 12:18 pm

very good thread! There's more than I thought in that, thanks for this ;-))

ReMiXeDg - February 4, 2012, 2:29 pm

Thanks for sharing this helpful information.

mortis - February 4, 2012, 2:34 pm

Really nice, im sure it can help alot of people

Zero - February 4, 2012, 6:12 pm

Good work on the guide, let's keep it ed so new people can see it.

WikiMan - February 4, 2012, 8:07 pm

Thanks For the great thread. im new and needed this very much thanks !

I-F***Dream** - February 4, 2012, 8:47 pm

thanks for this nice thread helped alot bro thanks

Bakaish - February 4, 2012, 9:15 pm

thanks for the post. i cant wait to try and learn

kmakb - February 4, 2012, 10:34 pm

Excellent. I appreciate this post. Very informative and enough information for a person who needs to be pointed in the right direction. Thanks

soeasy - February 5, 2012, 3:24 pm

Very good tutorial,the best for beginners.
It was helpful

Riot008 - February 6, 2012, 9:24 am

THANKYOU!

This cleared up a LOT of my doubts :D

Thanks a lot :)

P.S - which programming language is better? - Python or C++? :)

VARIT - February 17, 2012, 11:18 am

Nice one for beginners should be read by all

Thr3dKi11er - February 17, 2012, 12:11 pm

VERY nice explanation for beginners.

Just wanted to say "Thanks!"

Zodex - February 17, 2012, 1:18 pm

Absolute brilliant explains everything and is detailed

Chubaca - February 17, 2012, 2:20 pm

Very well written maybe its very helpful for new members.

Jae? - February 17, 2012, 3:43 pm

Brilliant guide, it'll help all the new hackers that ask what they need to do to become a 'hacker'.

CosmicBandito - February 22, 2012, 12:09 am

Good advice, I consider myself a gray hatter with rule against attacks on users, unless provoked of course, but I'm a big believer freedom of the sharing of information, against the government ability to do what they want to get info on users. Like with this Google thing where they correlating all their data on these users and giving the Gov the ability to access it whenever they want starting March 1st. If I had a good enough team and enough experience I'd take on google and try and stop this tyranny from happening

lpassio - February 22, 2012, 10:02 am

It's kind of helpful ,clarifying ,and considerable, thank you so much

Rust_Kid - February 23, 2012, 12:20 pm

Hi Genuine ,

I love Your Post. Just Few Thing i Need To Know.Could not Pm U because i just joint and i don't have any useful info to post as i am a noob.m 18 and i want to become a hacker.. reason. the only thing i can spend hours together on is my comp.m doing my Bachelors of computer Science <BCA> which is a three year course . i will finish my first year in about a months time. I know c and C++ ..My question is how do i go about becoming a hacker or whereto start from . I know its not a over night job as u stated above but which programming language should i start learnign first. M well Acquainted with OS . i know a little of hacking like scanning for web vulnerability sql blind sql, Fishing ,Ddosng and the pros and cons of hacking :) . That is what people call Script buddies right but i want to do in detail and learn more . i have downloaded backtrack tutorials but it was like Greek and Latin for me...In A nut shell Where Do i Start Please Help

Thanks

Rust_Kid :)

Zerenity - February 24, 2012, 7:56 am

Thanks alot mate!

Now I know where to start, which is great. Good guide/tut!

- Zerenity ?

Rust_Kid :)

If you have already mastered a programming language then I would refer you to that. Just start creating programs that you could use and share over the internet. Such as a cracker for a login for a website. From there you would get known, popular, and make a name for yourself. It's really about yourself and how you would like to work.

(Feb 6, 2012 10:24 AM)Riot008 Wrote: [\[CITE\]](#) THANKYOU!

This cleared up a LOT of my doubts :D

Thanks a lot :)

P.S - which programming language is better? - Python or C++? :)

Well if I named which language I liked better, it would only be my personal opinion. It's better for you to do some research and then choose for yourself. :) Personally I started off with C++ then just a little bit of Python.

AnxiousViper - March 4, 2012, 11:30 am

This is some good stuff! A big Thanks alot!

XxZzUniqueModZzxX - March 9, 2012, 5:37 am

yo genuine i liked your thread really although i aint new to hacking so i mean oh hay listen i got a question on my mind can i private u ?

Nostre - March 9, 2012, 5:44 am

Your in the wrong section for that. Try searching the forum for a tutorial.

KrazieDrifts - April 1, 2012, 5:45 pm

Nice post, looks really legit, 100% props bro!

djtoto - April 2, 2012, 5:38 am

Thank you for making this,Great thread. Lots of useful insight

exitest - April 2, 2012, 5:48 am

thank you tutorial helped me but knew the most things ;)

... like it

GreyJohnSmith - April 2, 2012, 6:13 am

Great job! the information is useful, simple and clear. Anyway, got one question:
Any inconvenient if I start with Java?

Konixo - April 2, 2012, 6:28 am

Looks really good will bookmark and check out when I get home :)
Thanks for putting this together.

SuperJasperge - April 2, 2012, 3:09 pm

thank you for doing this man i really am looking forward to spend some free time on becoming an hacker, now i know where to start :)

sh0cked - April 2, 2012, 5:23 pm

Thank you this was very usefull , going to start learning a new language .

King of the South - April 3, 2012, 9:53 pm

(Apr 2, 2012 03:09 PM)SuperJasperge Wrote: [\[CITE\]](#) thank you for doing this man i really am looking forward to spend some free time on becoming an hacker, now i know where to start :)
LOL! Do that and waste no time to become a real hacker. Study all tutorials dude!

Regards.

TheLastAssassin - April 3, 2012, 11:43 pm

i think we need to look for another type of hacker called "HACKER HUNTER".

drast1x - April 4, 2012, 12:13 am

Thank you for the information. I appreciate it.

lome - April 5, 2012, 11:44 am

Thx for this guide its helped alot, and im a "new" hacker so it was a good guide.

TBS.TheCyber - April 5, 2012, 12:28 pm

Nice !!! it really helped me , even if it took me along time to read..

MadMan00 - April 5, 2012, 12:41 pm

Nice way of putting it good lad i now relerning all over

GeekBuntu - April 5, 2012, 2:07 pm

Great post! I enjoy reading. Thanks

Black1ce - April 5, 2012, 2:43 pm

Nice guide. +1 for easy to read and good content

peekemans - April 5, 2012, 2:47 pm

very nice. As a beginner-hacker, I learned a lot from this. However, I found some grammatical mistakes/typos :-)

Deranq - April 5, 2012, 3:30 pm

Thanks alot for this, I'm a newbie and this helped quite abit. I've learnt ALOT.

forevererror - April 6, 2012, 6:39 pm

nc:> me as a begginer ..i want to learn more about hacking.. thanks a lot

mimespy - April 6, 2012, 7:45 pm

Is there a way in hacking that will make you pinpoint the ip add location accurately?

King of the South - April 11, 2012, 11:52 pm

(Apr 6, 2012 07:45 PM)mimespy Wrote: [\[CITE\]](#) Is there a way in hacking that will make you pinpoint the ip add location accurately?

Do u mean to hack an IP and also knowing its location or what ? Could u be kind to clarify your question a little bit more. I could actually help u for a good advice mate.

Regards.

Fennek - April 12, 2012, 2:54 pm

Thank you. Really nice tut :)

It's good to read about some basics where one can start off

samoclan - April 12, 2012, 3:08 pm

Very nice written... it is very hard to find such a good explanation... good work...

mongoman900 - April 15, 2012, 10:39 am

very nice tutorial thanks, helped me a lot.

imGoogle - April 15, 2012, 4:03 pm

This is great, its going to help me alot! I also love the part about respect, ill be sure to remember that! ?

Sir. Shagalot - April 18, 2012, 9:42 pm

Thank you for the help I'm new to this and down loaded python. I do have a question if I want to make a system for my iPod and iPhone am I going to need a mac?

RCX-Clarity - April 18, 2012, 9:47 pm

I started off with Python, so I'm a little biased, but I do think it's the one to go for. Powerful yet easy for beginners to pick up, as stated in this thread.

King of the South - April 21, 2012, 5:04 am

Great tut from another HQ member.

Love it, cuz it's very helpful.

Thanks mate for doing good job.

Regards.

hagar171 - April 21, 2012, 5:26 am

great tut i am starting python now . It is nice to know where to start from

Ch3if 3ditor - April 21, 2012, 5:55 am

Thank you so much for making this. Should be stickied in this section; so many people making the same threads. This is perfect for those people. :)

mrworldw1de - April 21, 2012, 7:17 am

thank you so much for this tut, im starting to learn python now

Irquay - April 24, 2012, 6:44 am

Thanks, its greatly appreciated you took the time to do this!

CR7MANU - April 24, 2012, 6:23 pm

Best thread ive seen for beginners, great job!

Nostre - April 24, 2012, 9:20 pm

I keep seeing awesome replies from members who are new. I'm glad I could help those who will be future hackers. :)

toddpack - April 24, 2012, 9:36 pm

good post. will help new people who want to start hacking

Flasherxx - April 24, 2012, 10:25 pm

Great thread for beginners!

Flasherxx

King of the South - April 24, 2012, 10:45 pm

What a great Guide from another HQ member.

Loving your tutorial every bit of minute i'm reading through it.

Thanks for the quality time and the good effort you sacrificed to

produce this wonderful tutorial. Keep it up! I wish you more success like this in the future.

Regards.

www_webhead - April 26, 2012, 6:47 pm

thank bro for your good information >>

I'm sure if you searched on HF you would find a tutorial. ?

spokenword401 - April 28, 2012, 1:46 pm

I am fairly new to the world of hacking and this helps a lot! I was doing C++ before I even knew about Java or Python, but I think I will start from scratch so I don't miss anything. Thanks again!

Penthos - May 4, 2012, 11:03 am

REally nice post like the layout and every thing HQ user right here

M364_H4x0r - May 4, 2012, 12:42 pm

Great thread man! Very informative!

f0r0o0s0t - May 5, 2012, 5:42 am

I can't Believe There is actually a friendly hacker , there is life on earth after all

navaneeth.kishore - May 5, 2012, 6:21 am

You explained the basic concepts of "How to become a Hacker" very well... I've started learning C++ less than a month ago... I might look into Python after I complete C++.

I will link your thread to relevant threads made by noobs and wanna-be-hackers...

Thank You for the HQ post...

Keep up the good work...

Irmbedic - May 5, 2012, 6:31 am

Thank you so much , this is much info I didnt know about ! <3

Selffinder - May 5, 2012, 8:19 am

good one ! thanks ... hope useful for every one..

TehNickname - May 5, 2012, 8:26 am

Grey hatter here! Who wants hacked money for example. Star Bliz, Gun Bros, Reckless Racing etc on android?

-90% prize :D

pendemic - May 5, 2012, 10:49 pm

thank you for this thread. i wasnt sure where to begin when it comes to hacking but now that i have a launch pad this makes it easier to understand. ?

King of the South - May 5, 2012, 11:52 pm

Yes, U are truly Genuine.

Wonderful thread mate.

Good job and i wish you more success like this in the Upcoming future.

Regards.

N3p BoY - May 6, 2012, 12:57 am

Nice tutorial. Deserves a post to keep it alive.

Cirnox - May 7, 2012, 1:23 pm

Im a leeching grey hat so fun at times

crinson - May 9, 2012, 4:03 am

Thanks a lot ! I will try Python :)

Mrki - May 9, 2012, 5:55 am

a post to keep it alive. very good man :D

mrfa393 - May 9, 2012, 8:24 am

big thanks ..the information u give to much good

King of the South - May 11, 2012, 3:05 am

Love reading through your thread.

It is a wonderful guide and arguably one of the best from one of the HQ members.

Keep it up mate.

Regards.

woernT - May 16, 2012, 11:27 pm

yeah thanks a bunch! this is really helpful! I'm new here and hope I can learn some cool stuff!

King of the South - May 17, 2012, 12:05 am

Great tutorial. Absolutely one of the great ones.

Without doubt, a lot of people will benefit from it.

Keep it up. I wish you more successful tuts in the future.

Regards.

tolisgreek - May 17, 2012, 1:32 am

thanks,,, i am glad you share this information with us

Ranger™ - May 17, 2012, 1:36 am

Ill defiantly link beginners to this thread. Good job

DigitalWizard - May 17, 2012, 6:20 pm

Very good tut mate. I'm sure all the new members will find this very useful :)

zdog685 - May 18, 2012, 2:44 am

Great tutorial man helped alote thanks.

meetcool - May 18, 2012, 6:33 am

good to see someone answering the most asked question, this is really nice

Ozymandias - May 18, 2012, 12:21 pm

this is a really good, informative tutorial, thanks a lot :)

Ix3hacking - May 21, 2012, 12:25 pm

Very nice and helpful! Thank You for that.

Cassettes - May 25, 2012, 9:38 pm

Nice guide, I'll start to learn some programing language right away thanks :)

I am trying some black hating though >:D

Blizzard Legend - May 26, 2012, 2:14 am

Nice thread and will help to many peoples to get started with hacking..

Savez - May 29, 2012, 12:50 pm

Really nice. found this helpful thanks alot cheers.

SanguinemAnon - May 31, 2012, 12:45 pm

I love this thank you :D I am now going to begin learning Python!

Shadowgirl - June 1, 2012, 8:15 pm

Good advice?methods/everything thanks!

Rulerzz - June 1, 2012, 8:45 pm

Thank You Man Such a Great Thread i think so it helped Newbies

ZaaaYo - June 1, 2012, 8:51 pm

thanks very much so you the best f

DigitalShadow - June 2, 2012, 2:22 am

This was very informative, I've been through it and thought I'd help out by doing my part, so I've sent you a PM with some grammatical fixes I spotted. Now I'm off to learn Python!

EarthShake - June 2, 2012, 2:45 am

Great Job ? Already know this but very helpful for new ones :)

ImSecure - June 2, 2012, 3:00 am

Thanks for sharing information like this . Well constructed HQ thread .

sloth1991 - June 2, 2012, 3:28 am

Great tut a lot of beginner friendly info in a same style lay out.

akashkmrgupta - June 2, 2012, 4:08 am

thank you so much
this helped me a lot

Eng Mina - June 2, 2012, 4:24 am

Thanks dude,
i wanna be a black hat one :\$

wasee_37 - June 2, 2012, 4:26 am

Great thread. Lots of useful insight. Thanks!

Guessed - June 2, 2012, 4:29 am

Thanks for this, finally a place to start. I didn't want to start a thread that's probably been done here a million times over.

I think I found a new 'guitar' or hobby. I sucked at guitar at first as everyone does, but then I went out of my way to learn to 'shred,' years later I can play super fast now.

I'll suck at this for a while but guitar taught me a lesson: What you get out of things depends on what you put in.

I'm tired I'm going to bed.

kemronkelin - June 2, 2012, 7:49 am

Now a days "hacking" it's a glorious passion I say. Everything explained here ,it's a full summery of hacking. But I wanna say something, before being a hacker you should remind something that is why you wanna be a hacker? it's your hobby or target? do you ready for a lot of reading? if you don't agree with this please give up otherwise go ahead. You must good in a programming language and "perl" must be the no 1. Good knowledge of hardware, and 1000% dedication. ok!!

mimo68 - June 2, 2012, 12:41 pm

thank you ???

AngelMcCartney - June 2, 2012, 1:37 pm

Very informative thread. It brought great attention to me, being a new member who is highly interested in becoming a hacker, about how much I would now have to learn before I can start with anything at all.

Snake Eyes - June 2, 2012, 3:10 pm

Another great thread from Genuine!

I love reading through these!

?mnipotent - June 2, 2012, 3:27 pm

Java is a good starting language as it is easy to use and learn, but also it gives you a good intro to oop.

morgendexter - June 2, 2012, 4:13 pm

I would start with Python first. its noth the esay coding language

Ghostable - June 2, 2012, 9:09 pm

That's a well written tutorial to begin hacking. It taught me allot of stuff I didn't know. I Want to learn to code in Java :)

/Ghostable

malcomex999 - June 4, 2012, 4:44 am

Nice guide to start with...great job!

arjanpaalman - June 4, 2012, 8:08 am

Great post! lot of usefull information,
little question, im a beginner hacker and i do make programs in VB C, any advice?

SpecialOps7 - June 4, 2012, 8:35 am

Will you teach me how to become a Black Hat Hacker ?...Or will anyone just teach me something about hacking, Finding it hard to get started.

TROLL DOS - June 4, 2012, 8:46 am

thanks! i liked the tutorial! im gonna learn python in a little bit.

darkknightofdevil - June 4, 2012, 9:28 am

Nice Article..it helped me a lot...want some more detail about "exactly what to learn?"

- 1.Upto which level should i learn programming?
- 2.How much time does it takes...(for beginner)
- 3.Which programming language u learnt when u were a beginner?
- 4.any other thing you want me to learn..

Thanks in Advance. :)

jackson123 - June 4, 2012, 9:29 am

Thanks really usefull for new people like me

srikanthmay3 - June 5, 2012, 5:56 am

(Oct 17, 2011 11:28 PM)Genuine Wrote: [\[CITE\]](#) [*]Learn advanced information about an operating system

what is advanced information, how exactly can i learn it. do you mean how it interacts with hardware. can you suggest books some on pc and network architecture.

Thenavish17 - June 8, 2012, 3:30 am

thanks man this is really good stuff

hardyy - June 8, 2012, 4:44 pm

wow nice and helpful, been looking for one!

cobratank - June 8, 2012, 5:01 pm

nice that is good info. :) keep it up

tulpac - June 11, 2012, 4:36 pm

This is good.great place for ppl to start. Sadly I didn't have this when I was starting off. New guys, take advantage of this.

Ani?i?s? - June 11, 2012, 6:13 pm

Good Post It helped allot Thank you

Zyrid - June 11, 2012, 9:28 pm

thank you brother for this .. i am new to this section ... and it is very helpful to me :)

Awshhit - June 11, 2012, 10:43 pm

Wow thanks man im pretty new to hf and i didn't know where to start..

404™ - June 13, 2012, 2:24 pm

Nice tutorial Thank you so much for making this

listerdl - June 13, 2012, 5:06 pm

what about learning PHP? You still reckon Python is better?

Remorsal - June 15, 2012, 2:55 am

Boosting up this to the top, and going to start my adventure today as a white top hacker.

hype3rank - June 15, 2012, 3:08 am

Thanks you :) for info

I love to hack somesite :)

natiververxd - June 16, 2012, 3:21 am

Thanks a lot... :)

Do i need to learn a lot of programming languages??I have some knowlede in java and Perl which i have just started a couple of days ago..

will you guys tell me what are those languages which will be useful?thanks in advance? ^_^

hookomph - June 22, 2012, 2:17 am

Hi! This article is interesting, and i have a question.. i'm already a C# Developer.. What should i learn then? Thanks

viperclintz - June 22, 2012, 4:40 am

How many languages are there? Also, which ones should we learn first or the most of?

sam the man - June 22, 2012, 4:56 am

this may help me alot cz im a beginner thanx:P

Zanelot - June 22, 2012, 7:37 am

Once again another nice guide from Genuine.

Great guide OP.

un4gettable - June 28, 2012, 2:39 am

nice tutorial! :D

thanx mate! :D

..

bengbeng22 - June 28, 2012, 5:20 am

this was very nice :) this will help me learn more

tear22o - June 28, 2012, 7:31 am

This is the question I want to ask firstly. Thank you very much for your great help!

ykciv91 - June 28, 2012, 9:10 am

gud posts genuine... b coz i am the beginner of this.. u put,, learn about os.. in that guides, wat kind of inf, i vil learn..

Crysan - June 28, 2012, 11:49 am

This thread should be sticky this is very helpfull for beginners :).

Scarx - June 28, 2012, 12:25 pm

This is a great guide, thanks you for this :3

HECTØR - July 2, 2012, 1:50 am

Thanks you mate very good thread.
I need the time to learning Python.

F793Syncmaster - July 2, 2012, 1:52 am

nice thread mate!!! very helpful for beginners coz now everyone starts with DoSS, rat and etc...

Nicoloss - July 4, 2012, 9:18 am

Thank you very much, you made a big and good work.
I have some work ahead of me :)

Infinity. - July 6, 2012, 2:50 am

This is Legit , compared to other threads of "Where to begin in hacking" Totally Awesome..Hats off..

IN73RL0P3R - July 12, 2012, 4:08 pm

As the others' have stated, thank you for taking the time to write this guide/tutorial up for the folks (including myself) whom need all the help we can get. It's folks such as yourself that really inspire others. Keep up the excellent work my friend.

tycandy55 - July 12, 2012, 4:27 pm

Thanks man, Very informative, really helped

LucidZephyr - July 12, 2012, 5:26 pm

Thanks for the information. Clarified everything for me.

MineSQL - July 12, 2012, 6:12 pm

Keeping this thread alive, hopefully people that post "where to begin" threads will look here..

firaspower - July 12, 2012, 8:29 pm

im going to try to be a white hatter with black hatters tools

F793Syncmaster - July 13, 2012, 3:02 am

(Jul 12, 2012 08:29 PM)firaspower Wrote: [\[CITE\]](#) im going to try to be a white hatter with black hatters tools
so you gonna be grey hat yea ? lol ...

IndexIntroduction

Pros & Cons

Getting started

Becoming a Hacker

What You Should Learn

Credits

Notes

Introduction :

Today I'm here to explain what basic hacking is and what you will need to know.

I have seen a lot of users asking "How to hack" & "Where to start in hacking", so I decided to create a thread.

If you're a good learner then you should be able to catch on quick.

I'm going to try and make this have great details attached so that everyone will understand.

Pros & Cons :ProsSome software companies will hire hackers to check for flaws in there programs

Free things

Learning

Adrenaline Rush

ConsPossible jail time

Fines

BlackHat Hacking is Illegal

Take's some time to learn

Getting Started :

First things first.

There are 3 type of hackers you can choose from.

Black Hat, Gray Hat, and White Hat.

Below I will list the definition for each of them.

Black Hat :

Black hatters, also known as crackers, are the ones who destroy private information, deface websites, and do most illegal activity.

Becoming a Black hat can be difficult if you're not willing to devote your time in learning.

Usually these people can not get a decent job because of the illegal activity.

Not of all them have bad reputation, but most of them do.

If you are caught by Law Enforcement than be expecting jail time.

Grey Hat :

Grey hatters are in between Black hat and White hat.

Most grey hat people commit pranks that they think is harmless to other users, but can be illegal also.

It's unlikely for some users to take it as a joke. Some might take it seriously if you go to far.

You can also suspect jail time if you're thinking about becoming a Grey hat.

White Hat :

White hatters basically use there knowledge to fight against malware. More than half of them are

friendly & can be trusted.

I'm not saying trust anyone because there are some White hats, but it's more than unlikely for them to do harm to your computer.

White hatter can end up in a good paying job.

Such as computer programming & security consultant.

They most likely will not end up in jail if they do not do illegal activity.

Becoming a Hacker :

You must learn information about any operating system and/or programming language, this way you have some skill in the required fields.

Most people prefer [Python](#) for a coding language because you can create advanced programs.

There is no such thing as learning a "Easy language", it takes time & patients to master your goals.

You will be able to learn computer security, also known as exploits.

Learn a Programming Language :

[Python](#) is a pretty decent language to start with because it has a clean design, very organized, and easy for beginners.

It's not just a software to joke around with, it is very useful & powerful when creating an advanced project.

Java is also good but some people do not value it as a good language to start off with.

If you are well into programming then you might want to learn C.

It's the closest language related to C++ and is to the core of Unix.

It helps a lot when creating a software but takes time debugging and is often not used because of that reason.

Perl is also good learning for practice reasons and is worth learning.

It is commonly used for web pages and system administration.

Other people use Perl to avoid programming in C.

Most computer jobs do not require C much often.

What's an Exploit :

An exploit is a piece of software and/or information that takes advantage of a bug or vulnerability in order to cause unintended behavior to occur on computer software.

This includes gaining control of a computer system or allowing privilege escalation or a denial-of-service attack.

Finding a bug can cause you to have further access into websites and software.

There are a bunch of methods on finding exploits.

The common found is a vulnerability in the creators software.

A remote exploit can work over a network and exploits the security vulnerabilities without access to the system.

A local exploit requires information before accessing the system.

It also increases the privileges of the person running the exploit past those by the system administrator.

Exploits clients also exist, usually using modified servers that send exploits when accessed with the clients application.

Exploits against applications requires some interaction with the user and is combined with a bit of social engineering.

This is part of the hackers way of gaining access into computers & websites for stealing information.

Normally a single exploit can take advantage of some software.
Often, when the exploit is released to the public, the creators will try and patch the bug.
Later they will release an update for customers to download.
This happens when the software is on the newer version.
The reason on why some black hatters don't publish their exploits is because of the patching method that is done by the creators, so they keep it to themselves or other hackers.

Earn Respect As a Hacker :
Program software & release it to the community with the source attached.
Design software that can be useful to everyone, this way users will download it & leave positive feedback.
Soon it will spread and you will start to become more known.

Test open-source software that users create.
If you can help them in any sort of way to make there software better & easy to use, I'm sure the creator will be thankful and mention you in the credits.
Try and find a program that is in the making.
Contact the creator and ask to beta-test it.
There's a good chance of you beta-testing it before it's released to the public.
You will also learn a lot this way and create good karma with others, so this way if you ever need help, they will offer you help as well.

Last but not least, give credit.
If you have had help in your current software than be sure to give credits.
Who knows, the person you're working with may give you a good ego.

Have fun!

What You Should Learn :Learn advanced information about an operating system

Learn at least one programming language

Learn how exploits work

Do some research

Credits :[Genuine](#)

Some information I brought here is also from sources.

Notes :
If you find any grammar error's then please report them to me VIA [PM](#).
I've stopped black hatting a while ago but I do answer questions.
I moved on to becoming more of a white hat.

Thanks for this tutorial, Appreciate it dude

DizzyGhost - July 25, 2012, 1:13 am

Nice written posting to keep it alive.

louisewilliams - July 25, 2012, 7:05 pm

i know nothing about hack, but i am quite interested in hack..

F793Syncmaster - July 26, 2012, 10:12 am

(Jul 25, 2012 07:05 PM)louisewilliams Wrote: [\[CITE\]](#) i know nothing about hack, but i am quite interested in hack..

jails are empty mate ... the jaiills aree emptyy +1 blackhat its not a problem ...

Weapons - July 26, 2012, 11:01 am

I would start with Python first. Then move on after you have mastered that language

doddo07 - July 26, 2012, 12:44 pm

good information to begin with hacking pretty useful thank you , there still a lot to learn from you gays

joussyd - July 29, 2012, 7:33 am

a great help..i have learned a lot!!! :)

bonstrangle - July 29, 2012, 10:11 am

thank you for this, it is very useful for because i am a newbie about this matter.

by the way guys, where can i find python and basic on how to use it. thanks in advance.

menaji13 - July 29, 2012, 10:45 am

which tut or guide of phyton would you recommend?

Thanks in advance

ZeRoBro - July 29, 2012, 11:06 am

wow lol this has lots of posts ahahahha

manjyot93 - July 31, 2012, 2:14 am

But is it important to know the programming knowledge before learning hacking????

Manjyot Talwar

picknpwn - July 31, 2012, 4:56 am

Great for starting people! Thnx alot man

Mr. Fink - August 2, 2012, 9:54 pm

Another con you can add: Karma and the possibility that you're children might have cancer because you stole 10M off a 12 year old runescape player.

Antigen - August 20, 2012, 10:35 am

Good tutorial,Simple yet informative,Thanks a lot

Jakobabob - April 21, 2013, 8:36 am

Nice tut, very useful for a newb like me.

#Skyline - April 21, 2013, 8:52 am

(Apr 21, 2013 08:36 AM)Jakobabob Wrote: [\[CITE\]](#) Nice tut, very useful for a newb like me.
