Thread: [Account Hitman Cracker v0.98 Beta - a multiple account cracker](#)

?K47 - October 18, 2011, 5:34 am

Just started using this cracker last week and had some success wit it, didn't see if posted up on the forum so going to through it up here since I haven't shared a program in a good while. It's a multi based cracker that runs off user created profiles/configuration files.

The only difference that makes this cracker unique is that it runs off combo lists instead of traditional password lists like similar crackers apex, villian and freeze. It has the nice option to create combo lists for you by combining a user list and a single password(s). This comes with profiles for the following...

Fileserve

#

Megaupload

Pornpros

#

Facebook - Custom added by me (same profile I've been running)

I'm not going to write up a full tutorial unless requested. It's pretty straight forward and runs like any other cracker, load the profile of your choice, load proxies if required, scan and test them and load the green proxies, load a userlist and a passwors(s) to make your combo list and then get crackin.

Combo lists are to be loaded in the following format

User:pass

User:pass1

User:pass2

I will try to post some more profiles as I find them and test them. Feel free to holla at me if you need any help gettin it runnin.

jaybirdak - November 19, 2011, 2:10 am

yo bro how u get the accounts?

like faceook etc etc

You need to go to profile settings and load whatever profile you want to run, then this cracker runs off combo lists and it has a built on combo list creator so you'll need to load up yours accounts and passwords and create a combo list to run....ex

Combouser:password1

combouser:password2

combouser:password3

And thats how it tests your passes on your accounts

Guys it came from crackingforum.comI was given this program by MAD the actual programmer before the beta was released on cracking forum so why would I go to another forum and copy his thread/screenshots/downloads....thats called LEECHING you fkin noob. Not to mention the original copy on cf does not come wit a working facebook method. Stop trolling on my threads find something better to do with your time, go share some working programs with the forum instead, do something productive instead of talking shit on other ppl threads. smh

Fkin Megaupload luvs removing my crackers lol....reuploaded on a diff account.

webdev77 - November 23, 2011, 10:35 am
I can vouch for AK. Its clean and works. He also sent me a link to apex, and that was working for me as well until my computer had some issues with the wifi card.

kombatnaruto - November 23, 2011, 11:53 am
Ran in sandbox and got Hitman.exe and csc.exe
Mind explaining the csc.exe? Until you tell me I will say run at your own risk people.

fuckpeace - November 23, 2011, 4:42 pm
seems like a sexy tool man thanks 4 the share bro ;)

webdev77 - November 23, 2011, 5:36 pm
Google "Account hitman" without the quotes if you really feel the need to get the original link. It should be the first result in google. I can't say what it is because its a competing forum.

lovelife - November 23, 2011, 8:32 pm
ahh yesss im not sure about this one. good luck though

domondon1 - November 24, 2011, 12:26 am
I WILL try this men..Thanks..NICE SHARING..good luck

Lucoza - December 7, 2011, 8:14 am
Thanks buddy looks good share I just need to work out or find good combo now

~X.x.X~ - December 7, 2011, 11:25 pm
link is dead pls update the link----

sk8r - December 8, 2011, 1:11 am
wow thank you, nice software ;) i will download when i get home lol

michael1026 - December 9, 2011, 7:33 pm
Dead link. Please upload again if you can. Also, I PM'd you about buying an account cracker.

Regular Craig - December 9, 2011, 9:47 pm
It seems like a well off program but that GUI makes it unusable.

It's just my preference really, Dot NET bar is soo over used. the putrid blue color just hurts my eyes

drow93 - December 10, 2011, 6:27 pm
going to msg when i reach 10 msg.))
