Well in this tutorial I will be giving you the basic rundown, of how to e-whore on youtube.

1.) You need to make a few accounts.

[Firecash](#)

[Youtube](#)

(*The reason you cant use sharecash or fileice is they do not allow nudity in the downloads and firecash does.*)

2.) So once you have those made download the e-whore photos. To start off with.

[Pack One](#)

[Pack Two](#)

Once you have that done.

3.) Upload each Set Pack Individually to Firecash, makes for more \$ and more downloads. Then create customize your youtube to be a bit slutish, whorish.

4.) Then make videos in a video editor, include a bit of photos in that make a tease then put a download link below the video. Like so...

5.) Once you have it all setup, advertise your channel with such titles as,

" FREE NUDES OF ME ON MY CHANNEL 1000 PICS & VIDEOS! "

This will get you some downloads and clingy 12 year olds. Tell them that you are giving away 1000 Pics for 10\$.

They will either say they have no money or they will say proof? Then you give them a sample photo. Then dont give anymore. They will have had their mind made up.

Also dont forget to flirt with them, as wierd as it sounds it will get you way more downloads. If you dont flirt they will think you are a guy.

Well hope you learned something! :) This was my method, if uploaded somewhere else please

contact me and i will give credits. Thanks Ignite for the e-whore pics.

Or..use File Ice...password protect the adult file and for password,add something random. Done?
File ice ftw.
