Thread: [How to Disassemble the iPhone 4S \[Video\]](#)

devi01 - October 18, 2011, 8:33 am

Hello HF

iFixYouri has posted a video showing you the steps to disassemble the iPhone 4S.

A lot of the features are very similar, but not the same to the CDMA and GSM, including the screen, dock connector, back glass, and the vibrator(same as the CDMA), making replacement and repair services readily available.

Take a look below...

iPhone 4S Disassemble video:

[Video: <http://www.youtube.com/watch?v=fbPpeXP5GdE>]

iPhone 4S Screen Replacement:

[Video: <http://www.youtube.com/watch?v=bTvYVBFL31g>]

I think that for many of us these videos are very helpful.

Thanks...

Pass Candy - October 18, 2011, 8:35 am

Thanks for this tutorial bro, great contribution as always. :)

Døn - October 18, 2011, 8:41 am

Great tutorial indeed. I would be too scared to open mine up because of something messing up ?

Acura TL TYPE-S - October 18, 2011, 11:46 am

nice one dude, i wish there was a way to upgrade the battery or change to a cool back cover ?

HF Amp - October 18, 2011, 11:49 am

I wouldn't risk opening a brand new iphone.

Thats just myself.

i would be to afraid, i would probably break it XD
