I have been working hard on this theme for about a month now. It's a compilation several different themes I tweaked. I made all the icons and some wallpapers.

This has been tested on an iPod Touch 4G running iOS 4.3.3.

Customize & Personalize!

To edit the weather and locations: theme/settings.xml

To edit the slideshow settings: theme/script/slideshow.js

To use your own images in the slideshow: /slides and Widget.html

To edit the lockscreen: LockBackground.html

To add more icons: /icons and /Bundles

To have the icons in the folders not show up, you have to install iBlank and Infinifolders and put them topmost in the folder (9 per folder).

To see the clock on the lockscreen: Hide your lockscreen clock with LockInfo (not done in the screenshot, sorry)

Upload & Use!

Must have Winterboard, OpenSSH, iBlank, and Infinifolders installed. SSH into your device

Go to /Library/Themes

Upload the theme to that directory

Respring your device

Activate my theme in Winterboard

Enjoy ;]

Download!

Great theme! I only see glaring problem though, there's no download link.

Twicks - October 18, 2011, 3:44 pm

Wow, sorry >_< Updated OP. Thanks Beemo.

Twicks - October 18, 2011, 4:03 pm

Damn. Updated the OP...again -.- You rock Beemo :]

That actually looks very nice, compared to most of the themes on Cydia.

How many icons are skinned? Just curious because that's the "deal breaker" to me when it comes to a theme. Most (if not all) icons have to look similar/be skinned, otherwise, it just ruins the whole theme.

Twicks - October 18, 2011, 4:12 pm

Thanks Silver :) Only the default ones are skinned. I'm still trying to add the circle overlay for the other ones. But erm, that's why I did the folders thing, cause that's what I mostly use. I don't have icons on my Springboard.

Ah, gotcha.

Again, it looks great. If there was an untethered iOS5 jailbreak, I'd definitely use it.

I love it; nice job :D. Keep up the good work

Twicks - October 18, 2011, 4:29 pm

Thanks Silver!
Thanks Don :3

All for the iDevice team!

(A few comments on my blog wouldn't hurt :p) Trying to bu.mp up my thread. If you liked this release, post! Keep this thread alive.
