Thread: [How To Access C Drive When It's Blocked](#)

dismayed - October 20, 2011, 2:21 am

Make sure to post to keep this thread alive! I have put this in beta, more things will be added.

Introduction

Today, I am going to release my tutorial. A lot of schools have blocked C DRIVE from hacking attempts to the school systems/machines. There are many ways to access the drive. Including CMD, Firefox/Google Chrome etc. Please follow all your local laws. Read their Legal. And do not I REPEAT DO NOT DELETE ANY SYSTEM FILES FROM ANY EDUCATIONAL COMPUTERS, IT WILL END BADLY!

Ok that is all over and done with, now for the tutorial.

Firefox/Google Chrome

Open Firefox or Google Chrome and type the following in the URL;

Quote:C:\

This will not allow you to open the files, but download them. In other words, you need the whole folder to work a .exe file (Unless it is a self ran .EXE or a text file)

This method is useful for trying to search a file and open the file with CMD.

Command Prompt

Windows Vista And Any Older Versions: You can read my guide here

<https://hackforums.net/showthread.php?tid=1340139>

Windows 7 (THANKS TO W0lfbane): Read the above tutorial but instead of "command.com" put in the following;

```
Quote:@echo off
title CMD
:1
set /p a=%cd%^>
%a%
goto :1
```

To browse through the C Drive, type in the following;

Quote:C:

And if you want to open a file, type in the following for the example;

Quote:start C:\Windows\cmd.exe

Bypassing Administrator Password (Kon-Boot)

Please read the following

<https://hackforums.net/showthread.php?tid=1597367&highlight=bypass+windows+login>

Bypassing Administrator Password: Only Windows XP

You will need a LAN cored for this Bypass. If your school/work is connected to wireless. You can not do this.

What a LAN Cored looks like

[img]http://www.hailink.net/uploadfiles/CALAN-BL-XX_Lan_cable_01.jpg[/img]

When you are connected to a network. You can access full Administrator rights by doing the following steps;

1. Reboot system.
2. Find where the LAN/Local cored is located.
3. Login, when it says "Applying User Settings" take out the LAN cored as quickly as you can.
4. Wait till it logs in, when you are on your desktop. Put the LAN cored back in to access the Internet.

Keylogging And Social Engineering

It often requires no techy knowledge to instigate, but the more you have, the better. For example, leave a USB stick beside the teacher's computer in the computer-room/library/classroom, with an Autorun keylogger. Tell the teacher that the USB is yours. S/He should plug it into their PC and prove it is yours.

Linux Bootable USB

(Thanks To KlokWeiss)

This method of getting a live install to a USB drive is the simplest available using Unetbootin. Note that we will format the USB drive and erase its contents.

1. Plug in your USB Drive (Minimum USB Drive capacity 2 GB)
2. Format the USB drive to FAT32
3. Download Unetbootin from <http://unetbootin.sourceforge.net/>
4. Start Unetbootin and select diskimage (use the backtrack-final ISO)

5. Change the boot startup to USB via BIOS.

6. Log into BackTrack with the default username and password root / toor.

WinPE or Windows Preinstalled Environment

Wikipedia: "Windows Preinstallation Environment (aka Windows PE, WinPE) is a lightweight version of Windows XP, Windows Server 2003, Windows Vista, Windows 7, Windows Server 2008 R2 or Windows 8 that is used for the deployment of workstations and servers."

Needless to say, at my school it is fully unencrypted or unhidden. This can give you FULL computer administrator access. (Doesn't include Network administrator)

By doing a simple glitch it, that can bypass the firewall that causes the computer to restart.

But not all the computers have this, well at my school anyways.

I figured out that only the HPs had WinPE. How can you find out?

By restarting your computer, a black screen might appear that says it wants you to wait 10 seconds before it boots up.

By pressing "F8" it should show the option WinPE, highlight this and press enter.

This should load up vista, then several Command Prompts will show. When it says "Verifying Connect" like the "Bypassing Administrator Password: Only Windows XP" you need to take the LAN cord out. Then press control+c. Then type "Dir C:"

Now you have full access, I recommend to type in "ipconfig/release" before putting the LAN back in.

End

There are countless ways to access the School/Work Place System to gain control to the C:\ Drive. Hope you learned a lot reading this thread.

Please do not leach this thread without my permission. It's just a PM away.

Numinous - October 20, 2011, 2:26 am

Very nice Tutorial.

Thnx 4 this information bro....

FandangoMan - October 20, 2011, 2:28 am

Nice tutorial man.

If I'm not mistaken you can also use a linux bootable cd/usb.

dismayed - October 20, 2011, 2:29 am

(Oct 20, 2011 02:28 AM)KlokWeiss Wrote: [CITE](#) Nice tutorial man.

Hmmmm, Never thought of that when I was writing it.

cdaddy - October 20, 2011, 3:56 am

very nice tut dude will come to good use

Napst3R - October 20, 2011, 4:03 am

Very usefull, it helps me a lot. Thank you!

CRT - October 20, 2011, 7:59 am

Very well written tutorial! good job man.

dismayed - October 21, 2011, 2:01 am

Thank you all for the great feed back.

Hoped I helped you all out.

theswordbuggy - October 21, 2011, 4:34 am

Thanks I might try the LAN cord 1 on Monday

daftpunk10 - October 26, 2011, 7:53 pm

What about "net user admin passwd /domain" to change the admin password ?

dismayed - October 30, 2011, 11:23 pm

(Oct 26, 2011 07:53 PM)daftpunk10 Wrote: [\[CITE\]](#) What about "net user admin passwd /domain" to change the admin password ?

Yeah, I guess you can do that to. Thank you all for your feed back.

-The Three Cs- - October 31, 2011, 12:14 am

Fuck me that is a great why but i would be fucked,i would get kicked out if they found out.

ZeXro - October 31, 2011, 3:27 am

already knew that,but very nice tutorial

creep - October 31, 2011, 10:24 am

I dunno if someone already mentioned it but u can also use programms like "Explorer++" to access drive C :-) (Link: <http://www.explorerplusplus.com/>)

At least working for our school. OK, its still Win XP.

Anyone knows if this still works for Win 7?...

kaviya1 - November 3, 2011, 7:42 am

thank you very much for this tut ?

dEsCrApErxD - November 5, 2011, 12:27 pm

Thanks this rly helpd me out! :)))

10/10

dismayed - November 5, 2011, 7:20 pm

(Oct 31, 2011 10:24 AM)creep Wrote: [\[CITE\]](#) I dunno if someone already mentioned it but u can also use programms like "Explorer++" to access drive C :-) (Link: <http://www.explorerplusplus.com/>)

Anyone knows if this still works for Win 7?...

I have never herd of that before.

But you would still have to open it somehow, if .exe are blocked.

xcode5 - November 5, 2011, 7:26 pm

may i suggest another option that works at my school, making a shortcut to c:\ allways works for me :D

kclayr - November 6, 2011, 12:26 am

If you use portableapps on a flash drive, you can get around the .exe block. And while I haven't heard of explorer++, freecommander does the same thing and automatically shows you the C: drive without fail. (Although, if folder's need admin right to access, they are still blocked).

SteelMemer - November 6, 2011, 2:23 am

everything very organised, very clean and very nice tutorial, youve made it, man

dismayed - November 6, 2011, 2:34 am

(Nov 6, 2011 03:23 AM)sluast Wrote: [\[CITE\]](#) everything very organised, very clean and very nice tutorial, youve made it, man
Thanks mate, have fun hacking ?

Zeus™ - November 9, 2011, 5:00 am

The sad thing is my school is using LAN and cmd is easily accessible... Great tutorial dude, going to have an ass load of fun tomorrow :D

403 - November 13, 2011, 12:46 pm

nice guide but i dont need it coz somehow im admin in my school comps :P

lollernator - November 16, 2011, 4:22 am

Great tutorial,
Gonna need to remind these tricks ;)

greats form out L33ts place

DodongGetch - December 4, 2011, 4:51 am

Thanks for this tutorial man. ?

desire_ - December 12, 2011, 1:58 am

The LAN cord trick is great. I like the linux usb the best though, letting me erase students drives and bust their pr0nz :3

Evil-Reddy - December 12, 2011, 4:00 am

Nice information Man.. grt to knw about all these stuffs.. ThanX

Hudson - January 2, 2012, 2:41 pm

Thanks for the tutorial, this'll really come in handy. ;D

AATDRS - January 11, 2012, 7:14 am

Was reading this in school and teacher saw :P i told her it was for a project.

binarydivided - January 29, 2012, 7:21 am

Thanx!! I'll try this :) Of course, for educational purposes ;)) :D

Valcyra - January 29, 2012, 11:51 am

Very nice guide for a funny thing :)
I might try it one day. Thanks for making this guide.

Senor_Reed - January 31, 2012, 1:43 pm

Thanks for the info. I think I'll try this out

sexycajunguy09 - January 31, 2012, 2:15 pm

Thanks for the info. I think I'll try this out

Shumaan - February 6, 2012, 8:31 am

This actually worked on my college site, that is rather odd, most of the stuff on this forums is stupid stuff.

Baddie16 - February 6, 2012, 8:12 pm

thanks man for the tutorial. it helped a lot

xanonwarriorx - February 7, 2012, 12:35 am

This is a very nice tutorial! however, My school uses the MAC OSX systems... Any help there? I am assuming kon-boot (which I already use to troll my friends computers and make their jaws drop - LOL) is not compatible with Mac's? Just wandering what I can do... And I will search. If anyone finds anything, please pm me or reply here. Thanks

szenes1974 - February 7, 2012, 5:47 am

Nice tutorial man.

If I'm not mistaken you can also use a linux bootable cd/usb.

dismayed - February 8, 2012, 2:25 am

(Feb 6, 2012 09:31 AM)Shumaan Wrote: [\[CITE\]](#) This actually worked on my college site, that is rather odd, most of the stuff on this forums is stupid stuff.

This sites not stupid, it has its up's and down's, but centrally not stupid or gay

(Feb 7, 2012 01:35 AM)xanonwarriorx Wrote: [\[CITE\]](#) This is a very nice tutorial! however, My school uses the MAC OSX systems... Any help there? If anyone finds anything, please pm me or reply here. Thanks

This probably wont work because you are logging in into the TEMP Administrator account. Its just a bug in Windows operating systems when you try to connect to a network

9814892734 - February 18, 2012, 7:32 pm

Careful guys. My friend who was in study hall with me was on CMD for maybe 10 minuetes, and the main computer administrator came to our classroom and kicked him off and told him, "I saw you were running command prompt." His account got banned for 2 weeks. (which is kinda stupid because the kid isn't good with computers and was just screwing around) Our school runs XP all on LAN, no wireless. Thus, I would figure out what lunch shift the Admin has then use CMD. But then again, he could eat lunch in his office so it's all up to you. Hope this will somewhat help.

A7XMidnight - February 18, 2012, 7:42 pm

They just started blocking stuff at my school. Totally easy to get around, just annoying as hell to do every single time.

9814892734 - February 18, 2012, 7:47 pm

(Feb 18, 2012 08:42 PM)A7XMidnight Wrote: [\[CITE\]](#) They just started blocking stuff at my school. Totally easy to get around, just annoying as hell to do every single time.If your talking about

websites, then you can just use Ultrasurf on a USB and you can go on any site.

briangx92 - February 20, 2012, 1:49 pm

what about deep freeze?

and i couldnt see how the lan cord looks like b.c its not showing up or w.e

Chase™ - February 21, 2012, 11:53 pm

At my school the cmd is blocked out. The only choice i have is live boot and the lan. The live boot WILL get to much attention, i will try the lan first.

(° ? °) - February 22, 2012, 12:44 am

You know, when C drive is blocked, usually cmd is blocked too.

dismayed - February 22, 2012, 2:11 am

(Feb 22, 2012 01:44 AM)Subotai Wrote: [\[CITE\]](#) You know, when C drive is blocked, usually cmd is blocked too.

Thats why you create the batch file

Open Notepad>(Type In) command.com>(Save As) command.bat (On Desktop)

(Feb 22, 2012 12:53 AM)Chase™ Wrote: [\[CITE\]](#) At my school the cmd is blocked out. The only choice i have is live boot and the lan. The live boot WILL get to much attention, i will try the lan first. Please read my other comment ?

(Feb 20, 2012 02:49 PM)briangx92 Wrote: [\[CITE\]](#) what about deep freeze?

and i couldnt see how the lan cord looks like b.c its not showing up or w.e

Our school uses Deep Freeze. The LAN trick works great.

Deep Freeze just locks the system from the original state when it was installed

meconiotech - February 24, 2012, 12:22 pm

Linux key is the solution for all.

Otherwise ubcd

IgorLima96 - February 24, 2012, 4:05 pm

Nice tutorial! I was looking for this, to have some fun with my Computer class teacher.

Thanks!

jacob843 - February 24, 2012, 7:13 pm

Thanks! Will try in Tech class next Monday.

dar7hs3n71n3l - March 1, 2012, 11:34 am

Can I hack school computer from home and change some things while I am still home I need to be there?

HENRiYE - March 2, 2012, 5:52 pm

What Works At My School, when cmd is disabled and you cant use firefox or ie to get in is making a shortcut to Code C: and it usually lets you use that.

Mosca - March 14, 2012, 12:53 pm

This is great, the LAN cord one works perfectly!

sinfulz0r - March 14, 2012, 5:41 pm

Going to take down my school network using this method (maybe :P)

Dragon Siege - March 26, 2012, 8:56 am

Thank you for this!
I didnt know that you could do that with chrome :)

evolutionroh - June 11, 2012, 10:48 pm

Very Nice tutorial..thank for sharing..

Dynasty@HF - June 12, 2012, 3:28 am

Great tutourial. putting this one in the bank for when I need it.

Thank you?

soicalboy - June 12, 2012, 5:28 am

Nice tut man but I don't get a few things!

Shandy1996 - June 12, 2012, 5:36 am

With accessing the C drive, do this.

Open a new "My Computer" window.

Up in the address bar, type:

C:\

Then hit enter.

Other than that,

Great tutorial :)

Nartheinis - June 14, 2012, 4:24 am

that's a pretty good tutorial. You should make another one to show what you can do while you bypass the systems.

hack4all - June 14, 2012, 10:15 am

very helpful tutorial
Thanks for sharing..

Exxon865 - June 14, 2012, 10:21 am

lol this will help me at school, Tnx man

DspiZe Karma - July 6, 2012, 12:32 pm

Very informational tutorial. Thanks alot!

hacxxxx - July 6, 2012, 2:29 pm

Thank you so much, this helped out alot.

LucidZephyr - July 15, 2012, 12:41 pm

nice descriptive tutorial. Thanks so much!

gosegand - July 18, 2012, 2:28 pm

Nice tutorial, thanks for sharing.

Regards

Laran2 - July 26, 2012, 2:45 am

You could also use Windows Offline And Registry Editor to get the Administrator's password. :D

rockandralph - November 3, 2012, 8:14 am

Imma try this later ?

thank you

7amnDy - November 3, 2012, 11:24 am

Shavon - January 21, 2013, 8:57 pm

Great tutorial, can definitely come in handy.

Zabuza? - January 21, 2013, 9:24 pm

Nice tutorial man! This will be used tomorrow...

Jemjem787 - January 21, 2013, 9:42 pm

Thanks for this man! I will go try this out!

ByDG - March 21, 2013, 3:40 pm

Thanks man i used it today and it works:)

JamieSissons - June 22, 2013, 6:05 am

Thanks the C drive access via Firefox works, for anyone whos school uses macs then installing path finder will allow you access to some areas that may be usually blocked EG: the C drivev :D

zXFacelessXz - June 22, 2013, 10:21 am

followed instructions and it worked perfectly, thanks!

Alpha00 - October 30, 2013, 1:16 pm

Aha thanks :))

Its workssss and i love itt

DeZireLife - November 25, 2013, 4:40 pm

Nice tutorial, Very well written. good job

'OverSight - December 5, 2013, 11:47 pm

HQ Tut. Nice thread dude. I found the LAN cord one to be the most intresting.

xawi1234 - April 14, 2014, 12:23 pm

What is that lan cord? Can anyone reply me?

Greyhat99 - April 14, 2014, 2:08 pm

The LAN cord one was pretty neat. Though I don't know about the social engineering tactic. In many cases the teacher would probably give it back without a fuss. Maybe say something like "I think this

might be mine, but I don't know. Could you see if it has my files on it?"

Hyun - May 28, 2014, 9:03 am

Nice Tutorial,
Thanks for posting dude.

justmatty - May 28, 2014, 3:07 pm

Nice tutorial dude, my school's C:/ is blocked so should come in handy.

Helipads - August 4, 2014, 8:24 am

Pretty cool man. Thanks for sharing this with the users!

Talu - August 4, 2014, 3:10 pm

Pretty nice and well-made tutorial. Thanks for posting.

DnBHead - November 23, 2014, 2:45 am

Good tut man. Very helpful im going to try it out very soon! (:

jhoncarbnt - April 7, 2015, 5:42 am
