I like everything except the textbox and the exit button. The textbox looks so plain and the exit button is just a square. Other than that it looks really good, I like the mixture of the dark grey with a lighter grey.

Lol I think it's the default textbox of microsoft..

But I don't like the spotify icon at the top left and the mousestate.none button, because it looks like it's down but actually it's not clicked or anything.

IMO I don't like it.

But in the view of a programmer and looking at it through that perspective it's a very nice.

Lol, i never copied the UI, just the colors :P

Grays (71,71,71)
(151, 151, 151)
(100, 100, 100)

Spotify Grays using a color picker..

Then my own sorta design... lol...

And no worries.. it was just a mess about lol. spend like an hour on it..

EDIT: I have been really busy with two other projects atm.. but neither i can release.. Which is a shame as their VERY HQ ... but meh gotta respect my Teachers ^^
