Thread: [Password Cracking Aim/aol and Hotmail/Windows live \(FOR REAL\)](#)

?K47 - November 15, 2009, 1:27 pm

So I am going to offer my service in cracking aol/aim emails and screen names and cracking hotmail/windows live. What I need...

For Aim/aol: send me 1 or a couple of accounts you want and I will run a 7k pass list, then a 20k, then a 100k password list on it as aol's security sucks and they do not ban ur ip or lock accounts. I charge by how bad you want the account and the amount of time you want me to spend, I can spend 5 minutes running a 7k list, or I can spend hours running 1 million word list

For hotmail/live: they do lock accounts after 5 incorrect pass attempts. so with this I use a backwards cracker (which runs backwards, runs a couple of passwords on a LARGE list of emails). I have been quite successful on cracking hotmails/windows live because I am familiar with common passwords created by people in foreign countries and we all no windows messenger is probably the most widely used messenger in the world. So to get to the point for hotmail/windows live I will need a BIG list of emails you want, and I will only be able to get you a couple of them.

Pm me with your requests or post them here. I am not your average teenage HF user claming that I can crack accounts, I am a grown ass man and I will actualy put the time and effort into cracking.

Peep my thread if you want of all the cracked accounts I own.
