Windows 7 was my idea - October 24, 2011, 9:31 am

OK, maybe you can. But MC Hammer doesn't want you to.

The venerable rapper, who helped usher hip-hop into the pop mainstream in the early '90s, has rolled out a search engine he hopes will outperform Google, Bing and other established tools.

The project, called WireDoo, has been two years in the making, said Hammer (real name Stanley Burrell) Wednesday at the Web 2.0 summit in San Francisco.

At the conference, he said what will make his search tool better than Google (or, too legit to quit, if you will) will be its "deep search" ability.

^ just part of the article not all of it.

i can't believe this silliness.

Thoughts? hahaha
