Thread: [Free 5GB from Amazon: Could Drive!](#)

IllBeBackSoon - October 26, 2011, 2:58 pm

I got an email from Amazon recently, just wanted to share with you guys:

<https://www.amazon.com/clouddrive/learnmore>

Thanks for the link.

Going to keep my important documents secure there.

I use Dropbox instead.

Only because you can save directly to Dropbox and it'll save to your online storage, there's 2gb free which is pretty good. Good for computer science because I'm always switching between my tower and my laptop. But yes, this is good too.

Copying dropbox i see, =\ wont be using this anyway.

Amazon Cloud has been out for a while. Dropbox was nothing new, it's just a useful program.

There are plenty of other free file hosters out there. :3

Actually, reading the terms of service it isn't that good.

They said they are allowed to access your files.

I doubt they do that though regularly.

It's probably if you're sued by someone for having kitty porn or some sort of illegal activity on it, then they'll go through your files.
