Thread: [Website Affiliation/Sponsorship](#)

Nicholson - October 26, 2011, 10:37 pm

I am looking for a few websites to either affiliate with mine or sponsor mine.
I own a gaming league website and host tournaments for various games.

If you are to sponsor my league you will need to be able to provide something. As in a teamspeak/vent server. Good webhosting. Prizes. And so on. On my site I will post a good banner of your site. Provide weekly updates of your site. And have a nice direct link some where on my site to you site.

If you just want to affiliate with my site then your site must have something to do with gaming or computer etc etc.

Feel free to post below and ask more question or i you are interested in what I have just stated.

Link to my site: <http://www.ggcleague.com>

I've got an upcoming gaming site that could use this. I can offer some offshore(Netherlands) webhosting, unmetered(unlimited) unless you want it to be limited.
