Quote: This Software Blew Me Away...

Hey Mike,

I had a chance to check out Magic Ecover and freaked out when I saw your demo! This software blew me away when I saw how easy it was to use. I know you're a graphics buff and figured it had to be pretty techie or at least take some mad photoshop skills, but it's totally newbie friendly.

Killer product man. An absolute must have!

Got it---- Love it,

Quote:Very easy to use and really quite powerful...

Hey Mike,

I found the software very easy to use and really quite powerful... and a great price to boot. One thing I realized when I started playing with it is that its also easy to create your own image (with the proper dimensions) and then upload that as the cover. This way you can add photos, graphics and have a bit more control of the look but still get the super easy method of creating the dvd case, etc.

You might want to add that as an advanced video as it really does make it a super powerful product. (from Mike: Just added today!)

Thanks,

Richard Dietz.

Quote:Great software! ...

Hey Mike,

Great software!

I plan to create covers for my PLR stuff and this software. It will save me loads of time. I want to thank you for creating it and look forward to using your Affiliate Link Magic Pro Tool as well.

I just picked that one up at the same time of buying Magic Ecover. If I have more than two hands, I would give you more than two thumbs up!!

Thanks,

Quote:Far superior to anything I've used...

Hi Mike,

I've got to say this is a pretty cool piece of software. The simplicity of use and the quality of the covers produced are far superior to anything I've used or seen.

The time savings alone will pay for Magic Ecover with my first use. Great job!
