What the fuck? Why did you post it in the premium sellers section? Downs or something?

eight - October 30, 2011, 6:17 pm

Belongs in the discusses section. Add the "Booter Down Approved" booters as well.

Chris - October 30, 2011, 6:21 pm

Nice effort, but I don't like it. A lot of bought products are good at first and then blow after the first few months. I've seen products that are twice as better that nobody has bought. Support on products with 10 clients are way better than 100.

You should delete Venus Booter. His putty booter was discontinued and his new booter, a shell booter is shit imo. Just look at the posts on these two threads.
