Thread: [\[VB.NET \] Advanced Text Spammer! \[Tutorial! \]](#)

BETAhkr - November 22, 2009, 2:49 am

I'm sick of people trying to say "My text spammer is so good"
When it's just a basic text spammer.

So here is how to make an advanced text spammer with
multiple options.

I'm going to use tab control 1 tab for each option.
I'm also going to add in a couple extra features
such as: Counting total text sent, your computer time to label, and
and input box for your name or handle.

Part 1:

Part 2:

To watch on youtube...

Part 1: <http://www.youtube.com/watch?v=-wLkBQcxbwg>

Part 2: <http://www.youtube.com/watch?v=ayrUjMv9N0A>

Source code:

<http://www.#/?d=AN5Q9I24>

No program, Just source so no need for a virus scan
to be posted here, If you still don't trust it, Hit it with
a virus scan after your download it.

No I didn't steal this code, I just copied some of the code
I made in a previous advanced text spammer
I made for myself some time back, It was easier
then typing it out all, I tried to make the
movie as simple and short as possible, Sorry
If you don't learn or enjoy this tutorial.

Viperx28 - November 22, 2009, 6:30 am

Great Tutorial BETAhkr
Keep it Up!!

BETAhkr - November 22, 2009, 11:10 am

Thank you, I'll try.

FROMOHIO - November 22, 2009, 11:11 am

got a couple ideas from this for mine.. thanks!

BETAhkr - November 22, 2009, 11:14 am

It's always good to add your own options, If you don't mind, You can share, I'm always looking for more options, functions, and ideas myself.

~Li0n~ - November 25, 2009, 12:16 pm

I have Problems With "Counter"

Da Loser - November 25, 2009, 12:21 pm

lol nice, but personal opinion noting in VB is advanced especialy not a text spammer, C++ FTW!

BETAhkr - November 25, 2009, 1:48 pm

Quote:I have Problems With "Counter"

What is the problem?

Quote: lol nice, but personal opinion noting in VB is advanced especialy not a text spammer, C++ FTW!

Nothing is advanced in VB .NET? Kid, Please google before you post to me...

1. It doesn't matter what language you code in (by the way, C++ isn't shit compared to perl, python, delphi and C#)

2. It's not all about your code, It's also about your GUI and how well everything runs and functions on time.

3. Compared to any lame ass text spammer your gonna find on this forum, This is gonna be your most advanced one, I also have even made a MORE advanced one with a PASTE SPAM option.

Hehe.

The End Gamer - December 12, 2009, 6:29 am

Looks Pretty Cool

Good Job BETAhkr =)

BETAhkr - June 22, 2010, 2:30 am

Thanks for the positive feedback.

preben1995 - June 24, 2010, 4:11 pm

there is no point making a video tutorial if the video is so low quality that you cant se what you are doing.

learn to make good quality videos.

Braco Asshole - June 24, 2010, 4:21 pm

That's a nice tutorial. But the quality stinks. Try to make it better.

Feather - June 24, 2010, 7:12 pm

Great Tutorial! thanks for the share.

BETAhkr - July 4, 2010, 8:47 pm

Well, If you can't program in VB .NET, You shouldn't be watching the video, And if you honestly

don't know EVERYTHING I'm doing in that video, Then your just looking for a free program or source code, Not to mention, I added a download link for the source code so any real coder would know every function once he reads the code over. =]

Charny - July 4, 2010, 10:08 pm

That's a nice tutorial, but you should not use timers..

PAGMAN - July 4, 2010, 10:25 pm

You can rig up your own threaded timer without using the timer control at all. I could show ya if you want :)

BETAhkr - July 5, 2010, 8:10 am

Everyone says not to use timers, I don't see why, I never ever had any type of problem with them, I don't even have to use timers because I'm using sendkeys and I could just control the speed of the sendkeys, But, I figure timers are easier for people to understand then sendkeys times.

I also know I can use a threaded timer, But I'd rather not, Thanks for the offer though!

PAGMAN - July 5, 2010, 10:41 am

No problem. Wish I could have helped ya.

BETAhkr - July 9, 2010, 8:24 pm

If I need help with any type of threading, I'm going to send you a PM, Thanks in advance!

WordedPuppet - August 30, 2016, 2:31 pm

I made one (not using the video, i haven't seen it) you can choose what to spam, how many times, and how fast. There is also a option to place enters by itself and a button to clear all the options by itself. I'm still working on it but i think it's a gr8 start!

\$lick - August 30, 2016, 4:55 pm
