Thread: [Question regarding the avatar gallery.](#)

Does omniscient still accept Avatars to be added into the avatar gallery?

I was just wondering and maybe it'll be cool if he held a contest for people to make an avatar pack for Hackforums.

You can always give it a shot and send Omniscient a PM with the avatars. :)

I'm sure he will add them if they're good.

PM me the avatars and I'll make the decision ?

Do you have any? Are you good at PS CS5? :P

Well, I got my own avatar gallery after I randomly PMd Omniscient with the avatars I created.

I'd say, just go for it and see how he replies.

Keep in mind that he's probably busy replying to all his PMs and whatnot after his weekend to Disney, though.

Why not post a thread up somewhere with all of your avatars and grab user attention and opinions, if it becomes popular Omni or another Staff will be likely to reply with a decision or notice.

You can't really know 'till you try.

Go ahead :P

There is no problem in attempting to have a own customized avatar gallery. If you have already finished creating the avatars, just simply PM [Omniscient](#). He will tell you whether he will add them or he will keep the ones he already has.

I am sure your work will be great, so give it a go. :)

I don't see why he wouldn't. Just drop him a PM or something.

I would suggest creating about 20 images and uploading them in a folder. Then send them to him.

If you can amuse Omni with your Avatars.
