Thread: [\[RIs\]Social Engineering Serial Keys \(Useful for Steam\)](#)

PyroFR - November 21, 2009, 8:00 pm

MSDN part is done, eff it. Thx to people who ruined it for everyone. GG.

I left the steam guide up. Free to dl. Gl.

Here's a guide for social engineering Game serials, especially useful for Steam. You are free to distribute it, please leave credits in that I revamped it.

Original guide is by a person I don't know, so.. -shrug-

Vegetto - November 21, 2009, 8:41 pm

hello, I'm really interested in this guide. Do i qualify to have a review copy?

I have an Ebay account with 100% possitive feedback and my website is in my sign, I think I can test your method right away.

THanks in advance!

SPZ - November 22, 2009, 12:34 am

I would definitely like to try out the review copy!

First come, first serve, right? =D

I'll make a good review...

bobbyntigers91 - November 22, 2009, 12:47 am

Can i have a review copy? i will give you a honest review :)

meowth - November 22, 2009, 1:59 am

Does this teach how to create BizSpark accounts? If so, I'm interested.

Sky_King - November 22, 2009, 2:14 am

I can give you an honest review. I can install a CMS and have basic understanding of HTML and mySQL.

PyroFR - November 22, 2009, 12:11 pm

Review units have been given out. Sorry Meowth and Sky_King, first 3 only.):

Updated guide: It is now 13 pages.

Sparky - November 25, 2009, 8:25 pm

I got the honor to review this guide, and well here's my review!

"This is the most thorough and well put guide I have ever read. PyroFR makes it simple and easy to understand how to make large profits with MSDN. The guide is put step by step to make sure you

don't get lost. I highly recommend this guide to everyone out there!. Great work! 5/5 Stars." - Sparky

piyushjeswani - November 25, 2009, 10:55 pm

To make this guide work, what all is required. Is a website needed? If yes, what kind of a website. Can this method be used from India.

Please let me know

Thanking you

Vegetto - November 26, 2009, 12:47 am

I got a review copy for this one, and still waiting for MSDN accept my website. Yes, a website is a must, you can download it anywhere. However, this guide doesn't show you how to find a website or what kind of website you should use. To me, this one is not the problem since I own a lot of website scripts.

Quote:"You need to be a small SOFTWARE DEVELOPING COMPANY - that is the easiest way to be accepted into this program" That the first step in this guide lol

evilalex - November 26, 2009, 6:26 am

dude they have a public guide on this
and it doesn't work anymore; ebay takes your thing down

SlaYoRz - November 26, 2009, 6:48 am

You can still sell them up on ebay somewhat. Mine stay on ebay for about 5 days before they take them down and I get people that see them and email me wanting to purchase keys. Like I said in another post i've made 400\$ so far :)

PyroFR - November 26, 2009, 8:03 am

I don't know, I restarted, and it works perfectly - e-bay stopped taking them down for me, and I managed to sell them at 80\$ a piece THROUGH ebay itself. My website managed to grab recurring members, thus, cash flow is constant.

Also, for the small business thing, you only have to pretend to be one. And you should get a subdomain or a website anywhere, but you have to know how to install a CMS.

Btw, I wrote the original long one. Someone introduced BZ, but meh.

Yes you probably can.

I'll add a website section too. Brbz.

And that was in no less then 2 weeks.
I had my own little twist on it though

Taserz - November 26, 2009, 1:00 pm

Can i have a review copy ill write a review unlike other people who only write 3 sentences my reviews are generally 2-5 paragraphs. I previously review napzerz guide you can go see it at his thread it was a longer review.

PyroFR - November 26, 2009, 3:05 pm

I already gave out like 5 review copies, and plus original vouchers, I think that's enough.

Thanks for the offer though.

jess~ - November 26, 2009, 5:42 pm

So basically, MS BizSpark, get keys, sell keys, profit \$\$\$

BrainEater - November 26, 2009, 10:22 pm

(Nov 26, 2009 06:42 PM)jess~ Wrote: [\[CITE\]](#) So basically, MS BizSpark, get keys, sell keys, profit \$\$\$

That and also sell the OS as well XD

You can also do this:

Sell Keys

Sell Programs (Download Links)

Sell the Sub Accounts (From BizSpark, so people can make up to 7 keys for each program)(Usually these cost more)

Sell the Admin Account (From Bizspark, allows you to create sub accounts. Sell this at a high price, these things go really quick XD)

Also, bought this guide. Really well thought out, explains a lot of things that I didn't already know XD

Thanks for the share ?

msuper28 - November 27, 2009, 12:58 am

i don't understand because it can be a good guide, but here the feedbacks say that on internet you can sell software and keys, but the keys can be illegal? as i've read i see that you can sell programs and keys downloaded on the web, but the people that buy don't know that are illegal or can get for free?

sorry for my english, please explain more, i'm interested to get this guide as soon possible when i've my legit paypal of my father that can i use it i too.

thanks. another question: do you need fake paypal for sell fake things? and then the money on fake paypal can be trnasfered on legit paypal?

then i'm only 15 can i follow your guide? (because i'm waiting that my father make legit paypal with his info, and i'll use y own credit card on and he use his cc.

finally can i make for example keylogger that works and send via mail logs and sell this on the web and make thousand money?

this method works with other web things? thanks in advance for your help.

??¢??? - November 27, 2009, 2:04 am

i think i have this TUT - maybe i am not hijacking but this is a must buy stuff !

I really don't understand what you're trying to say...

All this stuff is legit selling, apart from the fact that the keys are not legitimately obtained.

:3 And you have to be honest with your customers so they come back, no keylogging them or anything, because then you're screwed if you want recurring buyers.

Also, er, what is that about other web things? Yeah, it works, it teaches you how, but you need good/decent english to understand the guide. O_O

msuper28 - November 27, 2009, 9:07 am

ok finally i need proxy? and fake paypal? sorry for my english i'm italian...

ok if is legit this method can i use my legit ebay and paypal account?

*when i saied if i can sell all internet stuff i thought all application but here you say about BizSpark that send legit keys, it's a good thing.

maybe the only risk can be that ebay delete your post because you sell by mail all keys...

is there other website like BizSpark that can give legit keys and can resell they? thanks a lot for your time but i will happy to buy your guide if you explain more but your help it will be good for other people too that want to buy your cool guide!

PyroFR - November 27, 2009, 10:14 am

Nope, BizSpark is the money loophole.

I used Legit paypal, but if you want to be uber secure, get a VPN, fake paypal, fake ebay, etc...

Ranger11 - November 27, 2009, 7:41 pm

Post all the requirments atleast, if not, then it makes you look like you just want people to pay you then find out they need something big like Vegetto said

"You need to be a small SOFTWARE DEVELOPING COMPANY - that is the easiest way to be accepted into this program"

No noob will have any idea what a developing company is and right away ask for money back.

PyroFR - November 28, 2009, 6:17 am

Did you actually read the thread? All the requirements are THERE, and it explains how you can get them.

The software development part is PRETEND, not you HAVE TO BE.

Get your facts straight, then post. k? :) And up until now, no one has asked for their money back. Remember, a 12~ year old with good English can do this.

SlaYoRz - November 28, 2009, 6:35 am

Also, for the website you can use almost any kind of site. I used the one in my siggy (not neobux...) and got accepted.

BrainEater - November 28, 2009, 11:03 am

It might of been because of Thanksgiving, but I signed up on I believe Wednesday, and haven't actually gotten a email from them saying either I was accepted or denied.

Like I said, it could be because of Thanksgiving, as it said it will reply after 3 business days.

SPZ - November 28, 2009, 11:59 am

This is simply the best money making guide ever.

Everything is well explained, and I already earned \$200 in 2days...

But, what if... ??

PyroFR - November 28, 2009, 12:02 pm

Yeah, 1 in a billion I guess.

lump021 - November 28, 2009, 10:13 pm

I'm interested in buying the guide.

Add me to msn: Munch@fbi.gov

Mr. Ocean - November 28, 2009, 10:14 pm

BrainEater - November 28, 2009, 10:24 pm

I can't seem to find it, but there was a tutorial on HF that showed you how to have a custom email address at Hotmail.

If anyone could link it I would be very happy :D

szabz - December 1, 2009, 8:15 pm

just bought it, looks pretty good

Vegetto - December 1, 2009, 9:09 pm

well, pyroFR, I think you should remove this thread or increase the price to \$100 now. This method simply amazing. You don't want to get it leaked, do you? Just create a more detail thread or a new landing page, and sell it in other places, for example Warrior forum and do not sell under \$100. And limit it to about 50 copies or so. I can saw a lot of people listing their key with the same template on Ebay.

To me, i am very lucky to grab your review copy. I know it works because it's working like charm to me ?

S3aXg3R - December 2, 2009, 1:26 am

I'm thinking about buying this, send me a PM please, thank you.

berberetata - December 2, 2009, 4:20 am

What kind of knowledge must we know before buying this guide ?

PyroFR - December 2, 2009, 12:47 pm

Please read the thread before commenting.

destpwns - December 2, 2009, 2:15 pm

Hello, I had read the old thread, and I saw that most people's auctions were getting deleted.

Won't this happen to auctions that I would put up on eBay? I didn't see that topic on the the guide.

PyroFR - December 2, 2009, 2:51 pm

Dest, PM me on VuTales. o_O Posting here is just awkward. I'm David, if you bothered to check the profile, and saw my email was the same.

Anyway, your auctions are deleted if you put up dumb ones, mine never got deleted, they even went through and sold for higher than average.

I added pictures to the guide, Version 1.4 is coming out soon.

Some bastard is reselling this on DigitalPoint for the same price, what an asshole.

Vegetto - December 2, 2009, 3:26 pm

Yeah, that's why I reported him at DP and you should increase the price and limit number of copies.

PyroFR - December 2, 2009, 4:50 pm

Eh, I put a huge watermark over each page using Word, so it should be fine. New version is released, it's still 1.3, but 18 pages long w/pictures.

destpwns - December 2, 2009, 5:12 pm

Oh sorry, you need to get on MSN more.

Vegetto - December 2, 2009, 5:24 pm

I just got 1 sale this morning. Hey, how you get direct download link for the product we want?? I mean the link to give our customer to download.

szabz - December 2, 2009, 6:15 pm

do i use real or fake info for the ebay account?

PyroFR - December 2, 2009, 7:30 pm

I suggest fake if you're only selling, if you also buy stuff, you need your real address so they ship it to ya.

Vegetto - December 4, 2009, 2:09 pm

As of tomorrow, 5th of December, 2009, the price will be bumped up to 100\$. I assume this will kill off most of the sales, and this is because of a few reasons. So buy now if you can.

- 1) People reselling this guide for 5\$ on both HF and other forums, like, what the fuck? Do I need to make individual copies that self destruct after 24 hours?
- 2) People are using stolen pay-pal accounts to pay for this, and 25\$ transactions goes through quickly, while amounts over 50\$ gets detected faster.
- 3) People are basically releasing this guide for free on other forums.
- 4) Method is getting fucking saturated.
- 5) People scamming me daily, it's sad.

You can blame all of the above ^-

Especially craizer25, and some other HF members that bought this with stolen PayPal accounts.

Gtfo if you can't even be honest for the tiniest things. I don't even profit from this, but you guys steal it and sell it for yourselves, it's just absolutely sad.

PyroFR - December 6, 2009, 8:43 am

I never said that either. >_>;

It's just, I have no income if I stop selling my guide, so, nope. I don't use the method anyway, I'm using something else (not right now, because no time), so why would I stop selling? D: Need money for Christmas presents and L4D2 contest FTL.

PyroFR - December 7, 2009, 5:34 pm

Lmao, they're just trolls from other forums who used MSDN to scare people off from selling so they can get more profit.

That's how the entire system works. No one will outright come for selling this, no one knows for certain. Trust me. ;) Even if they have 2k feedback, they could've easily hacked that account.

Heh, that's the way trolls roll.

dude why are you telling people about this again your really fuckin me over lol

destpwns - December 7, 2009, 8:24 pm

this sucks, I should have started earlier :(I got denied. I'm trying again though.

szabz - December 8, 2009, 1:05 am

they havent emailed me back, its been more than three days. am i rejected?

foxzz - December 8, 2009, 1:37 am

very interesting
want know detail...

It's not effing you over, it's a money loophole that Microsoft should patch. You never would've made funds if it wasn't for MSDN in the first place?

So don't take what for granted, I'm not flaming you, but I am not screwing anyone over.

szabz - December 8, 2009, 2:33 pm

got denied and i re-applied

PyroFR - December 9, 2009, 11:46 am

Keep trying! Don't give up hope.

It might be because a lot of people are trying at once, so Microsoft is denying more and more... I think they're onto something.

szabz - December 10, 2009, 4:04 am

when i submit to ebay the listing gets banned after like 30min how do i det around this?

Bedar - December 10, 2009, 9:27 am

I have a Question again:

How often can I activate one key? Only once on one PC?

Because I read somewhere that you can activate it 10 times on 10 machines? Is it true?

Thanks

PyroFR - December 10, 2009, 12:25 pm

You generate 10 keys, each can only be used on one PC. You can deactivate it on that PC then use it again on another machine, or on the same machine (upgrade motherboard, etc).

As for trivium, read the guide section on creating a listing thoroughly. My listings have NEVER been removed, they actually went THROUGH for a higher price than what I sold them instantly via my shop. 100% higher in fact.

PyroFR - December 10, 2009, 5:13 pm

If you bought this and liked it, mind rating it 5 stars? A single person rated it 1.):

szabz - December 10, 2009, 5:29 pm

i get this: There was an error performing the update.

You do not have permission to access this page.

Nah, a single person did it. I rate a thread, and it gets that star base even after I clear all my private data, meaning it's server sided.

Thus, it's really easy to just rate every single thread a star, since there's no "abuse" protection. (:

DYTiMA - December 10, 2009, 7:12 pm

got you up to 2 stars

dryheat360 - December 10, 2009, 7:28 pm

Hey guys. Try buying accounts from various forums for like \$5-\$10 each, thats what I did, and you can make good money using craigslist. Just sell each key and link for like \$20-\$40.

szabz - December 11, 2009, 1:50 am

hmm well i posted an ad on ebay and my account got banned. i cant make a new one because my account is linked to my ip address. if i use a proxy i will jsut probably get banned again.

and for craigslist, i need phone verification.

are there any other options?

n00bz0r - December 11, 2009, 9:11 am

Wow this seems pretty complicated.. Is it worth the effort?

DYTiMA - December 11, 2009, 10:14 am

Yes its worth it I made 50\$ first day, then I needed to reverify my paypal because i got on my paypal on comp with dif I.P. but once I get it back up and working ill be making bank on occasion.

ListenLoud - December 11, 2009, 5:42 pm

hmm im really interested in this? anyway you could lower the price or is 25\$ firm?

PyroFR - December 11, 2009, 6:56 pm

Unfortunately, 25\$ firm. I do take trades however.

PyroFR - December 13, 2009, 7:59 am

Yep, that's what's on so far. Hit the 2k mark recently.

kutugila7395 - December 14, 2009, 2:17 am

now whats with all the deleted thread on ebay? did you help them as in the guide buyer to get the keys sell there?

Vegetto - December 14, 2009, 2:31 am

this method is saturated, ebay will delete all your list. It's getting harder to sell keys. look at his sales, only few sales/day

szabz - December 14, 2009, 2:52 am

i havent sold any yet.. and yeah this method is way too saturated..

alpha24 - December 14, 2009, 3:24 am

this method still working or not? please pm me your msn or Ym id PyroFR

msuper28 - December 14, 2009, 6:24 am

hey PyroFR, now it still work? i think if ebay delete your key, the best way to sell them, can be to open a simple website and advertsite it and get people that buy the keys? it's possible? or microsoft will take down your website? thx

Graff1ti - December 14, 2009, 6:43 am

This can't be used on Ebay cause they even report some users so it's way too risky, also many here are selling those keys for a very low price like 0.5\$ and an MSDN invite for 2\$ so it's useless ... I'am in noway attacking you PyroFR, hope you understand ..

but it's still good for your personal use not for trading ..

BlackSnake - December 14, 2009, 12:09 pm

I'm still waiting the guide :|

Please be online >.<

PyroFR - December 14, 2009, 1:07 pm

Yeah, it's still version 1.3 right now. If you have any suggestions, please make them!

If you're still waiting, please PM me your proof of purchase or something, I sent e-mails now.

@Vegeto, my sales were sporadic because I stopped. If I had continued, I don't use ebay primarily, in listings, put up Windows 7, you'll see some listings with 100s sold at 27\$ a key, even at that low a price, it's 2.7k

Trust me, this ain't saturated at all, you just have to be smart. MILLIONS of people will be upgrading to windows 7, as soon as they see something this cheap, they'll either think it's too good to be true, or get it because it's not that much money anyway. ;)

Also, that's why I said you shouldn't rely on ebay, you should have your own store like <http://www.shop.dervd.com/> or <http://www.dervdshop.com/> <- although I'm still building the second one.

ok then with your guide you can use only the website too and sell in private the keys...
it's good to learn something about seo for get traffic...

ah, i found this msdn list of product on a forum, this is a list what type of keys u will get (i hope that can help people and your business with this e-book PryroFR getting more buyers ?)

<http://pastebin.ca/1680923>

please leave this useful guide-post updated every day i'm interested, but i'm waiting that my father make legit paypal...

i saied today to my father if we could but he saied that he hasn't got much time... coz my sister doing fucking homework and he helped her...?

ok see u later bro!

*srry again bro these websites are your? <http://www.dervdshop.com/prestashop/> and <http://dervd.com/prestashop/> ?

and after 3 years you need to pay 100\$ to bizspark or microsoft for msdn account update?

plz asnwer me thx

PyroFR - December 14, 2009, 2:37 pm

Yep, those websites are mine. david@dervd is my primary email, which redirects to my hotmail anyway.

Also, after 3 years, by then, BizSpark cancels your membership (probably), and you don't pay squat. :)

SPZ - December 14, 2009, 5:52 pm

So now I'm getting issues with eBay too. Is it safe to make an own shop on the internet to sell these keys on?

Won't you/we get reported easily to Microsoft?

And how to make people go visit the shop?

PyroFR - December 14, 2009, 6:17 pm

Look at the vouches section, 400\$ from the website ALONE in a few days!

If you're scared, you shouldn't be doing this in the first place. ./ It's blackhat, there are risks, I'm sorry.

Is it safe? Yes, if you don't make it SEO. Advertise via E-Bay, that's what I did.

immortal8 - December 14, 2009, 8:54 pm

nice tut dude :)

to short

msuper28 - December 15, 2009, 9:06 am

hi again PyroFr if you sell keys on ebay via internet, can u say in ebay that if a guy want to buy a key must contact you via ebay? and then you will not get banned i think so if you say that's legal and not send via mail the key in ebay bid.

PyroFR - December 15, 2009, 9:49 am

No, that'll get you flagged faster than selling counterfeit items.

ZeZul - December 15, 2009, 12:11 pm

ull get flagged like what my friend did lol <https://hackforums.net/showthread.php?tid=205429>

Happens to everyone, screw em, no one's going to your house to sue you. They overprice their OS way too much to give a shit. They will sue if you make a business out of it, but a small dealer on ebay? Pft.

PyroFR - December 18, 2009, 3:58 pm

I need to create a legitimate business.

But I guess even then Microsoft is going to deny me.

N3oP4L4d1uM - December 20, 2009, 12:35 pm

It's almost impossible to sell keys on ebay without getting flagged.
Micro\$oft is watching you !

msuper28 - December 21, 2009, 6:17 am

finally i think that you can only sell keys in forums with the best offers which are 5-7\$...

PyroFR - December 23, 2009, 6:52 pm

I'm done. Fuck this.

People are ruining it for everyone, so fuck it.

dapeamel - December 24, 2009, 3:14 am
