what exploit are you using in the pack?

Would I be able to use a bshades server at my own expense?

Why can't installs last forever?

Because some dicks decides to botkill them would be the main reason, I guess. ???

ALL my bots has framework. great for insomnia bot users!

?y??rion - December 6, 2011, 9:11 am

You have 20% warning, yet people who don't have 0% warning aren't allowed to buy.

Your rules are restricting your sales massively... what fucking difference does it make if the stub is made in vb.net or c++, because in the post above you say all the bots have the framework (of 2.0 and above I'm assuming) so why say that if people are only allowed non .net framework dependent files?

Also, these are definitely not the cheapest installs on HF, you should really do your research before marketing them as that.

LoL bro. The difference is that most of people that has botnet has now insomnia. It is C# bot. And I am saying that my bots are .net

So all my costumers that has any c#/vb6/c++ etc bots will have then all :] learn a bit instead of posting shit. thanks :]

Learn YOUR SHIT

C# uses the .net framework just like VB.net
