Whited00r project has been out for a while now, I used it on my iPod Touch 1G, and it works great,

also it has a good support team and developers as well.

Whitedoor doesn't work on MC models like my iPod is a MC086NF.

I read about this.

Something to do with Copyright Infringement.

Lol!

Who gives?

It's a great fw and you're foolish to not use it.

Yes because MCs are basically 3G's with new bootrom.

Gannicus - November 6, 2011, 12:33 pm

is this ios5 jailbroken for old devices?

Grin - November 6, 2011, 12:58 pm

Its for the people who put in the effort and google it.

I remember blackd00r for 3.1.3 not too long ago.
