Introduction to Remote Administration Tools

A Remote Administration Tool (a RAT) is a piece of software that allows an operator to control a system as if he has physical access to that system. The operator controls the RAT through a network connection. Such tools provide an operator the following capabilities:

Screen/camera capture or image control

File management (download/upload/execute/etc.)

Shell control (from command prompt)

Computer control (power off/on/log off if remote feature is supported)

Registry management (query/add/delete/modify)

Other software product-specific functions

Its primary function is for one computer operator to gain access to remote PCs. One computer will run the "client" software application, while the other computer(s) operate as the "host(s)".

Source from <http://www.wikipedia.com>

Port Forwarding

How do I portforward my router?

Press the Start Button, then select " Run ".

Type in " cmd ".

Type in ipconfig in cmd

Enter the IP from " Default Gateway " into your browser.

Enter your ISP Gateway's credentials and login.

Go to Portforwarding / Firewall Setting.

Enter the port you want into TCP & UDP.

If that doesn't work, click [here](#).

How do I check that I'm portforwarded?

Go [here](#).

Enter the port you want and hit enter.

Check if you're port is openIf it's saying - Timed Out, open your RAT.

If it's saying it's open, you have successfully portforward.

If it says it's connection is refused, you didn't do it correctly.

Crypting

What is Crypting?Crypting is the act of encrypting a binary's file code with an algorithm such as RC4, or the changing of the binary's file signature. If you want to know more about how a crypter works, you can check this thread out - [here](#).

How do I get a crypter?

There's two ways you can get a crypter, either you get it from [here](#) or you buy one from the Marketplace. Before buying any crypters, make sure it's both Scantime and Runtime and it should be Fully Undetectable too.

Exiled™ - November 7, 2011, 3:53 am

Wow mate, this tutorial should be sticked ?

Keep going ?

Falconw0w - November 7, 2011, 3:55 am

A nice thread indeed . Awesome compilation of the TUTs

paulos - November 7, 2011, 3:56 am

Very awesome and HQ thread! Thumps up (-;
- I find the spreading tutorial/methods very usefull :D'

Thanks in advance

rapidfire08 - November 7, 2011, 3:59 am

Mega Thread great bookmarked* thanks to Rats Crew and Zombot :)

SIM-888979 - November 7, 2011, 4:13 am

Thanks for the feedback guys, will update it soon with sexier GFX.

Cybergasm - November 7, 2011, 4:24 am

Great thread keep up the good work.

,Cybergasm

Reported - November 7, 2011, 4:27 am

Awesome thread Zombot ?. When it gets stickied don't be surprised ;).

SIM-888979 - November 7, 2011, 6:04 am

Thanks for the feedback guys, I already posted in Omniscient's thread for requesting a sticky. Hope it gets approved!

smalx - November 7, 2011, 6:17 am

Great thread, thanks! Do you know of any guides that explain exactly what different RAT features do? Options like 'melt' and that type of thing. I know some of them are kind of self explanatory but I'd like to know a bit more about the different functions.

SIM-888979 - November 7, 2011, 7:04 am

Thanks for the feedback! I will improve the thread soon, right now I'm working on something else.

Ariana Grande - November 7, 2011, 7:59 am

I really cannot tell what is better, your thread or your signature.

Predator_Crack - November 7, 2011, 8:00 am

Great TUT zomb.Keep up with that.It seems to me complete, even if you add more later.

SIM-888979 - November 7, 2011, 8:01 am

(Nov 7, 2011 09:00 AM)Predator_Crack Wrote: [\[CITE\]](#) Great TUT zomb.Keep up with that.It seems to me complete, even if you add more later.

I'll be adding more later, such as better GFX and more detailed information.

Krox - November 7, 2011, 8:23 am

very nice compilation of tutorials :) thanks!

CRT - November 7, 2011, 8:41 am

Thank you for giving credits to me. And very nice thread man, good job.

ThinkThinkorThink - November 7, 2011, 8:46 am

This is a very nice thread, thanks for posting! And thanks to Curt for those spreading tutorials.

SIM-888979 - November 7, 2011, 4:32 pm

No problem Curt, it's common sense to give credits to whoever deserves them.

Prokill - November 9, 2011, 7:58 am

great tutorial dude :) Needs a stickie :P

Cyba - November 9, 2011, 8:23 am

This is the most HQ R.A.T thread i have ever seen.

m4dh4ck3r - November 9, 2011, 8:59 am

Nice thread !

Awesome compilation..Should have taken a long time .

I just launched my Java Drive By Gen

Well its not a Generator for now , It has an adminpanel with statistics , server uploader n stuff .

Its 100% Noob friendly , No editing sources :D .

Thread Link :

<https://hackforums.net/showthread.php?tid=1898746>

If you think its worth it add it to the list :)

Il be adding the features of Foxy Java soon :D

SIM-888979 - November 9, 2011, 7:36 pm

Thanks for the feedback guys. I really hope this get stickied by Omniscient because it can really help new comers.

Habs - November 9, 2011, 8:08 pm

(Nov 7, 2011 04:53 AM)rattlesnake™ Wrote: [\[CITE\]](#) Wow mate, this tutorial should be sticked ?

(Nov 9, 2011 09:23 PM)m4dh4ck3r Wrote: [\[CITE\]](#) Do Threads in the Blackhat section get stickied ? o.O

Yep-a-doodle.

If you go inside the " Cybergate RAT " section, you can find a stickied thread by Plutonium.

rinluvr - November 14, 2011, 10:18 am

Thanks for this thread man. Its very detailed so even I can understand. Rah!

xBlackHatx - November 14, 2011, 10:23 am

Awesome Thread!!!

Keep it up Bro!!!

SIM-888979 - November 14, 2011, 5:33 pm

Thanks for the feedback rinluvr and xBlackHatx.

c00ldodo - November 14, 2011, 7:24 pm

it tells operation timed out..Pretty sure i did PFing correctly :s the Rat is also opened with the port being listened. Meh help me please !

used dc 4.2

shebulba32 - November 16, 2011, 7:53 pm

Hands down one of the best TUTs I have found so far! Thanks a ton!

-SaGaR- - November 16, 2011, 8:41 pm

Nice thread mate...ALL IN ONE ...loved it :) ?

SIM-888979 - November 16, 2011, 9:29 pm

Thanks guys, hope this get stickied so more people can see this :D!

Overdose - November 17, 2011, 2:43 pm

Great in depth thread bro. Great contribution from you and The RAT's Crew once again!

SIM-888979 - November 18, 2011, 4:04 am

Thanks for the compliment 1ntruder. I'm planning to release more.

Chloë Grace - November 18, 2011, 6:42 am

Bhump dis up to da top.

Epic thread mate, Good job.

Cosmic Warrior - November 18, 2011, 7:28 am

Hi What shall i write in the "Start Port" And "End Port"? :-)

Also my local IP Address would that be my PC's IP or what will that be? :-)

Hope someone will help a beginner like me ;-)

SIM-888979 - November 18, 2011, 9:06 am

Enter any port you like to porforward into the following.

Cosmic Warrior - November 18, 2011, 1:22 pm

Sry om from denmark so i dont get it :-) the port i need to enter what is it?

Im totally new to this so i need to learn it XD!

SIM-888979 - November 18, 2011, 7:29 pm

(Nov 18, 2011 02:22 PM)AlexanderG183 Wrote: [\[CITE\]](#) Sry om from denmark so i dont get it :-) the port i need to enter what is it?

Introduction to Remote Administration Tools

A Remote Administration Tool (a RAT) is a piece of software that allows an operator to control a system as if he has physical access to that system. The operator controls the RAT through a network connection. Such tools provide an operator the following capabilities:

Screen/camera capture or image control

File management (download/upload/execute/etc.)

Shell control (from command prompt)

Computer control (power off/on/log off if remote feature is supported)

Registry management (query/add/delete/modify)

Other software product-specific functions

Its primary function is for one computer operator to gain access to remote PCs. One computer will run the "client" software application, while the other computer(s) operate as the "host(s)".

Source from <http://www.wikipedia.com>

Port Forwarding

How do I portforward my router?

Press the Start Button, then select " Run ".

Type in " cmd ".

Type in ipconfig in cmd

Enter the IP from " Default Gateway " into your browser.

Enter your ISP Gateway's credentials and login.

Go to Portforwarding / Firewall Setting.

Enter the port you want into TCP & UDP.

If that doesn't work, click [here](#).

How do I check that I'm portforwarded?

Go [here](#).

Enter the port you want and hit enter.

Check if you're port is openIf it's saying - Timed Out, open your RAT.

If it's saying it's open, you have successfully portforward.

If it says it's connection is refused, you didn't do it correctly.

And it just wont work:/ But idk if it shall be mine Local IP Adress or the guy i want to do it on? i thought it was on my own but i really dk? :-)
Netgear is a bad router to use. But it should have UPNP that will automatic forward the ports if you select UPNP on the rat (if it is supported). If your router comes with firewall as well try to disable it.

Good work zombot.

Limeade - December 1, 2011, 12:16 am

Great thread man, very detailed and informative and exactly how it should be!

5/5

flywing12 - January 20, 2012, 7:07 am

Hey guys I am a bit new to RAT. I got cybergate set up with No-IP but if I need to crypt, how can I do so for free?

Why does it cost money to crypt things?

Deruin - January 20, 2012, 12:15 pm

Great thread i needed something like this time to spread!

clalulu00 - January 22, 2012, 3:03 am

Great Job with this thread Zombot. This will be very helpful for all of those who are new to RAtIng.

No problem, irc.

Just posting to get this to the top :D.

Hope somone could PM me with help on this situation.

I need to get some one's gmail pw. I tried to do so much. I got scamemd. I sent a java drive by that turned out the logger was not FUD. The only thing left is to try a RAT but the person will probably not download an exe file.

So I am kinda stuck bc i cant program and I cant build the RAT or port forward it at all.

Was thinking maybe I could get some one to log on to TV and help me do, by help, I mean do it for me...and then i was wondering if it it possible to hide the RAT server in a dropbox link with some pictures i can send to this person

please PM if you can help.
