Thread: [STUPID CUSTOMS - Focal Price - White PowerBeats](#)

:rant start:

So I ordered some stuff from [spam].com and finally got my package. The package came cut open, my knock off 6th gen nano was opened and proolly used till the battery died, and my PowerBeatz package was cut open. Who ever checked them at customs got them dirty as fuck, proolly used them for himself for a day or 2 and they smell like he hotboxxed his car with cigs with them on, they reek!!??? I spent like 20 mins cleaning them before trying them on.

Now on the flipside, these things fit so awesome in my ear and are loud as hell! For Techno and music with bass with 'stabs' and high treble they're the best, but for rap music with long bass notes my \$17 tours are a little better. They had the fastest shipping to my area from out of the 5 places I ordered. Took 2 weeks and none of my other stuff is here yet.

:rant over:

This store is shit. No returns, no customer service and you receive only 3/4 of your orders.

foca-l-price is pretty good actually, I made like \$1000 in 3 weeks via using their dropshipping service (2 months ago).

Can you post some pics of power beats, you bought them for like 8 bucks right ?
