FUCK HF

35million Fucking wanker chars...

Mystic - November 7, 2011, 2:18 am

Another nice theme, Trinity.
Thanks.

Krewella - November 7, 2011, 2:20 am

Truly awesome mate...
10/10 from me...good work

Penthos - November 7, 2011, 2:20 am

Thanks guys Appreciate the kind comments for the ok looking themes i make :)

Makes me feel good and spurs me on, just from your words :P

So thanks to you the community and also thanks to the people who actually bother to reply instead of leach :P (that goes on all threads i see) :P

System[X] - November 7, 2011, 2:20 am

TrinityCoder is an awesome coder, Thanks for the theme bud :)

BreastMilk - November 7, 2011, 2:21 am

Wow.. That looks amazing bro! Congratulations :D

Lol, Thanks boss ^^

I was actually going to offer it to you for your Hack Forums login app, but then i saw you were not going to continue dev on it :(

hav0c1995 - November 7, 2011, 2:48 am

I love this very much. This is so damn sexy!

Rvaveo - November 7, 2011, 2:57 am

Nice theme.Easy on the eyes.Good work

Sm0k3rZz - November 7, 2011, 7:22 am

Nice theme dude! The first HF Theme ho looks great=), Thanks for this Public Theme^^
Sorry for my bad english bro Keep it up

bobolobo - November 7, 2011, 7:48 am

I think that over button and hover should be swaped :) .. but nice theme :)

Ærion - November 7, 2011, 8:57 am

Wow, it's beautiful, good job !

Androcir - November 7, 2011, 10:40 am

really nice theme TC ;D
Kepp them coming, and nice job =)

Penthos - November 7, 2011, 3:32 pm

Thanks to everyone above for all the nice comments it means a lot guys ^^

I'll keep on making them for all :P

Tim Joe - November 7, 2011, 4:28 pm

Kick ass theme bro, Love it Great give back!

M?rLîn - November 7, 2011, 4:31 pm

Wow, great theme. Not to color intensive, I love it!

? lucidity ? - November 7, 2011, 4:41 pm

This looks nice, the diagonal lines on the border was a nice touch, also.

Penthos - November 7, 2011, 4:44 pm

Thanks again everyone for the kind words.. It feels good to know that all my work is not in vain.

I just hope that some of you will use it on your apps :P

And don't be afraid to post the pics in the thread here, i will update the first post with some of your work using my theme :P

Yea i saw it.. its a long story which i have told like 100 times to people already, i'm starting to think i should have a website dedicated to it... ok...

Back in my cracking apps days, i can across this user who i though may be abel to help me learn about crypters.. (the french kid), So we started chatting on MSN, We were both using the "Hack forum Crypter by Cybercrz"

He had made his nearly fud, so i asked him how he did it, and he wanted to know about my assembly changer in my version. So i suggest a swap of sources.. Which he agreed to.. Then the problems started...

He never kept up his end of the bargain, i gave him my source.. he never handed his over... So i got him chatting and he said oh ill send you my crypter to test.. Me knowing full well i was going crack it and fuck the source for trying to fuck me over said yea of course ^^

I then got the crypter decompiled it and said i would share the source on HF for what he did...

He then before i had a chance posted his crypter with full source in this section... as to get me back i guess... That was fine.. All was done in my eyes...

But ever since he cannot let it go...He has posted the same crypter with pics of my sister, mum, calling me all the names under the sun etc, He has been banned so many times, pissed of so many other users...

Bear in mind this has been going on for a Month and a few weeks now...

not to mention he even posted a pic of himself with his todger out (fuck knows y) And started saying things like i like i want to fuck you etc...

At first this was all a joke, but i have had to deal with this ass for a long time now and its getting boring.. Not to mention all the regular password resets i get on most of my accounts....

I really have no time for him.. Any other user i have time and will help this guy will get nothing from me...

And he still dose not get the fact that a ban is a ban, he comes straight back to just flame... lol

Anyway had enough think i'm gonna copy and paste this for the next time :/

Sorry to any other members who have to deal with this guy, he really is a virus...

Penthos - November 7, 2011, 5:21 pm

post deleted.. mods clean up is in progress..

I just hope they don't have to deal with anymore from my resident stalker :/

Ohhh that explains the sister thing.

that kid needs to grow up, i'm dead serious. It's a crypter source. Theres like 500 here that are FUD. I'm serious, and free. You expect to make money off that shit when all of them are free, you'd get no sales anyhow unless you actually coded it right, not using someone else's source. Which he just said you did. You need to stop crying about lame shit like this, get a life. I will be on your ass, and you don't fucking want that, if u keep posting shit about Trinity.

Didn't check the theme yet, does it require the themebase? try importing the themebase he's using.

Yeah I imported the themebase and the actual theme. The button works, but not the actual theme.

Same problem here actually. It's with the Painthook. I need this too, for my own personal use non-release HF App. :)

?eumonic - November 8, 2011, 7:28 pm

Here is the fix guys. Open the theme file and replace the code from ""middle" on down with this.

Code 'middle

```
Dim rect1 As New Rectangle(8, 35, Width - 17, Height - 44)
DrawGradient(Color.FromArgb(51, 51, 51), Color.Black, New Rectangle(9, 35, Width - 18, Height - 45), 90.0F)
G.DrawRectangle(New Pen(New SolidBrush(Color.FromArgb(80, 80, 80))), rect1)
DrawBorders(New Pen(New SolidBrush(Color.FromArgb(71, 71, 71))))
DrawText(Brushes.White, HorizontalAlignment.Left, 11, 10)Really simple fix. Sorry I didn't see it sooner. If anyone has issues, PM me.
```

Sorry for trying to help people. Geez. Calm down.
I asked people to PM me if they had issues changing
YOUR theme with MY quick fix. No need to get all pissy
about it.

Thanks for seeing things my way. All I wanted to do was help people
with a great theme from a great coder. And he tears me down and
goes all hater on me. It just isn't right. :3

Lol chill I never teared you down.... if I did I would of swore etc. I just asked y?

Which I think im allowed? Anyway thanks again. And you know for a fact I respect you..

Catch up soon on msn..

EDIT: Now im back on pc, ill reply properly.

I honestly though you ment pm you about my theme, as i thought why on gods earth would people need help deleting 1 line of code??

And did i go all Hater on you?? NO, i just asked why dude.

I think its just one of those simple case's of missed understood "reading it wrong"

Thanks again..
