Thread: [Free Shell](#)

orunu - November 7, 2011, 1:41 pm

Ok so i shelled a site a while ago, i cant ever portforward so i gave up on rooting it a long time ago, the shell is still alive and well, the site its on has 400+ websites on the same server. if you are a UBER OR LEET MEMBER with a rep of 50+ POST HERE and i will PM you with the link to the shell. If it gets killed, who has two thumbs and is not going to do anything nice for HF for a while ? orunu.

lemme get back to you on that lol needa shut off avast to access the shell since avast thinks shells are viruses lulz

EDIT: uname -a: Linux 2.6.30.1-3.AM_64 #8 SMP Thu Aug 13 10:40:51 UTC 2009 x86_64

i found an exploit for it a while ago but as i said shitty belkin router wont port forward so i couldn't root it :/ only one i've had success with in the past is a netgear one lol

HaxOr? - November 7, 2011, 1:51 pm

Hm my netcat crashes when it connect's to server so i can't do shit. :/

If you want I can try and root it for you, if not never mind I don't need any shells. Your choice, good luck with whatever you decide to do with it.
