Thread: [Make money with one VPS with high visits?](#)

Kirk_sv - November 7, 2011, 3:07 pm

First, excuse my bad English and if this message is in the wrong section, I think not.

A few days ago, I managed to sneak a VPS and load a phpshell.

I managed to get a backdoor access to almost all hosted sites, but i have not been able to achieve root privileges :-(, there are sites with up to 10,000 unique visitors per day. :-)

Is there a way to make money in any way with this?, by adsense or anything else without it being traceable to me and safely? ?

The VPS is in the U.S., and I live outside of this, the law can still reach me?

HaxOr? - November 7, 2011, 3:08 pm

You can sell it.

Find what kernel is, find local root exploit and gain root access.

Find what kernel is, find local root exploit and gain root access.

The kernel is 2.6.18-128.el5 , but I tried this exploit <http://www.exploit-db.com/exploits/10613/> , and it seems the server is patched.

It is the only one I've found for this version.

HaxOr? - November 7, 2011, 3:34 pm

If it's latest (2011) version then you will not find any exploit because it doesn't exist (It's private) :]

uname -a :

```
Linux p2286603.pubip.xx.com 2.6.18-128.el5 #1 SMP Wed Jan 21 10:41:14 EST 2009 x86_64
x86_64 x86_64 GNU/Linux
```

Oh it's 2009.

Look here

<http://tarantula.by.ru/localroot/>

and here

<http://th3-Outl4ws.com/localroot/>

Use bidvertiser.com

It's an ad site, yeah, but it will help you a lot if there are 10k+

Or you could give one to me :)

Kirk_sv - November 8, 2011, 4:53 pm

^ Thanks, I'll look at night .

^ oh, excellent sites! :O, but no exploit works for me, seems to be patched for all :-(

n31ght0 - November 8, 2011, 5:06 pm

how to check the site have 10k visitor ??

Kirk_sv - November 8, 2011, 10:53 pm

(Nov 8, 2011 06:06 PM)n31ght0 Wrote: [\[CITE\]](#) how to check the site have 10k visitor ??

One of the hosted sites it's a forum, the activity list is updated with all members and visitors who have come in the last 2 hours, at that time during the day, the average is 1400 guests + 150 members online.

And at night right now is pointing (01:47 AM) 847 guests + 57 members.

I estimate that total visits in a day are on average 10k.

Kirk_sv - November 13, 2011, 1:31 pm

I finally got the root ?

Now, as might be the price?, itself is very little, really prefer to keep my.
