Thread: [\[2/5\] Red Hat update for kernel](#)

Omniscient - May 2, 2007, 12:12 am

Red Hat has issued an update for the kernel. This fixes some vulnerabilities, which can be exploited by malicious, local users to cause a DoS (Denial of Service) or disclose potentially sensitive information.

Be sure to check if your system is missing security updates or have insecure applications installed:
http://secunia.com/software_inspector/

Feature Overview - The Secunia Software Inspector:

- Detects insecure versions of applications installed
- Verifies that all Microsoft patches are applied
- Assists you in updating your system and applications
- Runs through your browser. No installation or download is required.
