[Z] - November 9, 2011, 6:09 pm

Action Script Viewer 6 (2010 Version Cracked)

This is a pre-cracked version, with the registration files already added. Just simply extract the files and run the 'asv2010' executable file.

What is ASV?

Action Script Viewer (ASV) is a SWF (Flash) decompiler, a Win32 application which mainly:

- Lets you see the actionscripts in SWF (Flash movie) files.
- Lets you extract resources (bitmaps, sounds, videos, fonts etc., also outlines of vector symbols as actionscript or SVG or a JSFL Tool) from SWF files.
- Lets you browse the internals of SWF files while providing information about frames, instance names, symbols, movie clips etc. and a timeline view with context sensitive preview.
- Helps you reconstruct the FLA file for a SWF by exporting SWF resources and a JSFL command.

ASV is a viewer, it does not have editing capability. (Apart from simple editing of movie properties, SWF metadata, adding/modifying the ScriptLimits and FileAttributes Tags and editing certain actionscript constants). ASV is an advanced decompiler, a professional tool for the serious developer.

Background info:

SWF files are Flash movie files, the animation / RIA / multimedia standard of the Internet today, created by Adobe (formerly Macromedia) Flash software (though now many 3rd party applications also have SWF export option) and its format is documented by Adobe (formerly Macromedia).

Reupload this crack please!

Flashpath - November 10, 2016, 8:08 pm

Please reupload ..

Prefixed - November 11, 2016, 8:04 am

I'm sorry that I have to ruin the fun, but.. Cracked programs is not allowed here.

Edit your post and PM admin to avoid ban ?
