Thread: [\[Ultimate\]-----ULTIMATE HACKING TOOLS-----\[Ultimate\]](#)

jacklong97 - November 9, 2011, 6:43 pm

Hello guys, I'm newb in hackforums and right now, i know there're many hackers that need a crypter, binder, keylogger, RAT, Anti-Virus,....etc

Since there're many questions and posts around forum, i'm going to make a post that contains all the tools that you will need(well some i guess) as a hacker

I've been gathering and look for all these tools, if i have time, i'll edit and post a link for direction for each tools if i can

PLEASE GUYS, GIVE SOME COMMENTS, SOME REPUTATIONS AND MAKE THE THREAD ALIVE!!!

--Ultimate Hacker Tools--
SECURITY!!!

Ok guys, as a hacker, you will need security, which are:

1st. proxy and VPN(it hide your IP so they can't detect yours)

I recommend using HotSpot Shield, It's a really good Proxy, not the best but still better than nothing?

[img]http://florence20.typepad.com/.a/6a00d83452a77469e20128779a0c8c970c-320wi[/img]

<http://www.mediafire.com/?pl3cngwr2emri56>

2nd. Key Scambler

It crypt all your key that you type, preventing you from being keylog

[img]http://i2.squidoocdn.com/resize/squidoo_images/250/draft_lens11096291module101552651photo_127430781449528-keyscrambler-premiu[/img]

<http://www.mediafire.com/?lpjlzalv7zdqf1q>

3rd.Anti Virus

Anti-virus prevent you from having virus in your computer
There are many antivirus but the free one i think the best is:

[img]http://tftscdn.nexus404.com/Blog/wp-content/uploads2/2011/09/Microsoft-Security-Essentials-Vista-Windows-7.jpg[/img]

<http://www.microsoft.com/security/pc-security/mse.aspx>

HACKING!!!

1.st Rin Logger

Please, please be a v3(or 4)

Yes!!!Yes it is!!! It been lost in hackforums and now i repost this hope u guys like it!

Well, keylogger simply just say it's a program that allow you to see what the victim is typing, it'll send through your email and you can view it anytime!(pretty cool huh????)

[img]http://image4ever.com/di-A1PQ.gif[/img]

<http://www.mediafire.com/?24aap96be4kuuel>

2nd. CyberGate Rat!!!!

You must seen this around the forum if you are a good searcher!!!

Rat is a powerful tool(really powerful?) that allow you to control victim's computer, yes!! said CONTROL! It allow you to change any files, send any file, delete any process, uninstall any program, keylog, view webcam, remote their desktop,....

INCREDIBLE!!!!

I recommend using CyberGate 'cause it's really popular and powerful

[img]http://img3.xooimage.com/files/4/3/1/screenhunter_01-d...30-22.36-1702e07.jpg[/img]

<http://www.mediafire.com/?fzzccq5pss1xs6b>

3rd.DarkComet Rat

Ok, Darkcomet Rat is just another Rat, there are many different Rat but Darkcomet also my favorite, it has alot of features and stuff

<http://www.mediafire.com/?69kycyc49zfgtuh>

Tools!!!!(really needed)

Ok, all the credits go to ZorG for create these program, i'm just a poster, i also changed its icon so it looks coller than the way it was

1st. Crypter

Crypter is program is help your virus get crypt which mean, the anti virus of your victim will hardly detect your virus, if it's really good, DANG!!! it may never detect!

Many hackers made a virus and send it to the victim, but it didn't get crypt which mean it's not FUD or UD which the anti-virus could detect it, therefore, they won't download it

Here is a great crypter i found on internet, i took about 15 mins to decrypt the password for the link, i remade a new one for free

ZorG Crypter

<http://www.mediafire.com/?h3g0084r9nr4vwa>

2nd. Binder

Ok, binder is a program that bind 2 files together which means, when you complete binding, there will be only 1 file and when you launch that file, 2 files will launch at the same time

This could help with making anti-virus couldn't detect and fake your file, make your victim think, it's real even though he launches it.

ZorG Binder

<http://www.mediafire.com/?4ac48rl74t7ug9l>

Extra: Icon Changer and Assembly Changer

Icon changer changes the file icon

Assembly changer changes its info (version, company name,....)

Icon changer: <http://www.mediafire.com/?h3g0084r9nr4vwa>

Assembly Changer: <http://www.mediafire.com/?k2puaattce15gbs>

Will Update MORE!!! I'm too tired now!!!

There will be more: Registry Mechanic, Bat to Exe, Virus Creator,....

External Hacking Programs and ETC

1st. Batch Virus Generator

It's a program that helps you generate batch commands that you don't need to type and remember

<http://www.mediafire.com/?cb7komqha6ab705>

2nd. Registry Mechanic

Well, this may not relate to hacking but it also fixes your registry, makes your computer run faster, it can also fix some changes that hackers have done to your registry

[img]<http://mydigitalbits.com/wp-content/uploads/2009/10/Registry-Mechanic-free-software-download.jpeg>[/img]

Mr.Incredible - November 9, 2011, 7:27 pm

Thanks for the tools man, highly appreciate it (:

Follow Me - November 9, 2011, 10:41 pm

Good job, pretty good choice of tools.

xXsparrowXx - November 10, 2011, 12:58 am

thank you, I really appreciate it

?

blackeagle_mn - November 10, 2011, 4:42 am

thanks for the great tools... appreciated

mackymouse - November 10, 2011, 4:53 am

sorry to say malware detected Code

<http://www.virustotal.com/url-scan/report.html?id=ff0b8df8bc61bb41f397ddc489b4866c-1320925431>

jacklong97 - November 10, 2011, 3:59 pm

Thnx guys, really appreciate these, I'll work and update more tools if i can on this post

Hapomen22 - November 10, 2011, 5:20 pm

Good HQ post, next time also provide an anubis/virustotal scan so you look legit and start getting reputation. You organized it very well in categories and such. Keep it up!

edit : User is LEGIT, keyscrambler is clean, and the crack works and it works like a charm with Chrome. ?

jacklong97 - November 10, 2011, 6:27 pm

Thanks, i'll post up a virus scan, working on it right now LOL

L34rN2H4x2 - November 10, 2011, 6:51 pm

Th4nks f0r th3 Upl04d, Gr34t t00lz!

jacklong97 - November 10, 2011, 6:55 pm

Well i can't edit it any more, thnx for all the good comments guys, i hope you guys could keep this thread alive and use those well, thnx???

varun_rao - November 10, 2011, 7:29 pm

Can you tell me if we can hack e-mail accounts like gmail, hotmail or yahoo? how can we do that, any good reference?

jacklong97 - November 10, 2011, 8:05 pm

(Nov 10, 2011 08:29 PM)varun_rao Wrote: [\[CITE\]](#) Can you tell me if we can hack e-mail accounts like gmail, hotmail or yahoo? how can we do that, any good reference?Ummm, look, to hack email account, you gotta keylog your victim or use your RAT. I posted on my thread about what it could do, you should check it out. When you created your server, just send it to the one you want to hack(or keylog), if they accept and download it(they have to launch it for your keylog to be install in their system). You've successfully keylog or Rat'ing them. I suggest Rat'ing them because you can take over a whole computer, you also can see the keylog. :))

Good luck, for more info about keylogging and Rat'ing, i'll soon post a thread, I'll pm you for more info.

Good Luck??

Better hide it before some uber sees it. ??? I can't edit...??

venga30 - November 11, 2011, 5:13 am

Awsome Post Dude keep rock it Thanks for ur valuable tools

Kingos - November 11, 2011, 6:08 am

You can't say give me some reputation..

Imperishable - November 11, 2011, 6:41 am

BEWARE!! TROJAN FOUND IN SOME OF THESE TOOLS..

[S][e][x]TM - November 11, 2011, 6:55 am

Nice Win32 back door >_> nuuuub

/gegegegegegegege

jacklong97 - November 11, 2011, 7:49 am

=.= guys, i've been using these tools for a long time, if there are trojans i'm really sorry, since i can't edit anymore, you guys could look it up around the forum. And second, these are hack tools, of course the anti-virus would detect it as a virus o.0. Please don't trash my thread, i just want to make a contribution here. Thanks

Blackice990 - November 11, 2011, 10:29 pm

Thank You you the best

nice tools and stuff

Thatchdog - November 13, 2011, 1:32 pm

The Proxy/VPN has a trojan. Dont download.

Nixel - November 14, 2011, 12:44 am

Bookmarked! Thanks a bunch. I were missing some of these things, so thanks a bunch.

toxicandy - November 16, 2011, 3:46 pm

This has been my favorite thread since i fount these forums.

jacklong97 - November 16, 2011, 4:07 pm

Thanx alot guys

(Nov 13, 2011 02:32 PM)Thatchdog Wrote: [\[CITE\]](#) The Proxy/VPN has a trojan. Dont download. Well, you could try the official website though, i didn't force you to download it from my link. LOL?

420mcGanjaMan - November 16, 2011, 4:16 pm

this is the shittiest thread I've ever read. The tools you posted are second and third rate. they are complete shit.

jacklong97 - November 16, 2011, 4:23 pm

OK... so? these could still be use, it also work really well, don't say it's shit =.=

Wise Owl - November 16, 2011, 4:25 pm

its k i am doing scans on all programs here to check if your legit Report date: 2011-11-17 01:30:51 (GMT 1)

marchy16 - November 16, 2011, 4:44 pm

Nice good tool thanks for the upoload!

isfundysmith - November 16, 2011, 7:55 pm

Yeah!, this are great tools, thanks for the contributions (even though the malware dectected), I considered it minor things, Thanks for the Tools

Cip4rBunni - December 10, 2025, 10:13 pm

thank you appreciate it
