Thread: [Basic Iphone Tutorial \[N00b Friendly\]](#)

ndark14 - November 9, 2011, 10:35 pm

What is your iphone version and baseband ?

Those who are really new to iphone even dont know what is their baseband, which is important thing to know before jailbreaking or unlocking an iphone then this is for you.

How to find your iphone version or baseband ?

From your springboard Go to Settings====>General==>About

Now,you will see something like below

[img]http://alturl.com/k7n2h[/img]

Version = Iphone IOS Version

Modem Firmware = Iphone Baseband

How to add Sources/Repo to Iphone ?

Sources are basicly links. Different sources have have different files apps ets follow below instructions to learn how to add sources.

From your springboard Go to Cydia====>Manage==>Sources

Then you will see something similar to below image.so click on Edit as seen in left image then on Add as seen in right image

[img]http://alturl.com/xoda6[/img]

Now you will see box similar to below image where you will enter your source url and then click on Add source.

[img]http://alturl.com/n23su[/img]

Done !!

How to get paid iphone appstore apps for Free ?

Installous is an cydia apps which contain almost all appstore apps for free.Follow below instruction to get installous on your iphone.

From your springboard Go to Cydia====>Manage====>Edit====>Add

Then enter cydia.hackulo.us as shown below.

[img]http://alturl.com/epi8d[/img]

After adding above source go to search and search for installous and install it

[img]http://alturl.com/934xr[/img]

Now, you will have installous icon on your spring board enjoy free apps.

List of Cydia Sources/Repo

SiNfuL iPhone Repo Address: <http://sinfuliphonerepo.com>

Hackulo.us Repo Address: <http://cydia.hackulo.us>

xSellize Repo Address: <http://cydia.xsellize.com>

Insanelyi Repo Address: <http://repo.insanelyi.com>

iHacksRepo Address: <http://ihacksrepo.com>

HackYouriPhone Address: <http://repo.hackyouriphone.org>

BiteYourApple Address: <http://repo.biteyourapple.net>

iPhoneCake Repo Address: <http://cydia.iphonecake.com>

YourCydiaRepo Address: <http://yourcydiarepo.org>

P0dulo Address: <http://p0dulo.com>

iSpazio Address: <http://ispaziorepository.com>

BigBoss & Planet-iPhones: <http://apt.bigboss.us.com/repo/cydia>

List of some Good Cydia Apps

Installous: It let you download app store apps for free

Winter board: It lets you set wallpaper of your choice

Vwallpaper: It lets you set video as your wallpaper

Cydelete: Let you delete cydia apps directly from your sprinboard

Cycorder: Very useful apps for 2g and 3gs user. It will allow you to record videos.

Androidlock: It will give you lock screen like android.

Thank you for reading, Hope you like my post .

Nice Compilation .

It will look better if you change the colours :D

ndark14 - November 9, 2011, 10:40 pm

thanx but can you tell why images are not seen

Grin - November 10, 2011, 7:34 pm

Oh my god, finally, someone with the basics. Goddamn it!

This needs to be stickied. Or some shit so it's seen. Then people will stop asking dumbass questions.

Good job.

I was hoping someone other than me would make an HQ tut.

No offense to anyone else.

But great job nonetheless ? I will add this to my compilation thread.
