Thread: [Thread Views Glitch](#)

Rvaveo - November 10, 2011, 6:41 am

I can still see the thread views in my User CP.

Methanitiy - November 10, 2011, 6:43 am

I don't think it's a glitch, I think it's supposed to do that.

- Methanitiy

J-Roc - November 10, 2011, 6:52 am

Why do you think that it's a glitch?

Ohya - November 10, 2011, 7:04 am

I think that's how they were before the thread views disappeared and stopped updating.

It's a glitch because Omniscent said he removed all Thread Views.

<http://twitter.com/#!/HackForumsNet/status/134509066981613568>

St. Jiberish - November 10, 2011, 8:16 am

That is it before he removed, he is probably fixing it now.

?ndo - November 10, 2011, 8:48 am

It's not a glitch. Omni forgot to edit the php/html files for UserCP and remove that module that contains the views.

Just PM him and he will fix it.

Rvaveo - November 11, 2011, 1:40 am

Still omni forgot to fix the replies box in Thread Subscriptions With New Posts

Nostre - November 11, 2011, 7:58 am

You can close this thread now, Omni fixed it.

I'm going to have to download another tool. It looks like the same, of course mines doesn't have the views. ?

There you go.Dunno it's still here in my User CP

Glassy - November 11, 2011, 8:58 am

Omni has already fixed this. The only time you might see the views is in the subscribed threads. That will be fixed.

kamz89 - November 11, 2011, 9:20 am

It's not a glitch I can also view it but the view for every thread were reset

50GTB - November 11, 2011, 9:38 am

It's a glitch because Omniscient said he removed all Thread Views.

WTF did he removed it what is the point on that he removed the rating soon you wont be able to make a thread
