Thread: [\[DOWNLOAD\]Cerberus RAT 1.03.4 Beta](#)

TheShadow - November 25, 2009, 9:26 am

Here is the download to the most current version of Cerberus RAT. If it updates again, ill post a new link. This is not infected or backdoored, but ofcourse it will detected because it is a rat creator. This is taken from their main website, i just re uploaded it.

For louloudenfer

Their website is <http://se.curity.org/>

J besoin du Cerberus RAT 1_03_4 BETA commen sa marche et commen l utiliser , svp help

blaze612 - May 8, 2010, 10:14 am

Hey guys im a noob and i have a question, i had cerberus 1.01 beta before and had 1 victim, then i downloaded the new version and when i made a new server and clicked on "update server" and sent him the new server from 1.03.4 i cant see him on the list :\ it sucks because he was my first victim ever and he was sleeping so i couldnt even have fun D:

so is there any way to fix this? :\ or do you guys have any tips on programs people like to dl through youtube vids? i currently have the old server on a fraps keygen vid

alichonez - May 14, 2010, 3:35 am

Hi, Thanks.

I've go t a question, can l crytp it with blackout without disabling it?

Or which crypter can l use.

jinkun - June 5, 2010, 7:12 am

seriously i expected it but still people its a virus

dee23232 - June 18, 2010, 4:49 pm

Guys dont be so fucking stupid,

Its a backdoor creator so obviously it will detect it as a fucking virus!!

Common sense !!

Clear - June 18, 2010, 6:59 pm

If you think it is backdoored do not download seriously you have no idea what you are talking about, GTFO you think anything that says it is a virus is.

DetavnZeBest - July 3, 2010, 2:00 pm

Thanks man ;) I h8 when ppl put up files at Sharecash :S

FaceBookHacker™ - August 22, 2010, 1:59 am

MoonWalker - September 10, 2010, 9:47 pm

thnx for reuploading it bro....

this is a nice rat ;)

The Real Kobe Bryant - September 10, 2010, 11:27 pm

This is a good clean version, i am using it now.

DrVoje - September 11, 2010, 3:19 am

thats good but im still love my cybergate lol :D

r4g3dSkillz - September 11, 2010, 11:15 am

The latest release is Cerberus 1.03.5 Beta. Check the 'official' site.

Cerberus is compatible with XP, Vista, & 7 (32/64).

sk8tr100 - December 3, 2010, 8:19 pm

mhm ceberus prity good rat i have used it in a while tho

404NameNotFound - December 30, 2010, 1:53 am

Thanks, couldn't find this elsewhere. Nice.

M4x Soul - December 30, 2010, 2:09 am

LOL thats the best I ever heard.... How the fuck he can give credit if this is a free tool? And he's only sharing it to us?! Godam kid now these day...

Androcir - February 8, 2011, 12:46 pm

So i notised the AV reports, but is it really a trojan or is it safe for me to use? [/align]

Everyone please forgive my newness here. the uploads link is unavailable but the others work.

I don't know but no matter what I click, I can't seem to get the actual download. Got plenty of offeres to download ilivid though? Anyhow, I have been scowering the internet trying to get another copy of this program. Perhaps mine is corrupted and I had it working before I reinstalled windows.

Okay, here comes the fun part. last night, I got sick of hearing my hardware accelerate, so I opened process hacker (which is a very awesome tool, I suggest it to anyone.) Anyway, I found that it was an instance of service host that was causing it. I was very tired and opened up services and went to disabling all kinds of services that I deemed unnecessary to my daily tasks and lo and behold, my system starts up way faster and is quiet as a mouse! My question is this: does anyone know what services are required to be up and running in order to use cerberus because I get absolutely nothing when I run in accept for a split second hourglass and thats all. I check process hacker and it isn't even listed. Thank you in advance.
