Thread: [Nonjailbroken Equivilant of SbSettings+Icon Harvest. \[](#)

Grin - November 13, 2011, 9:26 am

<http://www.idownloadblog.com/2011/11/11/how-to-create-custom-shortcuts-to-wifi-settings-airplane-mode-and-more-no-jailbreak-required/>

Or

<http://iphonaddict.posterous.com/want-settings-toggles-on-your-iphones-homescr>

The next best thing.

An amazing app that delivers I would say.

A mix of sb settings and icon harvester.

Un jailbroken app. What?!?

Yep.

Thanks for reading.

Shortcuts are here

Yeah, I saw that today, it's amazing.

Thanks for sharing, I needed a video lol.

Grin - November 13, 2011, 9:42 am

No problem I was quite amazed at this myself.

I bet. How can apple approve this application, lol.

danbirk - November 13, 2011, 9:47 am

This is fucking awesome.

Imma do this right now on my iphone, quite nice video.

Thank you OP.

Grin - November 13, 2011, 9:49 am

No problem.

Apple approved of this app because they probably though no one would know their "shortcuts"

And would only use these icons for bookmarking purposes.

Or maybe not.

They think that theyre users is ddumb as fuck :D

Grin - November 13, 2011, 9:53 am

It's Apple without Steve Jobs.

Need I say more?

iRun - November 13, 2011, 2:16 pm

Thanks for this! I just bought the app! :D

Grin - November 13, 2011, 2:18 pm

You bought it?

Aww man...

We have that free app service and you wet and bought the app.
You could've used Installous.
Anyhow...
For those of you who can't find it in Installous.
It's icon project with a space.

iRun - November 13, 2011, 4:40 pm

I am absolutely loving this app! Nice find! :D

Grin - November 13, 2011, 11:46 pm

It would be nice if someone could find the URLs or shortcuts for apps outside settings.
Thanks.

Døn - November 14, 2011, 12:32 am

I saw this video and I thought how did Apple not deny this for knowing there shortcuts were publicly released xD

Grin - November 14, 2011, 2:18 pm

Because Steve Jobs is gone. XD

Who knows? Maybe they wanted to be less strict on people tweaking their device and customising it.
