Adzz

Glad we got the port issues resolved loool!

Powerbeef - November 13, 2011, 11:27 am

I've been waiting for the new CM for so long ?

The old one kicked ass, and i'll happily vouch that CM has only improved; i've already got everything confirmed and set up in barely 10 minutes, plus the coupon's such a huge saver ?

I'm the biggest noob, all I do is test other peoples' stuff, and i've tried a bunch of other RATs but this one's a world apart in terms of ease of use; UPnP is so handy ? plus really awesome interface

This guy's on to something, Choopd was incredible as well :) Thanks dude

Modesty - November 13, 2011, 11:33 am

I'm online now if anyone wants support after buying ^_^

BBall Star - November 13, 2011, 11:37 am

The Coupon/Promo Code provided does not appear to be valid. Please try again.

SIM-611976 - November 13, 2011, 11:41 am

I can advise anyone to buy clientmesh , because this is one of the best things I've been investing my money on HF. And everyone knows how much "crap" also can be found here, so I'm glad about the quality of this product.

PLACEHOLDER FOR COMPLETE REVIEW AFTER I GOT CM 3.0

#cn - November 13, 2011, 11:43 am

FINALLY!! :DDD

Every version of CM is/has been great and I'm sure 3.0 won't disappoint

Also, where can I download?

Modesty - November 13, 2011, 11:43 am

thanks mate. I'll post up a full video and tut for it soon.

SIM-611976 - November 13, 2011, 12:42 pm

Hello,

Im not sure if this is counted as bug (as it happens with other RAT's too)

-If you use the password recovery and it fails, this will terminate the server.
(again I can mention a good persistence would easily go over this =))

but yea, ive just tried this and basically i would have to wait for them to reboot their pc,
as long either that is not fixed or persistence would bring the connection back

Modesty - November 13, 2011, 12:43 pm

Glad we got that sorted out mate :)

Also, the discount won't be on for long so order now guys ^_^

zakazak - November 13, 2011, 4:00 pm

This looks exactly like pixelrat from pixelfrag which was one of the best RAT's when it comes to making & keeping the server.exe FUD but was unstable and buggy like hell.. 1 month later the project was dead.

@edit: The HWID generator from pixelfrag = pixelrat :>

jorje2008 - November 13, 2011, 5:24 pm

Vouch for this awesome product and support. I am extremely satisfied !

The support is very fast and really nice.

Modesty - November 14, 2011, 12:50 am

(Nov 13, 2011 05:00 PM)zakazak Wrote: [\[CITE\]](#) This looks exactly like pixelrat from pixelfrag which was one of the best RAT's when it comes to making & keeping the server.exe FUD but was unstable and buggy like hell.. 1 month later the project was dead.

@edit: The HWID generator from pixelfrag = pixelrat :>

Does this project look dead to you? It's been going for a year you idiot. dot make illogical assumptions.

I'm available for orders guys

zakazak - November 14, 2011, 1:27 am

PixelRat isn't dead? Then I would like to have the new version of it for which I paid 50\$.

Thanks

This thread is one day old. Just checked my folder.. latest PixelRat version was 2.x + DDoS.. lets hope that 3.x isn't as buggy anymore. From what I know the coder said he would code it from

scratch again to fix all problems.

~digital~ - November 14, 2011, 2:00 am

hy Modesty,

nice too see there is a new version out
does this one now include the multithreaded filemanager ?

is v3 still free for your old V2 customers ?

ps: something went wrong with my account, maybe a database bug... my old post are marked as someone else with very bad rep :(
if you don't belive that i'm alain57, i can confirm it on msn ^^

Modesty - November 14, 2011, 2:16 am

(Nov 14, 2011 02:27 AM)zakazak Wrote: [\[CITE\]](#) PixelRat isn't dead? Then I would like to have the new version of it for which I payed 50\$.

This thread is one day old. Just checked my folder.. latest PixelRat version was 2.x + DDoS.. lets hope that 3.x isn't as buggy anymore. From what I know the coder said he would code it from scratch again to fix all problems.Pixelrat was a joint project with a member who sadly died. This is completely different, if you checked my threads then you'd see previous versions of cluentmesh which are several months old, if not a year. This has nothng to do with pixelrat. Check the last clientmesh thread to see what happened to pixelrat. It wasn't my responsibility.

@alain57 ill send you the update when I'm home. And yes, it has the multi threaded file manager.
@ZAKZAK guy Check my threads to see what happended with pixelrat. I was merely a coder and not the manager, but i am offering to give you a discount if you wish as this is now my own projec that i am head of.

Also pixelrat was in 2009. This was started in late 2010

~digital~ - November 14, 2011, 3:38 am

thanks for the fast answer :)

i'll test this version and give you a full feedback like i did on v2 ^^

i hope omni will rescue my old account, cause i feel like a noob with this one (only one good rep, no topics, no pms :()

what is really sad, is that my contributions are marked with an other nickname :(like i never wrote what i wrote :(

zakazak - November 14, 2011, 3:56 am

Is it FUD? That's one thing I loved about the old project PixelRat.. the source code got leaked and even 6-8 months later my servers still were FUD.

Modesty - November 14, 2011, 4:56 am

(Nov 14, 2011 04:56 AM)zakazak Wrote: [\[CITE\]](#) Is it FUD? That's one thing I loved about the old project PixelRat.. the source code got leaked and even 6-8 months later my servers still were FUD. Currenty has 1 detection I believe. Trying my best to remove it atm.

ThinkMe - November 14, 2011, 5:19 am

I'm a v2 user , PMed you and you ignored it .

Modesty - November 14, 2011, 5:26 am

(Nov 14, 2011 06:19 AM)MsAH Wrote: [\[CITE\]](#) I'm a v2 user , PMed you and you ignored it .
I haven't, I've read it and I'm currently in school so can't reply with the download link, im at school and so will do when I'm home. 3 hours left.

~digital~ - November 14, 2011, 8:27 am

honestly, i think people asked for money back, because they :
1: don't want to use a crypter (V2 was FUD when it went out !)
2: don't believe Pyro (sorry i meant modesty) when he said he's working on it

for what i can say : the implemented features worked. Some of them does not works like i was hopping (filemanager could only handle one download at the time in V2)
and the support was great, i MSN Pyro and he created a new version that correct a problem in 5 min !

when i'll receive the download link i'll test it deeply ^^

unfortunatly my current account has not a lot of posts, i already asked the admin if he could restore my old account (for some reason it was deleted and some of my post where merged in an other user account ... maybe a database or a restore failure :() so i know that some people will say that i may be a double account for modesty but this is not the case

Modesty - November 14, 2011, 1:20 pm

(Nov 14, 2011 09:27 AM)alain57 Wrote: [\[CITE\]](#) when i'll receive the download link i'll test it deeply ^^
Pm'd you the download link mate :)

warhacker - November 14, 2011, 1:27 pm

Nice work David. Glad to see you released the RAT.

Vouch

miKee G. - November 14, 2011, 1:41 pm

Received my DL link and my credentials this afternoon, will post here to tell you my though.

Thanks

mrroxi - November 14, 2011, 2:21 pm

I have to say.

I was a v2 user and the v2 although work it did not work very well.

The v3 is epic. He has fixed nearly all the bugs in it> File manager works so well and remote screen. CMD etc all work fine. This works just so much better.

Modesty - November 15, 2011, 12:02 am

thanks for the vouch mate ^_^ . Updated thread with new layout and available for support and quick account creation now.

Just processed and completed all orders, keep em coming guys :)

Buy while discount lasts!

Milopeach - November 15, 2011, 3:57 am

Not going to lie, I've been waiting for this since ALPHA. I think I came in my pants. :O So Keen!

Modesty - November 15, 2011, 11:44 am

Aha thanks for a positive comment mate, always nice to hear :3 I'm available to attend orders now guys so order away :)

Dozix - November 15, 2011, 12:34 pm

Looks awesome.

If only it had thumbs for the filemanager and it would be an instant purchase for me.

Modesty - November 15, 2011, 1:35 pm

(Nov 15, 2011 01:34 PM)Dozix Wrote: [\[CITE\]](#) Looks awesome.

If only it had thumbs for the filemanager and it would be an instant purchase for me.

currently working on reading the thumbs.db file and transferring it over to display thumbnails, i'm getting there! thanks for your interest though :3

mrroxi - November 15, 2011, 1:38 pm

Could you add protection to stop the file from being closed by task manager easily?

Modesty - November 15, 2011, 3:00 pm

(Nov 15, 2011 02:38 PM)mrroxi Wrote: [\[CITE\]](#) Could you add protection to stop the file from being closed by task manager easily?

I had that enabled however it doesn't seem to work on all PCs. But it also has registry persistence as well as a function to prevent DEP from triggering so your client should be safe on next startup. But as I mentioned in the original post I'm currently working on a stronger persistence module.

Dozix - November 15, 2011, 3:07 pm

(Nov 15, 2011 02:35 PM)Modesty Wrote: [\[CITE\]](#) currently working on reading the thumbs.db file and transferring it over to display thumbnails, i'm getting there! thanks for your interest though :3Thats awesome.

Does that work on vista/win7 aswell?

I know thats the way poison ivy does the thumbs, but it only works for xp when using poison ivy.

Modesty - November 15, 2011, 4:31 pm

(Nov 15, 2011 04:07 PM)Dozix Wrote: [\[CITE\]](#) Thats awesome.

Does that work on vista/win7 aswell?

I know thats the way poison ivy does the thumbs, but it only works for xp when using poison ivy. thumbs.db is configured differently for windows 7 and vista, and vista individually uses a different

system but there's no problem for me coding a class that handles all OS's separately and the appropriate method is called based on the OS when thumbnails are requested ^^

MiserAble - November 15, 2011, 5:08 pm

(Nov 15, 2011 01:34 PM)Dozix Wrote: [\[CITE\]](#) Looks awesome.

3 things make me do instant purchase

1- the one you said.

2- database mysql one independent one .

3-and thumbs for webcams/desktops with one click like pi (pi only has desktop also dc) bs has both

Modesty - November 15, 2011, 11:16 pm

(Nov 15, 2011 06:08 PM)MiserAble Wrote: [\[CITE\]](#) 3 things make me do instant purchase

1- the one you said.

2- database mysql one independent one .

3-and thumbs for webcams/desktops with one click like pi (pi only has desktop also dc) bs has both

Those are easy to do so I shall make them as optional features on the next versipn. I often felt that the one click thumbs for webcam and desktop made browsing through clients slower but ill add it in anyway, shoulnt be any problem at all ^^

Expect that in the new version which should be a week away or so, alongside an http panel and offline keylogger, however ill be putting the price back up so is advise to buy now ^^ half day at college today so lots of time to offer support.

SkyRider - November 15, 2011, 11:39 pm

i want to buy this but not paying \$60 as it saying on the site

i will pay the promo price of \$40 pm me ??

Modesty - November 16, 2011, 5:43 am

? so you listen to my old suggest that's pretty cool

ps: is it possible to repair the old clienmesh forum ? it is down, and i have a lot of trouble accessing HF from home, cause either my ISP block HF or HF is blocking my IP ... and i have a fixed IP

Modesty - November 16, 2011, 6:53 am

(Nov 16, 2011 07:47 AM)alain57 Wrote: [\[CITE\]](#) ? so you listen to my old suggest that's pretty cool

ps: is it possible to repair the old clienmesh forum ? it is down, and i have a lot of trouble accessing HF from home, cause either my ISP block HF or HF is blocking my IP ... and i have a fixed IP

I might in the near future however i'll be online on msn if you need me or leave an offline instant message if i'm not on at the time :)

Just got home guys, will be available for support and order now to get your accounts improved instantly!

Currently working on:
Controlling clients online if you can't portforward
Advanced Process persistence
thumbnails in file manager
offline keylogger that sends logs to email/ftp

~digital~ - November 16, 2011, 6:58 am

(Nov 15, 2011 05:31 PM)Modesty Wrote: [\[CITE\]](#) thumbs.db is configured differently for windows 7 and vista, and vista individually uses a different system but there's no problem for me coding a class that handles all OS's separately and the appropriate method is called based on the OS when thumbnails are requested ^^

the good part would also be to add a menu to refresh the .thumbs file when you enter a directory ^^

cause sometimes the .thumbs is old and does not show the latests files

BUT

do not do it automatically

here are some example why:

1: the thumb file will have a newer date, that could be suspect
2: you will have no more trace about deleted files ... here is a pervert example: you open the .thumbs file and find something interesting... like nude or hardcore ... so you mark the slave as potential interesting...) but if the thumbs is auto refreshed, you'll never see the traces of this :(so if you find only boring stuff, you will mark the slave as boring.... whereas it is a slut that hide the stuff ^^)

this could be done with a left click : refresh thumbnails ^^

but well if they are refresh automatically.. it would ne be so bad at all... the main idiea is to see a preview of all pictures the fatest way ^^

ps: some thumbs.db could be 3-4 MB big ... it depends how much files were in the folder... so getting the preview should also be an option, other way some people will say : this rat is slow, the other are faster (sure ... because they don't have this feature)

Modesty - November 16, 2011, 7:07 am

(Nov 16, 2011 07:58 AM)alain57 Wrote: [\[CITE\]](#) long message

Yeah yeah of course, that's what I had in mind to make the thumbnail preview optional and even show the size of thumbs.db first to make sure if the user wants to waste time viewing it.

Got 80% of the HTTP side of it done now so hopefully I'll be releasing a 3.5 update very soon. Price will have to go up though so buy now if you want to save money ^^

oReally - November 16, 2011, 7:08 am

very nice looking rat Would you so happen to need any sales rep's are anything?

~digital~ - November 16, 2011, 7:13 am

i agree with you, with a non existing feature on other RAT, you could indead increase the price ^^

ps: but not for the ones that support you since your begining ^^

by 80% of the http side, you also mean the thumbs decoding ?
what about the thumbs refreshing ?

Modesty - November 16, 2011, 12:48 pm

(Nov 16, 2011 08:13 AM)alain57 Wrote: [\[CITE\]](#) i agree with you, with a non existing feature on other RAT, you could indead increase the price ^^

No No i meant that for the ability to control all clients through a webpanel for those who cannot portforward routers or want to control clients on a mobile device. Totally different feature to thumbnails lol

Just added in a little preview function with quick access buttons ^^ just click on any client and you'll see it. This will be included in the update that will come in a few days ^^ However price will probably go back up to \$50.

miKee G. - November 16, 2011, 2:01 pm

I have to honestly vouch for this guy !!

This product is great, i had a problem cause i didn't put the right setting,

He came 10 minutes after on teamviewer put the right setting and now it work like a charm !!

Support is AWESOME guyz !! Just buy this before he raise the price !!

Modesty - November 16, 2011, 2:31 pm

glad we got the problem sorted buddy! :) Just added a few things to the inbuilt crypter which makes sure the encryption is dynamic each time, further helping keep it FUD for longer.

Methanity - November 16, 2011, 2:38 pm

Would like this, but can't portforward, and I doubt that my router supports UPnP :(

- Methanity

Modesty - November 16, 2011, 11:41 pm

(Nov 16, 2011 03:38 PM)Methanity Wrote: [\[CITE\]](#) Would like this, but can't portforward, and I doubt that my router supports UPnP :(

- Methanity

The next update will allow you to use clientmesh through a web server so all you need is a free hosting package that supports mysql to use the functions so you can opt for that if you want. But bare in mind the price will go up for when i release that so if you're thinking of getting it and wanna make a saving then you can buy now and recieve the update when it comes out ^^
Or you can get a vpn!

Try my free UPNP mapper tool to see if your router supports upnp :3

<http://www.pixelfrag.com/software/uPnP%20Mapper.zip>

may i know the settings that are recommended to use?

Modesty - November 17, 2011, 3:16 pm

(Nov 17, 2011 03:19 PM)Impulse Wrote: [\[CITE\]](#) may i know the settings that are recommended to use?

make sure you've got encryption key and password and identification set - make sure the password and encryption key match what you enter when you start the server (as well as the port obviously).

Make sure port is forwarded ^^

visible mode - up to you

add to startup - yep (unless you're going to use a third party crypther in which case don't tick this)

icon - up to you

encrypt output - up to you, it's slightly buggy when used with the add to startup function (one customer has complained it didn't seem to startup again at restart but others have reported otherwise...i'm currently looking into this but you can give it a go if you wish).

For testing, use local IP when testing on yourself and WAN (external IP) or noip when testing on someone else. Using WAN/NO-IP and testing on yourself will not work.

Impulse - November 17, 2011, 10:24 pm

yup i am aware of all of that :)

thanks for the fast reply more over this is a great product, i personally love the fast cam and screen capture if it ever gets an offline keylogger it would be complete for me :)

Modesty - November 19, 2011, 2:11 am

(Nov 17, 2011 11:24 PM)Impulse Wrote: [\[CITE\]](#) yup i am aware of all of that :)

thanks for the fast reply more over this is a great product, i personally love the fast cam and screen capture if it ever gets an offline keylogger it would be complete for me :)

Thanks for the positive feedback. Offline keylogger in next version hopefully

Impulse - November 19, 2011, 6:24 am

i also seem to get the startup problem, because once my victims disconnect they don't seem to comeback and i know it's not their av.

Modesty - November 19, 2011, 7:57 am

(Nov 19, 2011 07:24 AM)Impulse Wrote: [\[CITE\]](#) i also seem to get the startup problem, because once my victims disconnect they don't seem to comeback and i know it's not their av.

Please refrain from using encrypt output option ^^ I'll try and release an update tonight, if not tomorrow night. Thanks ^_^

Deceptive - November 19, 2011, 8:31 am

Orgasm Orgasm You released it<3 :D

Copenhagen Wintergreen - November 19, 2011, 9:14 am

Looks sick as tits!?!?. I would love to have this but im poor...And I live in a box..And my grammar sucks..

KaptaiN - November 20, 2011, 9:26 am

Two questions?

-Is the built-in crypter actually FUD?

-Can anyone who bought and used this tell me if it's a stable rat?

Diabolic - November 20, 2011, 9:28 am

Does this RAT need port forwarding?

Modesty - November 20, 2011, 1:13 pm

(Nov 20, 2011 10:28 AM)Diabolic Wrote: [\[CITE\]](#) Does this RAT need port forwarding?

Yes it does but if you have a UPNP enabled router then it does it for you

KaptaiN - November 20, 2011, 1:20 pm

(Nov 20, 2011 02:13 PM)Modesty Wrote: [\[CITE\]](#) Yes it does but if you have a UPNP enabled router then it does it for you Can you please reply to my above question about the crypter? Is it FUD?

Modesty - November 20, 2011, 1:50 pm

(Nov 20, 2011 02:20 PM)KaptaiN Wrote: [\[CITE\]](#) Can you please reply to my above question about the crypter? Is it FUD?

Sorry I was on my phone, didn't see it but it currently has 1 detection only and i'm just trying my best atm to fix it ^^ I believe that without the crypter there is also 1 detection only, not too sure about that though but i believe so.

KaptaiN - November 20, 2011, 1:53 pm

(Nov 20, 2011 02:50 PM)Modesty Wrote: [\[CITE\]](#) Sorry I was on my phone, didn't see it but it currently has 1 detection only and i'm just trying my best atm to fix it ^^ I believe that without the crypter there is also 1 detection only, not too sure about that though but i believe so. Ah alright thanks, I'll definitely be buying this as soon as the VPN I ordered arrives.

?

Westcoastcustoms - November 20, 2011, 2:20 pm

what are all the passwords that this can recover?

Modesty - November 20, 2011, 2:23 pm

(Nov 20, 2011 03:20 PM)Ukonvasara Wrote: [\[CITE\]](#) what are all the passwords that this can recover? currently only chrome but I'm adding CD keys for about 300 games atm as well as password recovery for other browsers.

Westcoastcustoms - November 20, 2011, 2:26 pm

oh, id need firefox as well. is it like plugin thats sent to the slave or is it inside the server?

Modesty - November 20, 2011, 2:46 pm

(Nov 20, 2011 03:26 PM)Ukonvasara Wrote: [\[CITE\]](#) oh, id need firefox as well. is it like plugin thats sent to the slave or is it inside the server?

I'll be adding firefox :) and It's inside the server ^^ But a plugin system will be available hopefully on version 4 which will probably be out much later

Loser Douche Bag #35 - November 20, 2011, 2:48 pm

Nice looking RAT. I'm currently building a rat and it will look similar.

Westcoastcustoms - November 20, 2011, 3:03 pm

i think id rather it be in the server. every other rat ive used that uses plugins for pw has basically not worked out for me for some reason.

fcierrek - November 21, 2011, 1:35 am

i think i'll buy it as blackshades is going down, and i wanted to buy it

Exzib - November 21, 2011, 1:54 am

When you add stealers/PW Recovery, i would like to try it for 1 hour. Then ill buy it if it is good.

fcierrek - November 21, 2011, 3:40 am

Just purchased. Can't wait to try it :)

ithmz - November 21, 2011, 7:11 am

It says it got a inbuildt crypter, is it fully fud? =)

dan7123 - November 21, 2011, 8:24 am

I would like to use a run time and scan time cryPter . What crypters work with the rat. Also is thls rat stable.

Modesty - November 21, 2011, 8:32 am

(Nov 21, 2011 09:24 AM)dan7123 Wrote: [\[CITE\]](#) I would like to use a run time and scan time cryPter . What crypters work with the rat. Also is thls rat stable.

Any crypter that supports .NET files will support this RAT :) There's no need for any silly complicated shit like EOF or anything so this RAT should be compatible with nearly every crypter. And it is stable due to the way the clients connect and are kept asynchronously.

(Nov 21, 2011 02:54 AM)Pelipper Wrote: [\[CITE\]](#) When you add stealers/PW Recovery, i would like to try it for 1 hour. Then ill buy it if it is good.

Sorry i don't do any trial periods but you may come on teamviewer and watch it perform.

(Nov 21, 2011 08:11 AM)ithmz Wrote: [\[CITE\]](#) It says it got a inbuildt crypter, is it fully fud? =)It has 1 detection i believe, however i'm currently trying to make it 0 detections.

(Nov 20, 2011 04:03 PM)Ukonvasara Wrote: [\[CITE\]](#) i think id rather it be in the server. every other rat ive used that uses plugins for pw has basically not worked out for me for some reason.

I agree with you but some prefer smaller client files and then just stream over which plugins they want. i think i'll make this an optional feature and have a plug in version of clientmesh that will come with the total product so you can choose ^_ ^

trull - November 21, 2011, 11:30 am

Great looking RAT.

Are you planning to add registry editor?

thanks

Modesty - November 21, 2011, 11:38 am

(Nov 21, 2011 12:30 PM)trull Wrote: [\[CITE\]](#) Great looking RAT.

Are you planning to add registry editor?

thanks

I've just added a registry explorer into the version i'm currently developing, just need to make it able to edit keys and values ^^

samlol123 - November 21, 2011, 6:29 pm

Modesty, can you please reply to my PM about my password?

Thanks.

Modesty - November 22, 2011, 9:44 am

(Nov 21, 2011 07:29 PM)samlol123 Wrote: [\[CITE\]](#) Modesty, can you please reply to my PM about my password?

pm me mate ^_^ discount will be over soon guys so buy buy buy ^_^

I'm also taking in more suggestions guys so reply away :3

KaptaiN - November 22, 2011, 5:44 pm

(Nov 22, 2011 04:29 PM)Modesty Wrote: [\[CITE\]](#) pm me mate ^_^ discount will be over soon guys so buy buy buy ^_^

I'm also taking in more suggestions guys so reply away :3Maybe this is too much to ask for a new RAT, but some sort of DDoSer where you can use your victims to ping a target (I know BS has this).

Also, I've barely ever used RATs before but, if I use the UpNP option since I can't portforward my router, can I still use this from behind a VPN?

Thanks in advance.

Wre©ked - November 23, 2011, 5:49 am

Vouch for this product it works great! Amazing work!!

Modesty - November 23, 2011, 9:11 am

(Nov 22, 2011 06:44 PM)KaptaiN Wrote: [\[CITE\]](#) Maybe this is too much to ask for a new RAT, but some sort of DDoSer where you can use your victims to ping a target (I know BS has this).

Thanks in advance.

You mean "stress testing on a network where you have permission"? ^_^ We do not endorse illegal activity. But I'll consider it for v4. It might be pretty useful!

And If you router supports UPnP then the portmapper will work. If your VPN has open ports then it will work like a charm ^_^

Suggestions are accepted btw.

Exzib - November 23, 2011, 10:41 am

Could you show me the program on TeamViewer? Very interested in buying.

Modesty - November 23, 2011, 10:44 am

(Nov 23, 2011 11:41 AM)Pelipper Wrote: [\[CITE\]](#) Could you show me the program on TeamViewer? Very interested in buying.

Sure thing, i'll pm you details now mate ^^

Exzib - November 23, 2011, 10:58 am

I'm buying it right now, I'll post with a feedback post :)

CaLLMeHZoMM - November 23, 2011, 11:32 am

This RAT looks amazing. I might look into this.

Modesty - November 23, 2011, 1:14 pm

Exzib - November 23, 2011, 1:16 pm

The rat looks amazing, the Builder dosen't work for me but Modesty is very nice and is going to update the builder.

Modesty - November 24, 2011, 10:39 am

(Nov 23, 2011 02:16 PM)Pelipper Wrote: [\[CITE\]](#) The rat looks amazing, the Builder dosen't work for me but Modesty is very nice and is going to update the builder.

Problem solved, the customer's net framework had a defect. If you guys are experiencing problems while building, please reinstall net and make sure you have the file vbc.exe in the net 2 folder.

mrroxi - November 24, 2011, 2:18 pm

Can you send me the update please.

Also username - 1NV1518L3 - PMed me asking for a copy of ClientMesh I don't think he bought it.

Modesty - November 24, 2011, 2:25 pm

(Nov 24, 2011 03:18 PM)mrroxi Wrote: [\[CITE\]](#) Can you send me the update please.

Also username - 1NV1518L3 - PMed me asking for a copy of ClientMesh I don't think he bought it. Pm'd and lol everyone who's genuinly bought it is emailed a download link so he can fuck off ^^

Nazworth - November 24, 2011, 3:01 pm

I will definitely be buying this soon, just have to wait until I get my bank account resolved. Looks very nice btw.

Modesty - November 25, 2011, 4:11 am

(Nov 24, 2011 04:01 PM)Customize Wrote: [\[CITE\]](#) I will definitely be buying this soon, just have to wait until I get my bank account resolved. Looks very nice btw.

Thanks for the positive feedback buddy! Hope you put those icons i showed you earlier to good use ^^

fcierrek - November 25, 2011, 7:35 am

How's progress with my clientmesh thing?

Modesty - November 25, 2011, 7:53 am

(Nov 25, 2011 08:35 AM)fcierrek Wrote: [\[CITE\]](#) How's progress with my clientmesh thing?

Will pm you as soon as i've completed it ^^

Exzib - November 25, 2011, 12:20 pm

Its a good rat, but you really need to make it FUD asap, its AVG that finds it and that a very common AV.

Modesty - November 27, 2011, 3:28 pm

Announcement: It is now FUD. Current users, please log onto CM and read instructions. ^^

(Nov 25, 2011 01:20 PM)Pelipper Wrote: [\[CITE\]](#) Its a good rat, but you really need to make it FUD asap, its AVG that finds it and that a very common AV.

It is FUD now :)

Law - November 27, 2011, 3:44 pm

Wait wait, so this is a RAT that has its own built in crypter?

Thus meaning you dont need to buy a crypter?

KaptaiN - November 27, 2011, 3:46 pm

(Nov 27, 2011 04:44 PM)Law Wrote: [\[CITE\]](#) Wait wait, so this is a RAT that has its own built in crypter?

Thus meaning you dont need to buy a crypter?Yup, and so far it's still 100% FUD.

Modesty - November 28, 2011, 8:29 am

(Nov 27, 2011 04:46 PM)KaptaiN Wrote: [\[CITE\]](#) Yup, and so far it's still 100% FUD.

I should be revising the encrypt output option today so you'll all have a new system for a FUD output.

Exzib - November 28, 2011, 8:37 am

This is a great RAT. :D

I'm selling my liscence for 35\$, cause i need money for a IRC bot.

If anyone is interested PM me.

Modesty - November 28, 2011, 2:17 pm

Just working on a registry editor and offline keylogger atm guys ^_^

(Nov 28, 2011 03:30 PM)Coding4Noobs Wrote: [\[CITE\]](#) sounds like fun xD do you have skype i wanna talk to you about something...

msn? d7m@hotmail.co.uk

Coding4Noobs - November 28, 2011, 2:34 pm

ugh MSN sucks lol owell =P

this was to post... true story

Modesty - November 29, 2011, 2:26 pm

quick revision of remote desktop (it can now save frames at a specified interval):

Spoiler [\(Click to View\)](#)

(bar at the top is retractable):

Spoiler [\(Click to View\)](#)

Another new feature: ability to select a number of clients and view all their screens at the same time. Here i've only got one client selected however when i have access to multiple PC's i'll have an updated image but you can see it here with just one client:

Spoiler [\(Click to View\)](#)

If you want to see what it's like with many clients, you can see how it was done in v2.0:Spoiler [\(Click to View\)](#)

I'll be releasing a quick update tonight guys :)

Coding4Noobs - November 29, 2011, 2:46 pm

looks nice... dont forget about what i was talkin about...

Modesty - November 30, 2011, 12:13 am

Alright the update for v3.2 is out guys! Same dl link :3

Last day of discout today, I'm removig it when i go to sleep :)

MiserAble - November 30, 2011, 2:16 am

only desktop screenshots, can you add webcam to it? so it will be (webcam/desktop)

thanx

Modesty - November 30, 2011, 3:08 am

(Nov 30, 2011 03:16 AM)MiserAble Wrote: [\[CITE\]](#) only desktop screenshots, can you add webcam to it? so it will be (webcam/desktop)

thanx

yep sorry ill add the frame saving feature to webcam too, forgot last night >.<

MiserAble - November 30, 2011, 3:24 am

(Nov 30, 2011 04:08 AM)Modesty Wrote: [\[CITE\]](#) yep sorry ill add the frame saving feature to webcam too, forgot last night >.<

yeah and i meant webcam like this

<http://www.clientmesh.com/images/app/9a.png>

Modesty - November 30, 2011, 4:46 pm

<http://www.clientmesh.com/images/app/9a.png>

Oh i see! Quite clever, I shall implment that :)

If anyone has any issues with 3.2, please pm me.

Red Army - December 1, 2011, 3:32 am

Purchased last night just waiting for a fix for creating the server, seems like a decent RAT though.

(Dec 1, 2011 04:53 AM)Sovereign Wrote: [\[CITE\]](#) This looks awesome. Am fed up with blackshades being a piece of shit.

Will be buying tomorrow morning definitely.

-Sov

Exactly why I bought it, I have had Shades since May, it has gone utter fucking shite now. Joke of a product.

Hope ClientMesh will be good, shame I can't build at the moment though :/

Chaos Theory - December 1, 2011, 3:53 am

This looks awesome. Am fed up with blackshades being a piece of shit.

Will be buying tomorrow morning definitely.

-Sov

Modesty - December 1, 2011, 12:03 pm

@Red Army I'll be with you soon!.

If you guys have any questions, feel free to ask :)

p.s. i'll be removing the discount in a sec ^_^

just sorted problem with @red army. Just a note guys, make sure if you use a icon, you use a valid .ico file, not like a png renamed to .ico ^_^

fcierrek - December 1, 2011, 1:35 pm

Modesty i don't use icon and have the same problem :)

mbro - December 1, 2011, 4:28 pm

Wow this looks really nice. The GUI is very simple and laid out, yet looks advanced and professional. I might buy this someday

Red Army - December 1, 2011, 4:46 pm

Great RAT, GUI is awesome too.

Ran it on myself, seemed a little sluggish but just gonna put that down to cos it's on the same machine.

Looking forward to future updates and hopefully a few more fun features and webcam record ;)

Overall brilliant RAT though.

Modesty - December 2, 2011, 11:06 am

(Dec 1, 2011 05:46 PM)Red Army Wrote: [\[CITE\]](#) Great RAT, GUI is awesome too.

Whats included in 4.0?? Please let us know, thanks again.

hannez - December 7, 2011, 1:41 pm

i use this wonderful RAT too
there is still an update function on it
i can easilly update via client ?

Modesty - December 8, 2011, 2:32 pm

@hannez: you can perform a mass update or single update on each client.
If you mean will you be able to get the full new clientmesh4.0, you will be given instructions on how to update when 4.0 is out.

(Dec 7, 2011 02:31 PM)Khornet Wrote: [\[CITE\]](#) Whats included in 4.0?? Please let us know, thanks again.

- offline keylogger
- registry manager
- ability to view all webcams at once in the thumbnail form
- upload function in file manager
- optimised connection engine
- faster remote desktop (it's already pretty fast atm)
- console to use text commands to perform many of the actions easiliy and quickly
- noip updater
- bot killer
- process persistance.

4.0 will also have an online webpanel from where you can manage your clients ^_^

Registry Explorer Update:

[img]http://choopd.com/?h=a7c7f1e5d979636e3c4a74add88a3b73[/img]

Dozix - December 8, 2011, 2:46 pm

Looks awesome. Will the thumbs in the fileexplorer be in 4.0?
Also do you accept paypal directly? That payment gateway adds 25% tax.

Modesty - December 8, 2011, 3:33 pm

I'll try. i think I'll quit the idea of reading thumbs.db and actually make my own thumbnails and send them over, shouldn't be too difficult. Of course it'll be possible to disable/enable thumbnails whenever you want :3

And uhh I don't but I'll see if i can make a coupon to work around that for you D:

echapp - December 8, 2011, 8:30 pm

Is there a built in Crypter here in Client Mesh?

~digital~ - December 9, 2011, 12:50 am

Okay hmm.

I prefer to run RAT software on a VPS just because my main computer is a Mac and I can access it anywhere in the world using Remote Desktop Connection. Also this way I don't have to mess with nasty port forwarding etc since all ports are open.

Lets say my VPS provider were to go out of business or change servers, would you reissue my license to be used on a new HWID?

Modesty - December 11, 2011, 3:11 pm

i'll update it as soon as it gains a detection. 4.0 Will have polymorphic outputs so that if you get a detection, you just rebuild your client and it will be FUD again :3 But that will be in 4.0 which I'm hoping to release in a few days max as i want to make it just perfect.

Also the current inbuilt crypter uses a concept that no other crypter on HF uses so that's also an advantage.

Quick screeny of 4.0 progress so far:

so you did it, integrated thumbnails of pictures ;) i like it, i hope to have that new version soon

Really BIG BIG VOUCH ?

ps: i guess you use thumbs.db right ?
did you find a way to refresh the thumbnail file ?
some times, the preview in there, is not up to date, and that would be a very good feature
you the directory, refresh the thumbnails and see directly if there is interesting content or not,
without using a lot of connection ;)

Modesty - December 12, 2011, 6:09 am

(Dec 12, 2011 02:52 AM)alain57 Wrote: [\[CITE\]](#) so you did it, integrated thumbnails of pictures ;) i like it, i hope to have that new version soon

Nope, I make thumbnails on my own and send them over so it will always be up to date. And if you
tick show thumbnails and refresh directory it will then show the thumbnails so you can choose when
you want thumbs and when you dont :3

~digital~ - December 12, 2011, 8:01 am

do you also do include some sort of cache system ?
i mean

- 1: open a folder with 500 pictures (or more)
- 2: generate a thumbnail send to the RAT
- 3: show the thumbnails (cool)
- 4: change directory
- 5: do other stuff
- 6: come back in directory of the first stepp
- 7: see the thumbnails without having to regenerate them, and without needing to redownload the thumbnail..

this could be done that way:

- 1: you save the thumbnail data (local or remote)
REMOTE: it is cleaner and easier, but this could be used by AV to say : your infected by clientmesh
:(

LOCAL : more complicated, because you have to handle multiple files for multiple victims ... An
easy way is to save it in a structure that has the victim computer-name/folders/subfolder/cache_file

- 2: when the user enter a directory, the server (who know the file list) store the most recent creation
date. If it is the same as the cache simply open the cache
if it is different, generate the cache (it should of course contains the last creation date)

of course this could also be done with modification date.... i don't know what is the best to use

this way you save connection (only need to transfer the new thumbnails if needed)

and the remote victim, does not have his hard drive/CPU who begin to work all the time for nothing (suspicious)

Modesty - December 12, 2011, 9:32 am

The thumbnail system isn't cpu intensive at all, it just makes YOUR file browsing experience a little slower. However, I can implement a primitive cache system for now that doesn't check for modification dates, instead you can refresh your cache whenever you want or even turn cache off.

Das Auto - December 12, 2011, 9:58 am

Mine still isnt activated. I didnt get any email.

Octac0n - December 12, 2011, 10:00 am

Okay, I ordered it yesterday afternoon and was hoping to be able to use it when I wake up.

Modesty - December 12, 2011, 12:40 pm

(Dec 12, 2011 11:10 AM)freedom 4 All Wrote: [\[CITE\]](#) Okay, I ordered it yesterday afternoon and was hoping to be able to use it when I wake up.

there's a 24 hour period due to time differences, I'm based in the UK.

btw i'm willing to take in any more quick suggestions for 4.0 before i release it!

Dozix - December 12, 2011, 12:46 pm

Some of these might already exist as i havnt played around with it yet, but ill throw some in the air anyways.

Copy/cut + paste in the filemanager

Resumeable uploads/downloads.

Folder surveillance (copies any new files added in the folder being watched to a folder that the user specifies)

Thats what i could think of right now.

Red Army - December 12, 2011, 1:51 pm

Anyone else have problems when you try to get passwords or load a cam then the person just disconnects? Now I don't know if this is just the RAT not refreshing and they have already gone offline and when I try to do one of those actions it realises they have already DC'd or if it's those actions triggering the DC.

Modesty - December 12, 2011, 1:56 pm

(Dec 12, 2011 02:51 PM)Red Army Wrote: [\[CITE\]](#) Anyone else have problems when you try to get passwords or load a cam then the person just disconnects? I realised this and fixed it. Problem is that the exceptions in sockets weren't being handled specifically enough so it thought it was a disconnection when it was just a slight corruption in data, but i've just fixed that :D Unless the client is physically closed or crashes and exits, it keeps the connection no matter what. Fix will be released with 4.0. Nearly done :D :D so excited!

(Dec 12, 2011 01:46 PM)Dozix Wrote: [\[CITE\]](#) Some of these might already exist as i havnt played around with it yet, but ill throw some in the air anyways.

P.S. I too admire your excitement over the project. It's enticing for a customer ;)

Keeping it FUD is pretty easy since everything is coded from scratch so no public sources that could be detected elsewhere and I have about 2-3 years experience in this field.

If you follow the instructions on the welcome message then you'll get a FUD output. If you just make a raw build with minimal settings and nothing like changing assembly info or changing the icon then it is 2/35

~digital~ - December 13, 2011, 2:10 am

(Dec 12, 2011 01:40 PM)Modesty Wrote: [\[CITE\]](#) btw i'm willing to take in any more quick suggestions for 4.0 before i release it!

maybe using the victim as http proxy ?
or some kind of DoS system

but really, these are just suggestions, you already added some interesting stuff, to have a v4 :)
i can't wait to test it...

just hope this release will work on my mac VM :)

hannez - December 13, 2011, 2:52 am

i am waiting for the new release
please hurry up guy

Red Army - December 13, 2011, 5:58 am

Quick suggestion for the keylogger: Set specific words for it to look out for and auto log and save them in a folder for example "Login" that way i will save any login details or "Runescape"

~digital~ - December 13, 2011, 6:17 am

i don't know if it is in (i never succeed testing V3+)
but for the keylogger, it would be good if the window name (or tab name) is included

for example i type : hi dude in msn, then i switch to my facebook chat page and i say this to my girlfriend : I love you

it would be nice to see

Windows Live Messenger David : Hi Dude
Google Chrome Facebook : I love you

without it i would see
Hi Dude I love you... this can be strange ^^

Modesty - December 13, 2011, 7:50 am

(Dec 13, 2011 07:17 AM)alain57 Wrote: [\[CITE\]](#) i don't know if it is in (i never succeed testing V3+)
but for the keylogger, it would be good if the window name (or tab name) is included

for example i type : hi dude in msn, then i switch to my facebook chat page and i say this to my girlfriend : I love you

it would be nice to see

Windows Live Messenger David : Hi Dude
Google Chrome Facebook : I love you

without it i would see
Hi Dude I love you... this can be strange ^^
It already logs window title :)

@red army: suggestion noted

JasonFlinn - December 13, 2011, 7:51 am

I've been told it doesn't come equipped with an offline logger o.O
If it it doesn't, my suggestion would be to definitely add one :D

cool, what about dependencies? does the output have any?
I see on the website a requirement is .netframework 3.5
is that just for the client or the server output too?

Modesty - December 13, 2011, 2:37 pm

Just fixing up the offline keylogger guys, will release it as soon as that's done.

(Dec 13, 2011 01:31 PM)4:20 Wrote: [\[CITE\]](#) cool, what about dependencies? does the output have any?

I see on the website a requirement is .netframework 3.5

is that just for the client or the server output too?

the client (which you spread) only requires 2.0

the server (which you run) only requires 2.0 as well (3.5 was for old 2.x versions)

bozon - December 13, 2011, 3:03 pm

(Dec 13, 2011 03:37 PM)Modesty Wrote: [\[CITE\]](#) Just fixing up the offline keylogger guys, will release it as soon as that's done.

the client (which you spread) only requires 2.0

the server (which you run) only requires 2.0 as well (3.5 was for old 2.x versions)oh looks like I got the client and server mixed up lol I thought the client was what you use to control and server is what you spread.

but thanks for the answer, If it had no dependencies I would buy it for sure. still might get it though..

pr3fix - December 13, 2011, 3:06 pm

(Dec 13, 2011 04:03 PM)4:20 Wrote: [\[CITE\]](#) oh looks like I got the client and server mixed up lol I thought the client was what you use to control and server is what you spread.

but thanks for the answer, If it had no dependencies I would buy it for sure. still might get it though..

Well server could also be the file that you spread, depending on the way that Client and Server connects.

Modesty - December 13, 2011, 3:37 pm

Hey guys, welcome to 4.0

New features:

- website visitor
- offline keylogger (beta, i do not guarantee 100% stability for this but it should work fine :))
- thumbnail view in file manager (also in beta. It works well, however after navigating to a directory where thumbnails are shown, if you choose to go into another directory, you'll have to refresh a few times (press refresh button) before it will show the contents. Just a bug I'm trying to iron out atm. If you do not like the thumbnail feature, just untick (show thumbnails)
- faster remote desktop
- revised connection engine
- fixed major bug with xp systems
- fixed bug of not recognizing win 7
- registry explorer (creating and modifying keys in next version)
- startup objects (remove objects from startup)
- CONSOLE - whole new experience. Navigate through clientmesh like you have never before.

More on this soon!

- more updates that I have added but forgotten to mention, you'll see these.

quick screenie:

Spoiler ([Click to View](#))

[img]http://i.minus.com/iUB5G5FJSa7Ee.png[/img]

(Dec 13, 2011 04:06 PM)pr3fix Wrote: [\[CITE\]](#) Well server could also be the file that you spread,

depending on the way that Client and Server connects.

It's reverse connection so many clients connect to the server (You). Much like visiting a website, you're the client, accessing the server (web server)

(Dec 13, 2011 04:03 PM)4:20 Wrote: [\[CITE\]](#) oh looks like I got the client and server mixed up lol I thought the client was what you use to control and server is what you spread.

but thanks for the answer, If it had no dependencies I would buy it for sure. still might get it though..

No worries, it's just an old mistake from the times when the whole thing was mirrored and you'd need the person you're controlling to be portforwarded and all. But now stuff's different, only you need to portforward and you can control many clients ^_^

JasonFlinn - December 13, 2011, 4:12 pm

(Dec 13, 2011 04:37 PM)Modesty Wrote: [\[CITE\]](#) Hey guys, welcome to 4.0

Congrats man!

Looks like a lot of great features!

Modesty - December 13, 2011, 11:53 pm

If anyone is encountering anything, please pm me and a fix will be available in 6 hours but afaik no fix is needed atm!

~digital~ - December 14, 2011, 3:45 am

here is my fast suggestion for v4.0.1

- 1: the splashscreen says 3.2, the login screen 4.0
- 2: the server options like password and port are not stored, even if i click on save ..
- 3: the information screen should be shown once, or at least the same message should only be seen once ... seeing at each start that there is a V4 i already uses, is not user friendly ^^
- 4: auto update, this could be easy, your zip file is always at the same download folder, you just need to check for a file for example www.yoursite.com/version is the version differs, download the latest zip and install it automatically ^^

5: i would have test it deeper, but for some reason it did not work

i infected myself

i open the control panel of myself

and i get this (sorry french)

Débogage JIT

Pour activer le débogage juste-à-temps (JIT), le fichier de configuration pour cette application ou cet ordinateur (machine.config) doit avoir la valeur jitDebugging définie dans la section system.windows.forms. L'application doit également être compilée avec le débogage activé.

Par exemple :

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

Lorsque le débogage juste-à-temps est activé, les exceptions non gérées seront envoyées au débogueur JIT inscrit sur l'ordinateur plutôt que d'être gérées par cette boîte de dialogue.

of course i will test it further

I've used BS since May, it was a great RAT but the lack of updates and cheek from staff members is appalling (I got accused of being the one ddos'ing them because I posted in the thread saying I wasn't happy after being a loyal customer for so long and getting ignored by support to get my hwid

sorted)

So honestly I would go with ClientMesh, I presume CG is CyberGate, not used that in years so I wouldn't know much about a recent version.

CM has a dedicated coder, some unique features and it's very fast with a great layout. Once more stealers are added this RAT will easily be the best on the market. (Saying that the stealers on Shades are pretty piss poor the last time I used it)

Modesty - December 14, 2011, 2:12 pm

(Dec 14, 2011 03:12 PM)Modesty Wrote: [\[CITE\]](#) ^Thanks mate! Taking in suggestions for the next version peeps :3

I have one suggestion for you, that I think is very important, make sure every single feature is stable before you add additional features. At this point I would say ClientMesh has a pretty good foundation. So improving the stability is key for future success.

BTW: Really liked the new update, keep it up ?

Modesty - December 14, 2011, 2:55 pm

Haha yes you can just press enter instead of pressing go!

Let me know if you have any more questions :3

JasonFlinn - December 14, 2011, 4:05 pm

Hey Modesty,

I sent you a PM. but if you could add me on msn, that'd be great:

justin.fcb@live.com

Modesty - December 15, 2011, 10:27 am

Back home now, purchase for instant activation!

JasonFlinn - December 15, 2011, 11:34 am

I definitely vouch for Modesty.

I had a problem with the RAT. Turned out it was nothing.

But he went over team viewer with me and ran a couple of different tests just to make sure everything was in check.

Great seller.

Best of luck with all your future sales man.

-Flinn

Modesty - December 15, 2011, 2:44 pm

Cheers mate, i'm glad we got it sorted hehe ^_^

samlol123 - December 15, 2011, 3:25 pm

Modesty, few suggestions.

Downloading files doesn't work properly, it just says a error has occured, maybe because a data port isnt being defined like in previous versions?

Also it would be nice to be able to upload files to that directory.

A hosts file editor would also be sweet.

Modesty - December 15, 2011, 3:40 pm

Hmm there isn't need for a data port, everything is done on one port but ill check it out for you, most customers aren't facing problms with this o.o and yes your other suggestions are noted :3

samlol123 - December 15, 2011, 3:57 pm

(Dec 15, 2011 04:40 PM)Modesty Wrote: [\[CITE\]](#) Hmm there isn't need for a data port, everything is done on one port but ill check it out for you, most customers aren't facing problms with this o.o and yes your other suggestions are noted :3

Okay, just wasn't letting me download anything and saying a error has occured.

Modesty - December 16, 2011, 7:33 am

35charsbleh

ahahah no way but hopefully some new, more innovative features as always ^_^

JasonFlinn - December 16, 2011, 9:10 pm

I'm not bashing on your RAT Modesty.

But I have to ask; when ClientMesh's crypter isn't FUD (which I'm sure it normally is). what are you guys using as an alternative?

Thanks :D

Modesty - December 17, 2011, 2:36 am

(Dec 16, 2011 10:10 PM)JasonFlinn Wrote: [\[CITE\]](#) I'm not bashing on your RAT Modesty.

But I have to ask; when ClientMesh's crypter isn't FUD (which I'm sure it normally is). what are you guys using as an alternative?

Thanks :D

You can use any crypter that supports .NET. DON'T tick encrypt output when building and it will be a raw, fresh assembly that hasn't been obfuscated/rypted and doesn't require any EOF support. If a crypter supports .NET then it will support ClientMesh :)

hannez - December 17, 2011, 10:12 am

i think the new version is more unstable than the older one
the client is always crashing if i try to use it for more than 5 minutes
the settings (password, enc key and port) can not be saved (bug)

but anyway it is a great RAT

Modesty - December 17, 2011, 10:16 am

(Dec 17, 2011 11:12 AM)hannez Wrote: [\[CITE\]](#) i think the new version is more unstable than the older one

the client is always crashing if i try to use it for more than 5 minutes
the settings (password, enc key and port) can not be saved (bug)

but anyway it is a great RAT

are you sure? Make sure you're closing all windows when not in use, don't have like a billion transfers taking place at the same time and etc :3 I'll make a low CPU version for those who have PCs that perform less well :3

hannez - December 17, 2011, 10:23 am

yes it works great for me but there are some problems i think
you should know that there is a small bug with saving the port/password/enc key details
do you know it ?

sorry for my bad german school english

but anyway i have to say that this one is a really good remote admin tool

Modesty - December 17, 2011, 2:05 pm

Yes i just discovered that bug a day ago, I'm sorry and it's been fixed for 4.1!!

Euphorique - December 17, 2011, 6:33 pm

I have a question before buy it, i'm force use your crypter or i can disable it ?

JasonFlinn - December 17, 2011, 8:31 pm

(Dec 17, 2011 07:33 PM)Euphorique Wrote: [\[CITE\]](#) I have a question before buy it, i'm force use your crypter or i can disable it ?

You can disable it. There is a check box in the server building process that if checked, crypts with the built in crypter.

So if it's unchecked, obviously, it's not crypted :)

Hope I helped.

-Flinn

Modesty - December 18, 2011, 9:45 am

I've just FUD'd the inbuilt crypter, it will be out in a few hours.

(Dec 17, 2011 07:33 PM)Euphorique Wrote: [\[CITE\]](#) I have a question before buy it, i'm force use your crypter or i can disable it ?

Yes that is correct JasonFlinn, the crypter is optional, you just need to untick "encrypt output" and the crypter will be disabled so you can crypt with any other crypter that supports .NET.

JasonFlinn - December 18, 2011, 10:10 am

(Dec 18, 2011 10:45 AM)Modesty Wrote: [\[CITE\]](#) I've just FUD'd the inbuilt crypter, it will be out in a few hours.

Yes that is correct JasonFlinn, the crypter is optional, you just need to untick "encrypt output" and the crypter will be disabled so you can crypt with any other crypter that supports .NET.

I look forward too the crypter update!! :D :D

Modesty - December 18, 2011, 11:04 am

Will release it as soon as i've perfected it, the crypter system will be slightly different now, a bit more easier to use/understand.

Olympia - December 18, 2011, 11:46 am

Vouch for Modesty, come on my PC and set this up for me..works great!

Also great price and shits all over blackshades.

Thankyou very much

Would also like to add the support it incredible, buy at this great price!

noskire - December 18, 2011, 11:57 am

Hey if I'm using iCrypt Gold to crypt my server, do I need to check "enable installation" when creating the server IF I check to "melt" it when crypting with iCrypt?

Old Days - December 18, 2011, 12:17 pm

Does ClientMesh have bot and anti-bot killers?

Does it have other GUI/themes with any deep color in background? As like the black color of blackshades and deep red color of Xstream Rat.

Modesty - December 18, 2011, 12:58 pm

(Dec 18, 2011 12:57 PM)noskire Wrote: [\[CITE\]](#) Hey if I'm using iCrypt Gold to crypt my server, do I need to check "enable installation" when creating the server IF I check to "melt" it when crypting with iCrypt?

No, make sure all those startup settings and such are ticked on icrypt

(Dec 18, 2011 01:17 PM)Old Days Wrote: [\[CITE\]](#) Does ClientMesh have bot and anti-bot killers?

Does it have other GUI/themes with any deep color in background? As like the black color of blackshades and deep red color of Xstream Rat.

Yes it does.

I'm currently working on a way to skin it by just using windows themes (.msstyles) files so you can choose any theme you want ^^ if you have a suggestion for a different gui, lemme know!

DEMó??c xO?aTâ - December 18, 2011, 4:21 pm

Hey Modesty!

Just wanted to leave some kind words from a satisfied customer. The ClientMesh RAT is working really good for me. Your dedication to the project is amazing, thank you for a nice product. Keep up the good work!

Modesty - December 18, 2011, 6:46 pm

Thanks for the vouch Mate. Still open for sales guys, purchase for instant actication ^^

~digital~ - December 19, 2011, 12:33 am

(Dec 17, 2011 03:05 PM)Modesty Wrote: [\[CITE\]](#) Yes i just discovered that bug a day ago, I'm sorry and it's been fixed for 4.1!!

well i discovered it a few days ago..

here (its the point 2)

<https://hackforums.net/showthread.php?tid=1915295&pid=18164846#pid18164846>

but it seams like you missed it :(

maybe if would be easier for you if you install some kind of bugtracking tool

bugzilla, redmine

or a lot simpler : google : create a project page (no need to put the source or the binarie) and let us write the issues... then you have a list of bugs to work on, without needing to discover themself by yourself

noskire - December 19, 2011, 3:49 am

Just wanted to ask if anyone else is using iCrypt gold with clientmesh? Please pm me if you do.

hannez - December 19, 2011, 3:53 am

i think there could be some problems with it because clientmesh was written in .NET and the icrypt gold was written in VB6+ASM

Modesty - December 19, 2011, 5:40 pm

Just fixing up the inbuilt crypter atm:

[img]http://choopd.com/?h=d0a58a183e309ad79df6d5ea2d02b28f[/img]

(Dec 19, 2011 04:49 AM)noskire Wrote: [\[CITE\]](#) Just wanted to ask if anyone else is using iCrypt gold with clientmesh? Please pm me if you do.

Ask the icrypt coder if it supports .NET files.

Olympia - December 19, 2011, 7:38 pm

Modesty really takes care of his customers, he's a great owner..I feel lucky to buy this from him.

Chaos Theory - December 19, 2011, 8:37 pm

I don't know why but the program keeps crashing on my PC. Am I doing something wrong?

JasonFlinn - December 19, 2011, 9:25 pm

(Dec 19, 2011 09:37 PM)Sovereign Wrote: [\[CITE\]](#) I don't know why but the program keeps crashing on my PC. Am I doing something wrong?

I'm afraid to say mine does the same from time to time :/

My 2 cents:

I think it would benefit your sales if you were to contact some of the big time crypter developers and figure out which crypters work with this RAT.

Any ETA on the next update? Cause I'm excited to get a chance to really switch over to this RAT.
:D

hannez - December 19, 2011, 10:31 pm

when will there be a new update ?
new inbuilt crypter ?

Hotman - December 20, 2011, 2:11 am

[+] New inbuilt crypter

[+] Website blocker (all browsers)

[+] Voice Capture (?)

and more...

~digital~ - December 20, 2011, 2:28 am

they are really long weeks for discount ^^

The Rat is very stable and good functions.. good work...

- You don't have UPNP Enabled
- It is working, I've been on teamviewer with numerous customers and seen it work....make sure you tick "auto login"
- Save function? What do you mean?
- I just tried now and it works...what error does it give you?
- You need to select a client before going on the client map :)
- It gets the location of the PC itself rather than the connection, better no? :p

Thank you mate, glad it's working :)

p.s. no idea why convertos account got closed, oh well ^^ Merry Xmas everyone

P.P.S Servers are currently down for maintenance, they'll be back up soon!

Hotman - December 25, 2011, 5:05 am

how many days left for the update? ?

Modesty - December 25, 2011, 8:00 am

(Dec 25, 2011 06:05 AM)Hotman Wrote: [\[CITE\]](#) how many days left for the update? ?
i'm working on it, maybe tonight ;)

?1nja - December 25, 2011, 8:13 am

Ok thx for answer!

i think i need a little bit help from you after the xmas time:)

i will try it again, when its updated!

happy xmas all:)

(Dec 25, 2011 05:28 PM)Euphorique Wrote: [\[CITE\]](#) Then the update will be amazing :) i enjoy it before have it :D

What is persistence? Noob question sorry :)

Modesty - December 26, 2011, 6:38 am

(Dec 25, 2011 05:46 PM)XBOx Wrote: [\[CITE\]](#) What is persistence? Noob question sorry :)
So that the file cannot be ended in task manager

?1nja - December 26, 2011, 7:31 am

yes persistance is relly nice....:)

..

Myusernameisbam - December 26, 2011, 8:17 am

(Dec 26, 2011 07:38 AM)Modesty Wrote: [\[CITE\]](#) So that the file cannot be ended in task manager
That's awesome, can't wait for the update man. I'm most excited about being able to execute a file to everybody at one time stealth. Very handy for my line of work. Thanks!

1337 is leet - December 26, 2011, 9:16 am

Just bought this waiting on my confirmation XD Looking good!

Modesty - December 26, 2011, 1:24 pm

(Dec 26, 2011 10:16 AM)1337 is leet Wrote: [\[CITE\]](#) Just bought this waiting on my confirmation XD
Looking good!
activated your account buddy!

Dr. Senor - December 26, 2011, 5:14 pm

I'm a noob at this sort of stuff. Through e-mail, one of the admins, which I do not know via HF, helped me out. He was pretty polite, and if I have any problems, I'll be sure to contact him again. In conclusion, my CM experience has been pretty good. Hopefully I'll get my server with bots up in no time!

Crysis™ - December 27, 2011, 1:06 am

Quote:Please make video youtube ClientMesh RAT 4
showing all functions
guys when make a video?
really want to see all of the functions ?

xsamy - December 27, 2011, 1:09 am

Hello

Dose it work fine in vmware ? im using mac that why im concerning about HWID

Modesty - December 27, 2011, 3:24 am

(Dec 27, 2011 02:09 AM)xsamy Wrote: [\[CITE\]](#) Hello

Yes I made it compatible :) If you're still unsure, download our standalone HWID tool at:
www.clientmesh.com/HWID.exe and see if you can run it :)

xsamy - December 27, 2011, 4:53 am

(Dec 27, 2011 04:24 AM)Modesty Wrote: [\[CITE\]](#) Yes I made it compatible :) If you're still unsure, download our standalone HWID tool at: www.clientmesh.com/HWID.exe and see if you can run it :)
Cool , ill be on my mac on like 30 mints then wil process the test then payment :)

1337 is leet - December 27, 2011, 5:18 am

hey I cant find a support email, Would you mind giving it to me?

AnGrY Bo - December 27, 2011, 6:31 am

I would like to buy it but I have question

If it doesn't need port forwarding, then how does it works ? is it PHP RAT ?

SIM-121380 - December 27, 2011, 7:41 am

It use upnp (if u router support it) to port forward automatically, then you can use it as a normal RAT.
Btw I tested this feature and it is working like a charm :)

Modesty - December 27, 2011, 9:30 am

(Dec 27, 2011 08:41 AM).#PORNCORE Wrote: [\[CITE\]](#) It use upnp (if u router support it) to port forward automatically, then you can use it as a normal RAT.
Btw I tested this feature and it is working like a charm :)
Thanks for the reply mate :) Compeltely right, if your router supports UPNP then ClientMesh will

forward your ports for you, you don't need to do it yourself.

Tobie Montana - December 27, 2011, 10:29 am

wich lang is it programed in? cant find it in the thread :S :P

Modesty - December 27, 2011, 2:02 pm

(Dec 27, 2011 11:29 AM)Tobie Montana Wrote: [\[CITE\]](#) wich lang is it programed in? cant find it in the thread :S :P

In vb.net and requires net framework v2.0 :)

Diabolic - December 27, 2011, 3:37 pm

This is an amazing RAT, you should definitely buy.

Modesty - December 28, 2011, 10:41 am

(Dec 27, 2011 04:37 PM)Diabolic Wrote: [\[CITE\]](#) This is an amazing RAT, you should definitely buy.

Thank you for the vouch mate!

UPDATE PROGRESS

Yeah this is me controlling a client via browser on an iPad. Realtime keylogger, realtime screencapture ALL IN BROWSER. YOU GUYS ARE GONNA LOVE THIS ;)

All you need for this is a device with a browser connected to the internet :) ipod touch, smartphone, w.e you want!

[img]http://choopd.com/?h=83e9bbea3938fcb88f4d25c45091fe54[/img]

Tobie Montana - December 28, 2011, 3:51 pm

okok, i know most computers have .net nowadays but i just dont like .net.. Dont know why :P

Besides the .Net the RAT looks great :)

Olympia - December 28, 2011, 9:06 pm

Update is going to be amazing, I'm getting aroused thinking about it.

Magikarp - December 28, 2011, 9:25 pm

does netgear support UPNP? Just wondering before I purchase.

Tibit - December 28, 2011, 10:59 pm

I have people asking me a lot now on the Help Desk for the RAT's Crew and in pm questions about this RAT, so I bought it just now so I can learn it and answer the questions :D

Overall it looks pretty good!

Myusernameisbam - December 28, 2011, 11:45 pm

So the update that was going to be out on the 25th-ish. Has it been released? I have been on Vacation and have not been keeping up. Also, I primarily use my iPad for 90% of online browsing. That is awesome!!

Modesty - December 29, 2011, 3:17 am

(Dec 28, 2011 10:25 PM)krisfron1 Wrote: [\[CITE\]](#) does netgear support UPNP? Just wondering before I purchase.

I have a netgear router and sometimes the UPNP stops working and you have to do a quick trick in the router settings to get it up again. But while something is listening on a UPNP mapped port, it

won't stop working suddenly. Only when you switch off the PC.

What's your router model? I'll check.

fcierrek - December 29, 2011, 6:22 am

Hey, what about this win xp update? :>

Modesty - December 29, 2011, 6:49 am

(Dec 29, 2011 07:22 AM)fcierrek Wrote: [\[CITE\]](#) Hey, what about this win xp update? :>
The latest current version works with xp fine?

Euphorique - December 29, 2011, 6:53 am

(Dec 29, 2011 07:49 AM)Modesty Wrote: [\[CITE\]](#) The latest current version works with xp fine?
Yes, clientmesh 4.0 work fine in XP :)

Modesty - December 29, 2011, 7:53 am

Currently got a functioning screencapture and keylogger that is accessible via browser without any plugins (no java no flash etc)

Exzib - December 29, 2011, 7:54 am

Damn i regret i sold the lisence now ;)
Looking good modesty :)

fcierrek - December 29, 2011, 8:07 am

(Dec 29, 2011 07:49 AM)Modesty Wrote: [\[CITE\]](#) The latest current version works with xp fine?not for me. Still can't create a server.

we both have similar routers ^_^ But yes the UPNP on netgear is shit however there are a few tricks that you can do to get it working.

SIM-121380 - December 29, 2011, 12:54 pm

UKFDubstep mmh, your a nice guy Modesty haha ! :D
GL with your RAT, it's going to be awesome :!

fcierrek - December 29, 2011, 1:11 pm

(Dec 29, 2011 10:11 AM)Modesty Wrote: [\[CITE\]](#) Which version of CM do you have? ^^
4.0. I'm still using server from 3.1 cause only this version worked fine for me

Magikarp - December 29, 2011, 1:34 pm

(Dec 29, 2011 01:42 PM)Modesty Wrote: [\[CITE\]](#) we both have similar routers ^_^ But yes the UPNP on netgear is shit however there are a few tricks that you can do to get it working.
what kind of tricks ?

thismessageis

Modesty - December 30, 2011, 3:05 am

(Dec 29, 2011 02:34 PM)krisfron1 Wrote: [\[CITE\]](#) what kind of tricks ?

thismessageis
using utorrent to start it, editing the advert period in the UPNP settings of the router itself to make it work properly.

fcierrek - December 30, 2011, 3:27 am

Modesty do you have v3.1 somewhere so i can download it?

SIM-121380 - December 30, 2011, 4:43 am

fcierrek, pm me your msn or steam, I will help you building a server with 4.0 ver throught TV :)

Abject - December 30, 2011, 4:48 am

@Modesty: When will the new update be released?

Modesty - December 30, 2011, 1:35 pm

(Dec 30, 2011 05:48 AM)Abject Wrote: [\[CITE\]](#) @Modesty: When will the new update be released?
few days, however I'll release a external crypter for all CM customers asap.

Hotman - December 30, 2011, 6:20 pm

What about adding these features?

[+] Website blocker (all browsers)
[+]Microphone recorder (unlimited samples with instant and unlimited duration)
[+] Inbuilt crypter

JasonFlinn - December 30, 2011, 7:33 pm

(Dec 30, 2011 07:20 PM)Hotman Wrote: [\[CITE\]](#) What about adding these features?

[+] Inbuilt crypter

Well sir, I'm pretty sure the Inbuilt Crypter is there already.
But unfortunately I'm also pretty sure it isn't FUD atm :(

I'm looking forward to the release of v4.1 and the outter crypter your releasing Modesty.

Misaka - December 30, 2011, 7:34 pm

I've been talking to jk22 alot and apparently, next update will have a lot? :D

dogyuun - December 30, 2011, 8:32 pm

Just ordered :) Looking forward to using this product!

p.s I hate paypro because they always call me when I'm not around.

Modesty - December 31, 2011, 1:03 pm

Happy new year for everybody, i hope everyone's lives improve to the biggest extent they can!

Olympia - December 31, 2011, 4:19 pm

Cant wait for updates, Happy New Year Everyone!

Modesty - January 1, 2012, 4:40 am

To all people who paid last night, activation of your accounts will occur within the next half an hour :)

Myusernameisbam - January 2, 2012, 8:16 am

Can't wait for the update! Will there be a registry editor? Or still only viewer? Thanks!

Hakuna Matata - January 2, 2012, 9:37 am

I still need to get my server FUD.
Is the crypter you talked about added?

Olympia - January 3, 2012, 12:23 am

Looking forward to the updates so badly, how long do you think before we see something released?
thanks!

webbie146 - January 3, 2012, 7:47 am

This rat looks very good! I'm just wondering, how good is the cam viewer? Is it fast/stable? How is it compared to the cam-logger in darkcomet/blackshades?

Modesty - January 4, 2012, 7:18 am

@everyone: would you rather I released a crypter for you guys that was 3/36 (2 unknown/rare AVs and Avira) or waited till it is completely FUD? ^_^

(Jan 3, 2012 08:47 AM)webbie146 Wrote: [\[CITE\]](#) This rat looks very good! I'm just wondering, how good is the cam viewer? Is it fast/stable? How is it compared to the cam-logger in darkcomet/blackshades?

Depending on your connection and the location of the client it can range from 0.5 - 3fps.

webbie146 - January 4, 2012, 11:54 am

Okay sounds great. Is reselling of you're ClientMesh account officially allowed? And how do updates work, are they free like with blackshades?

Hakuna Matata - January 4, 2012, 11:58 am

"Wrong password, can't login"

"A new update has been found. Press OK to download." ok

"Account has been suspended"

... i can't login anymore or download the new update.

noskire - January 4, 2012, 12:03 pm

(Jan 4, 2012 12:58 PM)Hakuna Matata Wrote: [\[CITE\]](#) "Wrong password, can't login"

Same problem here as well. Tried logging in and told acc suspended :/

?rtificial - January 4, 2012, 12:20 pm

Unless I missed it, how much is it?

Olympia - January 4, 2012, 1:01 pm

(Jan 4, 2012 01:32 PM)Modesty Wrote: [\[CITE\]](#) Cmesh will be back up in an hour hopefully :)

How long mate, really looking forward to this!

Hakuna Matata - January 5, 2012, 9:41 am

I really wish it was FUD, I've tried many crypters, it's FUD but it doesn't work then.):

I wanna get bots and play with them.

Modesty - January 5, 2012, 9:48 am

I'll update the screenshots soon guys.

Myusernameisbam - January 5, 2012, 7:24 pm

Hope to see an update soon :? Also, Modesty, will we be able to edit the slaves registry in the new update?

Modesty - January 6, 2012, 8:55 am

(Jan 5, 2012 08:24 PM)XBOx Wrote: [\[CITE\]](#) Hope to see an update soon :? Also, Modesty, will we be able to edit the slaves registry in the new update?

weekend I hope, I'm just trying to make it the best for you guys so that's why it's taking longer than anticipated.

And yes! that shall be included most likely ^^

N4xus - January 6, 2012, 9:04 am

check the main sales page
the pics are not loading
:) i didnt see the rat pic :)

Teddies - January 6, 2012, 10:40 am

why am i getting errors all the time on clientmesh wtf

Allusion - January 6, 2012, 1:28 pm

I purchased it but I never got an email.

Modesty - January 7, 2012, 7:47 am

(Jan 6, 2012 02:28 PM)Justified Wrote: [\[CITE\]](#) I purchased it but I never got an email.
Your payment did not go through at all, your card was declined.

Olympia - January 7, 2012, 10:59 pm

Vouch this, Modesty runs a good product.

Modesty - January 8, 2012, 2:20 am

Nearly done the update peeps!

Olympia - January 8, 2012, 2:51 am

(Jan 8, 2012 03:20 AM)Modesty Wrote: [\[CITE\]](#) Nearly done the update peeps!
What does the update include exactly man?

Modesty - January 8, 2012, 3:23 am

This is the plan of action:

I will release ClientMesh 4.1 tonight. It will have most of the features you have requested and will be pretty strong, much more stable. THEN I will start a full recode of the RAT. I think this is necessary since I've learnt quite a bit in the past 4 months-ish after recoding 3 -> 4 and I think that major improvements are required. It will be completely new ^^

Quizzical - January 8, 2012, 6:17 pm

Damn dude, this looks like an amazing RAT, I think its personally better then Blackshades as it stands now. I will consider buying this once I have the funds :)

Pants - January 8, 2012, 9:34 pm

I bought this today and am still awaiting my email.

Olympia - January 9, 2012, 1:09 am

I love this RAT so much, when the update arrives how will we know?

AnGrY Bo - January 9, 2012, 3:32 am

I have a question

Is it FUD or its detected by Anti Virus ?

Modesty - January 9, 2012, 5:33 am

@poster above: It is currently detected 3/36 (Avira and two other rare AVs)

(Jan 9, 2012 02:09 AM)Culprate Wrote: [\[CITE\]](#) I love this RAT so much, when the update arrives how will we know?

It will give a notification and then download it for you.

~digital~ - January 9, 2012, 6:43 am

modesty is it possible to have the download link per pm or per email ?

if you are online on msn in 3 or 4 hours it may be possible that i contact you to ask a TV session to see if i'm doing something wrong or if the server creation process bugs on my virtualbox VM

by the way i wish you a happy new year ^^

may your RAT become the MOST powerfull rat here ;)

Modesty - January 9, 2012, 7:59 am

Well i hope you can get us an update soon. Crypting doesnt work and after successfully finally getting the client on another PC, i crash everytime i start the server and a client connects.

As of right now, i am not happy with my purchase.

EDIT: Got clients to connect, and not crash, but the file explorer is meh. Doesnt work a lot.

themzke - January 10, 2012, 5:39 pm

Vouch! ClientMesh is a very good RAT and the one I used is the outdated version cannot wait for the update!

Great Work!

Also is there an approximate ETA on the update?

SIM-121380 - January 11, 2012, 4:58 am

Btw if u want a new support member that speak French(main), Dutch and English, just PM me !
Want to help you in this project !

DDoSix - January 11, 2012, 9:34 am

Here is the problems im having so far with the Rat:

- File Transfer Doesnt Work
- Cannot Access folders on a slave's PC (even if its the desktop folder, i have to try again before i use it)
- Visit site doesnt seem to be working well, i dont see it popup on their screen at all.
- Anytime i use refresh on a slave it says he is disconnected but only after 10-20 sec he reconnects.
- KeyCap isnt very good either, but i got xyz logger to replace that feature.
- Server info doesnt save, i have to type my details in every time.

Positives:

- Kill process seems to be working well
- Fast installs/connects
- lots of other things

Recommendations

- DDoS feature
- Fix current bugs
- Better stealer/keylogger
- More stability, i get not responding errors way too much

Overall 3/5, it needs work but im willing to wait for it :)

Camaleon - January 11, 2012, 10:49 am

Actually I have to agree with all of the above. I hope all this stuff gets fixed on the new update.

A feature to add groups to sort your bots better can be handy.

Also making the keylogger activate when slaves visit some sites I.E. When Visit URL"http:domain/com" Start Keylog and save logs to "c:/PATH"

Regards,
Manny

Modesty - January 11, 2012, 11:26 am

Does the website visitor not work for you? I tested on 100+ clients and it worked fine...hmm.

And file explorer worked fine too, just that there's a bug when using the quick access directories which won't let you go any further inside them.

You guys can PM me if you wish to use the in-development experimental crypter that's only got 1 detection from avira and 2 detections from rare impractical antivirii.

iKorkSkalle - January 11, 2012, 12:56 pm

I vouch big time for this rat!

The support is the best, and Modesty is a really nice guy!

Aiiight

Pants - January 11, 2012, 1:32 pm

While using the new crypter i get an error from the client, An unauthorized connection has been blocked.

Modesty - January 11, 2012, 1:38 pm

Well it does, and i know that for a fact. Only got that error after crypting the client.

Olympia - January 12, 2012, 12:55 am

Hello Modesty, how long until the update?

Sorry for nagging you but I can't wait.

Modesty - January 12, 2012, 12:43 pm

(Jan 12, 2012 01:55 AM)Culprate Wrote: [\[CITE\]](#) Hello Modesty, how long until the update?

Sorry for nagging you but I can't wait.

I've just done my exams, and have none for the next few months so as i stated, the bug fixes and extra little features will be coded first and released in a few days, and then I will start a full recode of the RAT which may take around a month, if not less, and it will be completely new and much improved due to the fact that most bugs are being ironed out now.

Also, I have reason to believe that there is a cracked version if ClientMesh currently being passed around and I'd just like to tell you guys not to trust it due to the extreme risks there are of using it. Also, the cracking mechanism prevents any communications with my website. The idiots who cracked it think that there is just 1 instance of communication that occurs in this RAT (at the login) however this is not right. Continuous authenticated communication is required, otherwise the RAT will malfunction and with the cracked version, there will be no authenticated communication which means the RAT will be incredibly unstable. So protect your valuable clients and don't use the cracked version.

5.0 OUT VERY SOON, EXCITED :D

~digital~ - January 13, 2012, 12:30 am

you know we (the customers) don't care about a cracked version...
indeed why should we use a cracked version, that could be backdoored...
its only the people that wish to use your work without paying that search for these kind of stuff...

Hotman - January 13, 2012, 5:51 am

can you add the this feature?

Microphone recorder (unlimited samples with instant and unlimited duration)

if it's easy for you, i think will be the best r.a.t at the market :)

Specific - January 13, 2012, 6:37 am

When Im creating client, and I press the "Build" button, the whole program just crashes..
Anyone knows whats wrong, or is it happening for everyone?

I'm about three quarters through the update.

And there's no reason for it to stop working, make sure your ports are forwarded still (sometimes your internal ip changes from time to time and you need to update that in your router config.)

Fredo In The Cut - January 16, 2012, 7:02 pm

I would like to get this rat, cause i cannot portforward, and this rat doesn't need it.. do I need to do anything before, to make my rat work for others, or can i just build the server?

Modesty - January 17, 2012, 8:19 am

(Jan 16, 2012 08:02 PM)Snapback Wrote: [\[CITE\]](#) I would like to get this rat, cause i cannot portforward, and this rat doesn't need it.. do I need to do anything before, to make my rat work for others, or can i just build the server?

You will need upnp if you do not want to forward. Make sure your router supports UPNP before buying. ALSO - can you not portforward because you don't know how to? If so i can help you.

Fredo In The Cut - January 18, 2012, 4:33 am

What is upnp? I know how to portforward, just that people tried portforwarding my router, doesn't work and I tried it to :/

~digital~ - January 18, 2012, 5:46 am

(Jan 18, 2012 05:33 AM)Snapback Wrote: [\[CITE\]](#) What is upnp? I know how to portforward, just that people tried portforwarding my router, doesn't work and I tried it to :/
you know... a RAT developper has better to do than to explain what an acronym is...

before asking him (and so make him loose some time, he could have spent in developping the next version) try search on google or wikipedia ?

Euphorique - January 19, 2012, 2:06 pm

Hi modesty, where are you for the update ?

Olympia - January 24, 2012, 5:14 am

Update is taking ages, how long left roughly mate?

DEMó??c xO?aTâ - January 24, 2012, 5:17 am

I would also like to know when an update is coming out :)
However I'm sure the wait is worth it!

Modesty - January 24, 2012, 8:31 am

I apologise for the delay guys, I've just been so caught up with everything in my life at the moment that I haven't been able to do much work on 4.x version. On the upper hand, I've made a lot of progress with version 5 which will be out in less than a month, 2 weeks I'm hoping. I don't like deadlines since they cause pressure but a rough estimate will be 2 weeks (:

Preview screenshot:

[img]http://i.minus.com/impBGasAN6ZwV.png[/img]

DEMó??c xO?aTâ - January 24, 2012, 9:56 am

It's looking really good mate, looking forward to it!
Keep up the good work :)

Olympia - January 24, 2012, 4:49 pm

Wow it's looking amazing I can't wait literally.

Camaleon - January 24, 2012, 5:05 pm

Wow looking great bro. I am guessing that we all v4 customers will get v5 free of charge specially when we have not being able to use it for so long waiting on you to fix/update it. :)

Camaleon - January 26, 2012, 2:22 pm

(Jan 25, 2012 01:07 PM)Modesty Wrote: [\[CITE\]](#) It is a free update yes and generalising is a bad thing, do not use "we" in such a context. ClientMesh has been working and is working (: If you have a problem, pm me.

Thought I might show you the current visual progress:

[img]http://i.minus.com/iQd4Ero4kDnl0.png[/img]

Well I say "we" because the current version has several issues and instability witch I have reported to you on this thread as well as several others have reported the same issues like the file transfer for example so there is where the "we" comes into place. "We" have being waiting for the bug fixes since December last year and "we" have being told several times that the update is coming up 2 days or 3 days or next week yada yada. Se "we" have being waiting for the update since then because "we" can't use the rat as is useless if several features are not working. So "we" will continue to wait for V5 to come out so "we" do not have spread a server that will not allow us to do shit with the bots that connect.

I got no problem with waiting but please do not try to say that the current rat is working perfectly because "we" all know that is not true. Yes that rat get connection and yes the rat can open a webcam but what do "we" do with that? What about that fact that it crashes when you load over 50 bots? What about the file transfer not working? What about the update feature not working? ect ect. This are problems that have being reported by others in this very thread.

We are not mad with you and no I am not trying to flame. Actually we are exited to see the new V5 come out as overall this is a good RAT but when you say that "ClientMesh has been working and is working" then I have to say no is not.

20MDM - January 26, 2012, 2:42 pm

What does "if your router supports UPnP" mean? and are the servers FUD?

Modesty - January 26, 2012, 2:54 pm

(Jan 26, 2012 03:42 PM)20MDM Wrote: [\[CITE\]](#) What does "if your router supports UPnP" mean? and are the servers FUD?

Most modern routers support a technology named UPnP. If you provide me with your router model I can check if it supports UPnP, and if so then ClientMesh can portforward for you.

They currently have a few detections, after purchase you can pm me for a free private crypter. Version 5 is currently FUD and will be FUD upon release.

20MDM - January 26, 2012, 3:16 pm

So if I purchase this now will I get v5 also?

Modesty - January 26, 2012, 3:26 pm

(Jan 26, 2012 04:16 PM)20MDM Wrote: [\[CITE\]](#) So if I purchase this now will I get v5 also?

Yes that is correct, all updates are free for all customers. As soon as v5 is released, 4.0 will tell you there is an update and will download for you (:

huzoid - January 27, 2012, 2:28 am

Rat works good for me. So far tested it only on myself.

Because the build in crypter aint FUD , got 10/37 results.

Any chance you could send that private crypter to me aswell bro?

Thx

~digital~ - January 27, 2012, 2:29 am

i understand that it is better to start again from new (for v5) because your coding skills have been improved and you prefer do new clean code rather than correcting old not clean code.

but please, before releasing v5 test it deeper or ask some beta testers to test it.

you said v4 is more stable than the previous releases, that there is was a lot things that were corrected...

but some really easy things like "remember the connection settings" (password and port) is not working.

ok if you used the rat once and never close it, this feature is useless

but when you reboot or turn off the rat, this simple feature should be working...

there is also a function to remember the the server settings (so you can create a new server without typing all the configuration again) this part also does not works...

testing the product would only help you to bring out a super rat...

make a beta test for people who says : "hey dude i love your rat, its perfect" won't help... cause these people didn't saw the bugs other saw...

i also know that supporting an old product sucks.... but if you correct the big problems in v4, you would make customer happy too

Modesty - January 28, 2012, 3:59 pm

Just completely rewrote the file manager, incredibly stable ^^

Just recoded the downloader too, and it's downloading just finee! (:

Momz - January 29, 2012, 3:34 am

You should add country flags near the location of the slave, would help a lot.

Modesty - January 29, 2012, 12:43 pm

Process Manager finished, looking to add dll injection atm.

Just added a full registry explorer/editor too (:

(Jan 29, 2012 04:34 AM)Momz Wrote: [\[CITE\]](#) You should add country flags near the location of the slave, would help a lot.

herpderp the screenshots of v5 are development screenshots so it's not finished. If you look at the current release, there are flags.

Crysis™ - January 29, 2012, 1:14 pm
can be done in megabytes?

you can add?
full path name
description

Modesty - January 29, 2012, 2:40 pm

(Jan 29, 2012 02:14 PM)Crysis™ Wrote: [\[CITE\]](#) can be done in megabytes?Yes I will do that for sure (:

(Jan 29, 2012 02:14 PM)Crysis™ Wrote: [\[CITE\]](#) you can add?
full path name
description

gaining the main module path is incredibly buggy on x64 systems and requires admin permissions, and .net doesn't allow a 64 bit system accessing the main module path of a 32 bit process. IDK why but that's the way it is unfortunately D:.

Description yes I will do that (: But if you right click the process and click info then it gives you more info about it (:

registry editor:

Your welcome if anyone want to buy ClientMesh RAT PM ME. ?

Modesty - February 8, 2012, 3:15 pm
[img]http://i.minus.com/ik8r2bFNeW0Ox.png[/img]

Solid console for RAT, will implement 50+ commands hopefully.

Theref - February 8, 2012, 3:20 pm
hello want to ask whats cm coded in?

Modesty - February 9, 2012, 2:49 pm
(Feb 8, 2012 04:20 PM)Theref Wrote: [\[CITE\]](#) hello want to ask whats cm coded in?
vb.net sir.

HD Webcam capture added.

Nathan Moriarty - February 10, 2012, 5:45 am
You should use more standardized commands for the console.
Ex. Don't use "|" to separate arguments and "dcall" doesn't actually make sens.

Dozix - February 10, 2012, 9:13 am
(Feb 9, 2012 03:49 PM)Modesty Wrote: [\[CITE\]](#) vb.net sir.

image/video?

Nice! Will it be possible to save as

Public.Enemy - February 10, 2012, 11:56 am
Just bought it, waiting for my username now. will update some info soon about the product :D

Modesty - February 11, 2012, 11:31 am
Today my isp fucked me over and so I have no means of connecting to the internet (I'm currently on my phone). Rest be assured, I ordered a new broadband paage which will start on the 28th of february, till then I can only harass my current ISP to male my internet work or I'll have to wait it it for

the next 2 weeks. This means that I can't tend pm's or offer support till then, however my staff member DNB can. You can find his details on the OP and he will give you support.

You can still buy and I can still activate accounts and you can still contact me for support if you wish but I can only do email (d7m@hotmail.co.uk). If you need any full support then please contact the reseller (DNB) who'll tend your matters.

Update is just being fixed up for release, I'm pleased with it. Of course the update can only come out once I've got my internet back.

Regards,

Modesty

Gatsby - February 11, 2012, 12:49 pm

I'm about to buy this, one question, is this FUD? And how UD is it?

Modesty - February 11, 2012, 1:29 pm

[quote='CHOCOLATEPIE' pid='19870042' dateline='1328993365']

I'm about to buy this, one question, is this FUD? And how UD is it?quote]

It was fud for a while however now it is not and there's no point in me fuding version 4 if I'm about to release version 5 which is FUD. Although if you pm me then I can give you access to a free beta private crypter that you can use to crypt it (currently 3/35, developed by me) temporarily till v5 comes out :)

DNB - February 11, 2012, 1:44 pm

(Feb 12, 2012 04:08 AM)Dozix Wrote: [\[CITE\]](#) I just hope you can protect it so the skids on opensc cant crack it.
It's got a neew login system that isn't even net so dw :)

Gatsby - February 12, 2012, 2:37 pm

Just bought it today. Then I went ahead and bought 100 slaves. The RAT crashes around 25-50 slaves.

DNB - February 16, 2012, 5:42 am

Dear customers, this is a direct message from Modesty (he doesn't currently have access to internet so he wants to relay this message to you):Hey guys, good news: all there is left to do in the update is to implement the login system fully and we're ready to release. Thank you for bearing with me. An engineer is currently at our house fixing our internet problems so hopefully I'll be back online soon. The update is beautiful, can't wait to give it to you guys.

Regards,
Modesty

TheFeed - February 16, 2012, 6:48 am

Thanks for the update mate ...

Looking forward to the official release of v5

?

Modesty - February 16, 2012, 8:23 am

INTERNET FIXED FINALLLY.

OKay we're releasing this asap, all there is left to do is finish the implementation of the login system.

[img]http://i.minus.com/iRwjdsSaVXzNs.png[/img]

I'd like to show you more but I will when i make the thread for v5 :) As of now i've pretty much recoded EVERYTHING, the connection class has been made much more efficient and i've made sure the encryption it uses is less intensive so everything on the whole should be much faster. Also we've got an upload file queue now too. I've tested EVERY function and it works fine. The only thing that slightly worries me is the webcam..it caused the webcam to fuck up a little on some PC's which have old webcams but I think I've fixed that now anyways. Either way, brb finishing v5

SIM-121380 - February 16, 2012, 9:42 am

Hope you will have no issue with the new login system
GL with v5 man :) !

Modesty - February 17, 2012, 5:17 am

Decided the offline keylogger needed a bit more of a revamp, it's got HTML formatting to make logs clearer and easier to read now :) Supports both gmail and hotmail ofc, maybe later I'll add custom proprietary servers

Dozix - February 17, 2012, 8:15 am

(Feb 17, 2012 06:17 AM)Modesty Wrote: [\[CITE\]](#) Decided the offline keylogger needed a bit more of a revamp, it's got HTML formatting to make logs clearer and easier to read now :) Supports both gmail and hotmail ofc, maybe later I'll add custom proprietary serversHow about letting the client download the offline log?

Like the offline keylogger works in say blackshades or cybergate.

Modesty - February 17, 2012, 10:04 am

(Feb 17, 2012 09:15 AM)Dozix Wrote: [\[CITE\]](#) How about letting the client download the offline log?

Like the offline keylogger works in say blackshades or cybergate.

So you'd like it to store the logs on their PC so you can download it later? Sure i guess

hayzyboy - February 17, 2012, 1:57 pm

VOUCH! i bought this rat from a different seller, !! i love this rat

Chaos Theory - February 17, 2012, 5:04 pm

Can't wait for the update<3.

This version hasn't worked out too well on my PC, but that's just me.

Modesty - February 18, 2012, 6:24 am

Current detection rate of v5: 2/9. Will lower to 0 and release hopefully tonight.

Dozix - February 18, 2012, 6:35 am

(Feb 18, 2012 07:24 AM)Modesty Wrote: [\[CITE\]](#) Current detection rate of v5: 2/9. Will lower to 0 and release hopefully tonight. Thats great news :)

Feel free to PM if you need a proper scan tho.

Feel free to PM if you need a proper scan tho.

just bought some scanner credits, but thank you

Got it to 2/37. I think that's close enough for me to release it now and then work on the crypter so you guys have access to the RAT atleast, with a very LOW detection rate.

<http://my-avscan.com/result.php?scan=Mzg0Mzc0>

DNB - February 18, 2012, 1:50 pm

Be ready guys we are releasing ClientMesh RAT v5. ?

Modesty - February 18, 2012, 2:03 pm

Just doing the last checks and everyone will be issued an update shortly. I'd like to inform you the update I'm issuing is the first revision of version 5. This means that although I've put it through thorough testing and had a group of people to test it, there is always the possibility of something not working. As of now, the only buggy thing is the webcam capture which sometimes bugs out if you're capturing from a slow PC that has like 512mb of RAM. Everything else seems to be working fine. Any bugs, please report to me asap and i'll make a second revision if any vital things are required

DNB - February 18, 2012, 3:07 pm

ClientMesh RAT v5 tested on my pc and it is very stable and fast. ?

Chaos Theory - February 18, 2012, 4:02 pm

Keeping a close eye on the thread. Are you guys releasing it tonight?

TheFeed - February 19, 2012, 6:59 am

Great news !!!

Thanks for all your efforts ?

DNB - February 19, 2012, 7:42 am

Good News For All:

We are releasing ClientMesh RAT v5 today night for sure, Yesterday we were testing All functions as I mentioned on top post that all functions are stable and working perfectly so now we need little bit more security on login panel when its done we will release it as soon as possible.

Regards,

Reseller of ClientMesh, DNB

unix2 - February 19, 2012, 6:49 pm

hey,,, how is the update coming along?

VybzKartel - February 20, 2012, 6:44 am

Will be nice to see what you have done with the rat with this update

Dozix - February 20, 2012, 9:59 am

Any new eta for the release of the update?

Modesty - February 20, 2012, 10:14 am

(Feb 20, 2012 10:59 AM)Dozix Wrote: [\[CITE\]](#) Any new eta for the release of the update?
just got home, finishing it off, lets say..few hours?

VybzKartel - February 20, 2012, 10:26 am

(Feb 20, 2012 11:14 AM)Modesty Wrote: [\[CITE\]](#) just got home, finishing it off, lets say..few hours?
Sounds good mate can't wait to test

Chaos Theory - February 20, 2012, 10:28 am

Thanks for the ETA update.

Good luck :)

unix2 - February 20, 2012, 1:59 pm

is the update still coming out today?

Modesty - February 20, 2012, 3:31 pm

it's done. I'm just taking final screenshots and you guys will have it in less than an hour.

It's done.

Current customers, v4 will download v5 for you upon starting v4. If there's a problem, pm me.

[img]http://www.clientmesh.com/thread/clientmesh.png[/img]

If anybody has any problems or needs support PM me. If there are any immediate bugs then please pm me too :)

unix2 - February 20, 2012, 3:37 pm

built in crypter is more UD then before :)

RESULTS: 6/37

http://scan4you.net/result.php?id=90b88_1974t6

Modesty - February 20, 2012, 3:52 pm

(Feb 20, 2012 04:37 PM)unix2 Wrote: [\[CITE\]](#) built in crypter is more UD then before :)

RESULTS: 6/37

http://scan4you.net/result.php?id=90b88_1974t6

Please use a hi resolution icon to lower it to 2/36

such as: <http://minus.com/mKrRvjzMo#>

thank you

p.s sometimes it may feel like it's taking a while to load. Please just be patient and wait, usually it takes around 10 seconds, sometimes this may raise to 30 depending on traffic and server load.
thanks.

DNB - February 20, 2012, 4:02 pm

ClientMesh RAT v5 Released if anyone want help let me know. ?

Chaos Theory - February 20, 2012, 4:23 pm

Updating! Thanks. Will post what I think of it later, I'm sure it'll be great.

~digital~ - February 20, 2012, 4:37 pm

bugs/missing features after 5 min of use

- 1: the settings tabs doesn't do anything...
- 2: the pass.rec tab make the client disconnect on a refresh request
- 3: is the picture preview missing in this file explorer ?
- 4: you can select multiple files in file explorer, but when you do a right mouse click and select download it will only download one file...
- 5: in fileexplorer downloading directory give an exception, and the software does nothing
- 6: the program NEED to save the password and the port ! and also start listening automatically... it is a nonsense to do this a each start
- 7: the password field should also be showing stars.... (to avoid people seeing the password)
- 8 the file transfer is HORRIBLE SLOW.... copying an image that is 103KB big on a test install LOCALY (server and client on the same machine) took more than 8 seconds... whereas this task should take about 50ms...
- 9: asking where to save the files is useless, it will only make people feels like idiots ... ok when you do it once or twice a day its not a big deal... but for people copying lot of files this is a total nonsense
- 10: the Drive size should be in KB or MB.... showing the size in B is taking a lot of space...
- 11: the type column on the file explorer is useless, people see the difference on the icon type... here it would be better to show the creation date or modification date
- 12: double click on a file in file explorer should download the file for example
- 13: there is no ability to rename a server... so if i rat something interesting, i need to remember the username + machine name :(

hope to see all (or most) of this bugs/feature correct soon

nice work by the way... but i wan't use it as main rat right now, there are too many things that will make me go crazy if i use it for a daily use...

unix2 - February 20, 2012, 4:41 pm

is it currently down? when i open it, it just closes itself

Dozix - February 20, 2012, 6:52 pm

The crashes from v4 are gone :)

Going to play around with it some more tomorrow, tho alain is bringing up some good points.

You should however remember that this is the first revision of the totally recoded version. Its a great base and im sure that modesty will improve upon it greatly.

~digital~ - February 20, 2012, 10:43 pm

Like i said, he did a great job.

It doesn't crash and is way more stable than v3-4.

Imo if the 13 points are corrected in next release, it would be an awesome rat.

unix2 - February 21, 2012, 5:52 am

(Feb 20, 2012 11:43 PM)alain57 Wrote: [\[CITE\]](#) Like i said, he did a great job.

It doesn't crash and is way more stable than v3-4.

Imo if the 13 points are corrected in next release, it would be an awesome rat.LOL. its already an awesome rat.. but that would bake it da best ?

Simegu - February 21, 2012, 6:37 am

Big vouche for DNB gave me a free bot :D working great so far!

~digital~ - February 21, 2012, 6:52 am

it is a lot better than v3-4 i agree

it looks good thats truth too

but it is the only rat i know where

1: i need to write my settings (port + password) on each start

2: i need to download one file at the time and each time tell the software where to save them, even free rats do better... i have the Feeling to use V1-V2 again :(for the file explorer

3: needing to wait 8 seconds to transfer a 100KB file locally is a BIG problem.... if it is slow without using internet... it would be even worse when i'll try to download a file from an other country...

4: picture preview was an awesome feature... not it isn't there anymore, that is also a regression (too bad, cause this feature was a big PLUS)

so ok its a lot more stable that v3-4, but some good feature are no more present....

so in my opinion V5 has indeed a great potential for an upcoming update...

but it is not awesome, at least not now

Modesty - February 21, 2012, 8:32 am

Alain57 I do understand about the picture preview however that is a huge amount of work and I wanted to get this out to you ASAP. I realised that a compromise was required, I couldn't include EVERYTHING. However, now that this is all over and done with, I can start refining and adding in these extra features. I'll release a revision ASAP that'll consist of all your points and hope to make you and rest of customers happy people.

Thank you for all your patience, it does matter greatly to me and I appreciate it. You guys are awesome

Btw the file transfer is optimized for when you're dealing with thousands of clients, and on a Wide Area Network (global), therefore it isn't AS fast as you'd expect locally, however it is stable. I can make this optimization optional.

And the settings button does work, just gotta wait a few seconds for it to show up sometimes. I'm sorry about the little lag times when opening up the forms such as about, settings and client creation...but i compromised this for the extra protection.

TheFeed - February 21, 2012, 8:51 am

Thanks for the update ...

Vouch for this RAT , Modesty and DNB !!!

?

Olympia - February 21, 2012, 9:00 am

I will make a tutorial for v5 asap, looks really good.

Just getting a grip of the new controls.

Thanks.

Modesty - *February 21, 2012, 9:02 am*

(Feb 21, 2012 10:00 AM)Culprate Wrote: [\[CITE\]](#) I will make a tutorial for v5 asap, looks really good.
