? Mega Thread: Proxie's & More! ?Tutorial by: Soul Collector

[b]Whats proxy?

Proxies are store-and-forward caches. When you configure your web browser to use a proxy, it never connects to the URL. Instead, it always connects to the proxy server, and asks it to get the URL for you. Proxies can be used as a sort of firewall, because it isolates you from connecting to the Internet.

How does a proxy server work?

A proxy server receives a request for an Internet service (such as a Web page request) from a user. If it passes filtering requirements, the proxy server, assuming it is also a cache server, looks in its local cache of previously downloaded Web pages. If it finds the page, it returns it to the user without needing to forward the request to the Internet. If the page is not in the cache, the proxy server, acting as a client on behalf of the user, uses one of its own IP addresses to request the page from the server out on the Internet. When the page is returned, the proxy server relates it to the original request and forwards it on to the user.

To the user, the proxy server is invisible; all Internet requests and returned responses appear to be directly with the addressed Internet server. (The proxy is not quite invisible; its IP address has to be specified as a configuration option to the browser or other protocol program.)

What are the advantages of using a proxy server?

An advantage of using a proxy server is that its cache can serve all users. If one or more Internet sites are frequently requested, these are likely to be in the proxy's cache, which will improve user response time. In fact, there are special servers called cache servers.

The functions of proxy, firewall, and caching can be in separate server programs or combined in a single package. Different server programs can be in different computers. For example, a proxy server may in the same machine with a firewall server or it may be on a separate server and forward requests through the firewall.

There are different types of proxy servers with different features, some are anonymous proxies, which are used to hide your real IP address and some are used to filter sites, which contain material that may be unsuitable for people to view.

When you connect to a web site, your true IP address will not be shown, but the proxy servers IP will, this does not mean that your completely anonymous. The proxy server will have logs of IP's that used the proxy server and the times.

So why should you use a proxy?

You can use a proxy server if you have a child and wish to restrict the sites they are viewing, you

will need to make sure you get the correct type of proxy because not all proxies filter sites. You can use it to protect yourself, it can be used to hide your IP which is useful because it means hackers can not get info about you when using it. They will only get the proxy servers IP. Proxy servers are not hard to set up, no hardware or software is needed, you just need to configure your browser to connect through it.

Some ISP's (Internet Service Providers) make all their users use a proxy server, for example in the United Arab Emirates, the main ISP makes all users use a proxy server which blocks sites with unsuitable material. It does this using the meta tags in the HTML code used to make the web page. Some ISP's may give you a choice so you can use one or not. If you want to use a proxy server there are many around with different functions, you just have to get the one that suits your needs best.

ProxyWay:

1. Make sure you have Internet connection and your firewall doesn't block ProxyWay.
2. Double-click on ProxyWay desktop icon.
3. Click Proxy button in the toolbar.
4. Select 'Proxy' item.

[img]<http://www.proxyway.com/www/help/proxyway/shots/proxymainwin.gif>[/img]

Click 'ProxyWay Auto Configuration' button.

[img]http://www.proxyway.com/www/help/proxyway/shots/auto_config.gif[/img]

Select the browser you want to use for surfing through ProxyWay.

Click OK.

Real Hide IP:

[img]<http://www.vhxn.com/wp-content/uploads/2009/06/realhideip.jpg>[/img]

Key Features:

- Easily Conceal Your IP Address
- Anonymous Web Surfing
- Advanced Application Support
- Protect Your Identity and Stop Hackers
- Un-ban Yourself From Forums, Blogs, Etc...
- Prevent websites from tracking your online activities
- Quickly delete all Internet Explorer and FireFox cookies
- Automatically clear your cookies each time your IP changes

Download:

http://download.cnet.com/RealHideIP/3000-2144_4-10907662.html?part=dl-6309885&subj=dl&tag=button

Proxy Switcher:

[img]<http://www.newfreedownloads.com/imgs/19294-w520.jpg>[/img]

Proxy Switcher Features:

- Change proxy settings on the fly
- Automatic proxy server switching for anonymous surfing
- Works with Internet Explorer, Firefox, Opera and others.
- Flexible proxy list management
- Proxy server availability testing
- Anonymous proxy server list download
- Any time change to direct connection (your IP) or change to any other country IP.

Tutorial:

Easy Hide IP:

[img]<http://www.easy-hide-ip.com/images/easy-hide-ip-user-interface.jpg>[/img]

Key Features:

•Easy-Hide-IP - Secures and Anonymizes all your internet connections and allows you to: Surf any Web Sites, Instant Messenger and Chat services, Web-based Email services, Newsgroups, Web Blogs and Forums. Your Identity is Secure, Protected, and Anonymized.

•Easy-Hide-IP protects your identity by replacing your real IP address with a different one. You will appear to access the internet from a different location, not your own. Your real location is never revealed.

•You can bypass virtually any form of censorship or internet traffic blocking imposed on you by your ISP, by your company, or by some other third parties. All your internet traffic is routed through remote servers. On your ISP's log file, only the IPs of the remote servers will be shown, not the sites you have visited.

•You do not need to worry about your ISP or some other Entities monitoring your internet activities, see what you are doing, which Newsgroups, Blogs or Forums you have visited and which messages you have posted.

Download:

Hide Your IP Address:

[img]http://www.softpedia.com/screenshots/Hide-Your-IP-Address_1.png[/img]

- Protect and hide your Identity through hiding your IP address
- Prevent hackers from breaking into your computer
- Allows you to enter pages which are forbidden for you
- Changes your IP address (and your location)
- Delete information about ALL your internet activity
- Add your own Proxies and use your favorites
- Works For Both IE and Mozilla

Download:

[censored] VPN:

[img]http://simontools-[censored]-vpn.smartcode.com/images/sshots/simontools_cyberghost_vpn_11685.jpeg[/img]

Internet surfing leaves a plethora of tracks-not just the ones on your computer. Every Internet provider knows exactly which websites you visit and when you visited them, while every website identifies your address and what you've looked at on its pages.

Download:

Skajper - November 26, 2009, 6:06 am

Wow dude thank's this helped me stay safe on the internet.Hope it gets stickied....

flAmingw0rm - November 26, 2009, 6:09 am

Best tutorials on proxies i've ever seen. Thank you dude, voted for sticky!

Ethical Vox - November 26, 2009, 6:11 am

Very awesome! +Rep!

hugsyou - November 26, 2009, 6:12 am

I agree. Great TuT ;D

LittleFighter™ - November 26, 2009, 6:40 am

great tut
+ repped...

CyberHR - November 26, 2009, 7:09 am

Very nice tutorial man :) Deserve sticky

iBruteforce - November 26, 2009, 7:13 am

Lol, my thread feels ripped. This wont be stuck because mine is.

Soul Collector - November 26, 2009, 7:46 am

Ahh its not ripped lol. I just wanted to make tut .. lol because ur got tools like mine doesnt mean i steal :)

EDIT: Found this infos on their websites :) Also little re-make and .. here it is :)

Amped- - November 26, 2009, 7:55 am

Nice share bro, Very helpful ;D

And iBF we still love you! ..Somewhat. :D!

Soul Collector - November 26, 2009, 7:58 am

Yea lbf :(HAHA damn .. i wanna my thread to be stuck .. damn gonna write new one :D

JoshuaXiong - November 26, 2009, 1:59 pm

(Nov 26, 2009 08:13 AM)iBruteforce Wrote: [\[CITE\]](#) Lol, my thread feels ripped. This wont be stuck because mine is.

You shouldn't be feeling ripped. The people that he took off and copy this of should be ripped.

a303 - November 26, 2009, 2:31 pm

Nice guide man. I'm looking forward to reading the next one you do. ;)

Soul Collector - November 29, 2009, 1:05 am

Thnx for comments :)

new user - November 29, 2009, 1:16 am

Great tut thanks, and no keys needed ?
awesome ! :D i'm gonna test platin

Soul Collector - December 3, 2009, 2:33 am

Thnx glad you like it !

H3x0rB - December 3, 2009, 12:07 pm

Nice collection you made there good job.I think I saw few more better proxyes but not sure.
One sec,I'll search for them

Soul Collector - December 3, 2009, 12:18 pm

KK. BTW checkout ibf's too its better then mine .. but still lol i like my :D

produck - December 4, 2009, 8:16 am

proxyway doesnt work. I updated the lists but it will not connect to any of the proxies.. hit the on off button and still no dice. how do you make this work?

The ProxySwitcher download link crashes firefox.

Real Hide IP is only a 3 day trial and then you have to pay. It also doesnt hide my IP very well at all. Only a couple sites were fooled and it didnt work for craigslist.

Soul Collector - December 4, 2009, 8:26 am

Let me find new link. Please wait.. when i find i will PM you! and post new link here !

iDarky - December 5, 2009, 12:48 pm

Thanks dude helped me alot =]

I_Learning_I - December 5, 2009, 12:52 pm

Very nice, it's nice to see good topics on HF, would +rep, keep it up ;D

rowey-2k9 - December 7, 2009, 9:09 am

u got a serial for realhideip?

Soul Collector - December 8, 2009, 9:16 am

Glad you like them :)

@rowey-2k9: Will find for you and PM you when I find.

acrisius - December 8, 2009, 9:54 am

Cool man. thanks forthat

eXeSoul™ - December 10, 2009, 3:38 am

BEST tut for proxmox vpns.!!

before - December 10, 2009, 3:43 am

really thanks,that very good!

Soul Collector - December 15, 2009, 4:47 pm

Glad you like it! Thanks for commenting...

Estemarilix - December 17, 2009, 2:11 pm

Thanks man for sharing this.Now I can stay safe on the web.

Soul Collector - December 23, 2009, 1:11 pm

Hehe yea, if you need any serial feel free to PM. ?

slaphappyprince - December 23, 2009, 8:41 pm

Awesome thread man, keep up the good work ?

Would +rep if I could ?

Soul Collector - December 30, 2009, 4:08 pm

Thanks for reputation, and I'm glad I can help ?

Ble\$SeD - January 2, 2010, 3:59 am

nice tut learned alot, answered alot of my questions about proxys

The Name's Bing - January 2, 2010, 1:52 pm

Excellent guide!

This should be Stickied

Thanks Soul

Unholy Faith - January 3, 2010, 9:53 am

Thanks bro, helping me out XD

Not@Hacker - January 3, 2010, 8:37 pm

Awsome Soul collector!!

You Are the HF Tutorial Maker...

Khaix - January 4, 2010, 11:27 am

Does this work for SA-MP becuse i need one fast i got banned from a server and need to change my ip.

ipafr34k - January 6, 2010, 3:38 pm

nice progams.... most usefull...

Soul Collector - January 9, 2010, 2:51 am

Thanks and I'm glad I can help :simel:

metzntrix89 - January 16, 2010, 4:06 am

yo yo yo...tat was kool man...proxy switcher is d best still..cheerz...

mKn1ght - January 16, 2010, 9:30 am

Awsome tutorial, thanks mate :)

Rs6 - January 16, 2010, 11:40 am

Very nice tutorial man. Thanks ?

i fox you - February 2, 2010, 2:56 am

your ip address is 67.223.234.121 , right? just wondering ^^

Soul Collector - February 2, 2010, 6:36 am

(Feb 2, 2010 03:56 AM)i fox you Wrote: [\[CITE\]](#) your ip address is 67.223.234.121 , right? just wondering ^^

No.

darkhack - March 26, 2010, 4:59 pm

So When Australia brings in this massive ban on pretty much all websites, would a VPN PROXY such as proxyway help me out?

Telhast - March 27, 2010, 8:26 am

Awesome tutorial ... +rep for you if i could Thanks aLot

JAM - March 27, 2010, 9:20 am

Wow Thank u so much Toshorts

NTR-Pirate - August 3, 2010, 1:08 am

Nice tutor bro, thank you for your useful information.

Tarun123 - August 4, 2010, 2:47 am

simply love dis one especially d design quite readable

-mothered- - August 4, 2010, 3:38 am

Excellent tut mate from beginning to end, with supported Illustrations that's easy to follow.
Thanks for the download reference links also.

TheAxis - August 5, 2010, 10:27 am

Nice thread, which one is your favorite?

Ice_Cool™ - August 6, 2010, 6:08 am

very nice :)),will try it out :))>>

M4D4F4K4 - August 8, 2010, 11:05 am

[censored]-after few minutes of connecting to net it says: Failed to connect to the [censored] VPN network! Try again in a few minutes... wtf?

david769 - August 10, 2010, 10:46 pm

thanks mate :D:D:D:D
to fukin short

Brain Reader - January 27, 2011, 11:08 am

Best tutorials on proxies i've ever seen. Thank you dude

R Millz - October 2, 2011, 7:03 pm

thank you for this great thread it is very helpful

Socks. - October 3, 2011, 2:39 pm

nice share bro vary helpful going to get one right now
