Thread: [\[TUT\] Get serial keys for any software easily.....](#)

Rishidave - November 15, 2011, 10:55 pm

While surfing for license keys and serial keys I have found that no one provides U direct keys. they also gives U whole S/W with keys which U already have..So I have solution for this..

When You require only keys then download the required S/w with keys from torrents..Make sure that it should not be rar or zip file..now download torrent and open it with mtorrent or bittorrent and select only license file from that and start download..then U got only text file or license file...

Enjoy.....

Give your FEEDBACK to this post..It would let me know that how much it helps to U.

Heavy newbie stuff ;)

Another way, is getting a serial for the software, and search for the 4-5 first digits on google. Provides direct serials too (At least it did) ;)

I think 99% of the people who uses torrent for stuff knows this. That other 1% would know it when they load it w/ their torrent programs like utorrent, it will show you the list of files within that torrent file and you can decide if you want to download them or not at that time. There are many ways to get serials like googling the complete software name w/ its ver #, forums, and even some blogs shares serials.
