Most likely because its using UPX, with a few zeus strings, images, etc.... But its clean... Just disable your av ... or add it to exeption .. anyway who uses avast 5?..

Agent Raigar - November 17, 2011, 3:42 pm

I don't trust you... 53 posts , 0 reputation... Waiting for other members to confirm this.

Your right, I would not blame you, hell I would not even trust you... But hey on the good side, looks like its keeping the stubs FUD from kids like you, you people think a crypter would not be up as a treat?, ha, the funny thing is that if it was 0/32 you would trust it, WOOOOT

xDevil - November 17, 2011, 3:45 pm

Infect-!!

Istealer or stealer..

fukyouu..

] anyway, crypter is not infected in any way, would not waste my time here anyway, infecting another "hacker" would be sly and uncool..

I-Dose - November 17, 2011, 3:48 pm

opened it, nothing happened i call infected !

FadesToDark - November 17, 2011, 3:49 pm
