RidingSlow - November 29, 2009, 8:45 am

No, these are not fake tools. They all work and can help you spread your rat or keylogger on

different sites. It really helps with Youtube since if you get 250 views then you start to show up near the top of the search list. And people will download you shit.

SIM-46795 - March 9, 2010, 3:50 pm

In the first package the softwares which have keygen folders only contain a NFO file saying some credit shit and stating to click on the keygen.exe but there is no exe file..

EI2468 - March 20, 2010, 4:36 pm

Can you please reupload them...thanks.

-mothered- - March 20, 2010, 5:00 pm

A very nice collection mate. It'll keep me rather busy for the next couple of hours or so.

Good scan post also. Norton's Sonar protection In both 2010 and 360 versions, has an excellent detection rate (In the same category as Kaspersky's Proactive Defense), hence a good Indicator of the virus-free files.

Much appreciate the share :)
