Reserve the money, mate.

I'll TRY it for FREE for you. It could serve as my training.

If you can contact me via PM, or thru my e-mail, then that would be great, because you disabled your PMs.

Good day.

Hey guys!

I'm interested in learning how to hack my own email account just for pure knowledge, so if you guys no other methods besides those of using a keylogger, then please share the knowledge! It would be greatly appreciated by me and many other members of the forum.

By the way do you use dictionary attacks/brute force attacks?

thanks

If the thread opener is banned, why don't close this here? ;)
