Hey HF. Well this thread is just to show everyone this awesome website where you can either upload or give the link to the image, and it searches all over the web for the image, enabling you to see if the image is copied. Although many people know about this website, I thought it was worthwhile to show the people who don't know. It's a very useful free tool. Enjoy! ?

Note: I've noticed many comments saying Google Images is better than tineye. This is probably true however on Tineye you can upload the pic so you don't have to go through the trouble of uploading to an image hosting site

Link: [TinEye](#)

ebalvrot - November 20, 2011, 5:58 am

Thanks for the share, that's a really useful website :D

Yugen - November 20, 2011, 7:00 am

Hey thank you very much for sharing this kind sir :D.

shmoz - November 20, 2011, 7:02 am

No Problem :) Hope it comes of great use to you

Moralitas - November 20, 2011, 7:12 am

Google offers this. Just paste the image url into Google search, and at the bottom it should say search for image.

Lord Ebil - November 20, 2011, 7:20 am

This has been pretty useful to me over the years.
It's an old tool but very effective :D

You can upload a picture if you don't have a URL :/

Pinkie Pie - November 20, 2011, 7:52 am

I find that sometimes it's worth looking on google image search as well as using tineye because when tineye has come up with 0 results Google has come up with something useful. They use different methods to search so it's worth trying both,

Hydra - November 20, 2011, 7:56 am

Google's is much powerful than Tineye..

Cody8295 - November 20, 2011, 7:57 am

TinEye is old news, people have known about this for years.

Pa??ter of bl??d?fa?th - November 20, 2011, 8:49 am

Well google has much bigger "database" since I has a lot failed searches on tineye but you can use this method to find a bigger resolution picture too so it can be used or various things :)

hackeye - November 21, 2011, 3:42 am

I use google for the same purpose...

images.google.com>drag your img into the search box>there you GOogle

xtinguishnz - November 22, 2011, 4:16 pm

dam thats so helpful good way to check images - could have used this ages ago

SavageBoys - November 23, 2011, 4:24 am

And here is how you find out if an image is photoshopped:
