Thread: [\[MyBB\] View Member Reported Posts \[Plugin\]](#)

Xerotic - November 21, 2011, 10:29 am

I have fully developed a new plugin today and am releasing it to the public.

Specifics:

- Creates a new field under 'Reputation' on profiles that links to the page. Link is the number of reports that member has
- You can specify which groups have access to this plugin
- You can easily allow all usergroups access
- Default only admins have access (Usergroup 4)
- Displays post name with link
- Displays reported reason
- Displays moderation status
- Displays date reported

Preview:

Spoiler [\(Click to View\)](#)

Fixed, thanks. Also added a new image. 3 in total now.

MaorS - November 21, 2011, 7:32 pm

Ask Omniscient to enable this here.

Xerotic - November 25, 2011, 12:53 pm

Updated plugin. Now you can allow users to only view their own posts, plus a setting to allow certain usergroups (like admins/super mods) to bypass the above setting.

Update seems good. I hope Omni adds this here (:
