Anonymous High Orbit Ion Cannon v1.1 [Private]

Released recently by a former member of Anonymous.

Created by CrashOverride

[img]http://57.imagebam.com/download/LjNNV49c-GIfAsqfVPjAFA/16066/160652221/1.png[/img]

-This program is totally different from running on the network.

-This program is used by leading members of Anonymous privately and not at the service worldwide.

-This program has undergone several changes with the intention of being the denial of service tool more powerful than any, and they have succeeded..

-To use the advanced options (turbo mode) of this program you must have a powerful computer.

-This program, unlike other brothers have 3 new strike systems.

At first post it did not know whether to be dangerous, I am not responsible for damage caused by this, this is only for educational purposes on this type of program.

If you start this program attacks might end up in jail is a crime in most countries.

You can leave any website offline is very powerful.

Wise Owl - November 22, 2011, 1:37 am

could you make a video on how to use it that will be awesome

Phriendly - November 22, 2011, 1:41 am

You misspelled anonymous. Even with your rep it's kinda sketchy.

i cant decrypt the password

WTF-2011 - November 23, 2011, 7:10 am

Plizz password on Pm

i cant decrypt the password

broseidon - November 23, 2011, 7:16 am

It's so easy. Go to crypto.com as an earlier member stated.

First go to MEGAN-35 Encrypt/Decrypt

Then take that text and go to TRIPO-5 Encrypt/Decrypt

Finally take that last text and go to GILA7 Encrypt/Decrypt

If you did that right, you should have a phrase starting with an a.

WTF-2011 - November 23, 2011, 7:25 am

watt text takk ! and go to TRIPO-5 Encrypt/Decrypt

kr0nis - November 23, 2011, 9:19 am

Thanks for sharing;)

And i will say i am surely a noob in things

like crypt and decrypt.

But this is more then easy to get the password;)

Again big thanks for sharing...;)

You're welcome. (:

Х????? - November 23, 2011, 3:56 pm

Its a safe program, but, it didn't take the site down I went for. I didn't turbo anything, just set it at high velocity, it says the site is offline, it isn't. The site was a freesmfhosting site. Hum...

Edit; getting a few people to use this with me. Lets see how many it takes to take it down?

Edit+; Did it myself with 4 open, all using a separate turbo with it on, 2000 connections each, it finally went down for a few. :P

Ghost Dialer - November 24, 2011, 1:27 am
Can't be certain it came from this program but after running it i noticed the standard setup of a RAT on my pc including the process Wuacult or something similar to that saying it is a windows update under users privilages.. The program was fully setup like the rat and extensive cleaning was needed

dakico1432 - November 24, 2011, 2:03 am
Nice tool.
Crushes sites realy fast,but can u make a version on English pls :D

Anyone who say its a rat actually test it? Ha. I've used it a few times, nothing wrong with me. No unknown processes, nothing that Ghost Dialer said... You should actually check the program yourself before you just go off assumptions..

Oh well, your PC, your problem.

[img]<http://screensnapr.com/e/WzXCVa.png>[/img]

Funny how I don't? Maybe you have a RAT elsewhere and it spread itself to it?

It still didn't work for me, i tried alot of websites...

But it won't get them down.

I chose for Paquete de Impulso Aumentado

Х????? - November 24, 2011, 6:15 pm

Use the first one its the strongest I believe. This is also a DoS. Use more than one more person while trying to hit a site or open the file multiple times or hit it multiple times with one program.

Bene?th - November 24, 2011, 11:39 pm

Why isn't this in English?

Spoiler [\(Click to View\)](#)Not cool, bro...

Great man but password is not working? can you send me another?

BlackGhost - February 11, 2012, 8:28 am

This is not from anonymous.

Anonymous used loic and now using refref

they never used hoic.

so if ur posting it, post it right.

Cannot find any virus, neither unknown process's..

And this really works, i tested the website with my smartphone with 3G..

Thanks :)
