Thread: [\[Tutorial\]Web browser Progress Bar\[Tutorial\]](#)

Twp™ - November 24, 2011, 6:48 pm

Hello everyone!, I wanted to make my 100th post useful. So I found that a couple of people have trouble with this and it's hard to find with a search. So, I made a simple and easy tutorial for people to follow if they need help. Hope this helps!

You need a progress bar.
First You need to declare 2 Variables as Long's
Code Dim Max As Long
Dim Progress As Long

[img]http://choopd.com/?h=ab793cfb51ddb2a369ab767aeb6f9fa8[/img]

Then we want to find the Webbrowser1_ProgressChanged Event.

[img]http://choopd.com/?h=d27b3051341375a60664072b7d4a95d3[/img]

In There we want to Make the variables we declared into numbers.
Code Progress = e.CurrentProgress
Max = e.MaximumProgress

[img]http://choopd.com/?h=cdd03d5448e7bb3f86901dd70d36e777[/img]

Now It gets down to the Programming.
Code Me.ProgressBar1.Maximum = Max
If Progress = -1 Then
Me.ProgressBar1.Value = Max
Else
Me.ProgressBar1.Value = Progress
End If

[img]http://choopd.com/?h=21e42c1927d030991d7715e1980cc768[/img]

Tada! You just created your progress bar for your web browser. Tweak/use this code to your liking. Have fun!
