Thread: [How to do an Instant Bank Transfer on Paypal?](#)

Drew Brees - November 25, 2011, 7:06 pm

I was wondering how to instantly transfer funds from my Paypal account to a bank account instantly or overnight without having to wait days for it to happen. Anyone have any ideas?

,

There is an option, with a small fee, go to where it says transfer funds from bank account, and there is an option down there, I think..

Drew Brees - November 25, 2011, 7:28 pm

It doesnt say that, I just checked. Where did you think it said that?

jrub - November 25, 2011, 7:44 pm

Where it says add funds, hover your mouse over that, then select add funds from bank account, then "Need to send money today? Try an eCheck or Instant Transfer!" and just click it and boom there u go

mattchopper - November 25, 2011, 8:47 pm

This has never worked for me, it still takes 3-5 days :(

That doesn't sent it to a bank, that sends it to another Paypal account.

Predator_Crack - November 25, 2011, 9:17 pm

You need to use the withdraw option of your paypal and use a bank account.Finally that doesn't belong to beginner hacking section.Read and search before posting.

PAYPAL, does NOT send money to your account "instantly". Trust me I know this, I do a lot of business online and take paypal payments, majority of the time its 3-4 days.
