Thread: [\[TuT\] iStealer 4.0 + Scantime FUD **n00b friendly](#)

Anubis - December 1, 2009, 6:31 am

OoOkay i decided to make this tutorial..althought there are lots of iStealer tuts here on forum...I will show you how you can Crypt to be Scantime FUD also...

iStealer steals passwords from victims computer and then uploads them to an FTP account, very fast and easy to set up and spread

Recovery Options

MSN Messenger (7.xx 8.xx 9.xx)

*Google Talk

*Trillian

*Pidgin/Gaim

*Steam

*No-IP/DynDNS

*Firefox(2.xx 3.xx)

*Internet Explorer (7.xx 8.xx)

*FileZilla

General Options

*Anti VirtualPC/VMWARE Emulator

*Anti Wire-Shark Sniffer

*Anti Ollydbg Debugger

*Anti Procmon Monitor

Melt Self removal

BEFORE WE START PAUSE YOUR AV (AntiVirus) PROTECTION FOR A WHILE.. kuz what are you building is a trojan :S

STEP 1. Download iStealer 4.0 from [HERE](#)

Extract all files from the rar to one folder...so you have these...then RUN Loader

[IMG]http://i46.[censored].com/2ps5dlj.jpg[/IMG]

STEP 2. When you run Loader This will come up

[IMG]http://i50.[censored].com/dw74mf.jpg[/IMG]

STEP 3. Next step is to register for FTP -->[HERE](#) --->It is my Refferal link or if you dont to use my reff. go to www.drivehq.com

STEP 4. When you register...then LOGIN and delete (It is not necessary to delete) all folders in Storage...Then create folder called DUMPS just for example..U can call it however you want...

STEP 5. Now lets get back to our iStealer :P Maximize it and type these

In Host box type: <ftp.drivehq.com> instead <ftp.something.com>

Login box: Type your DRIVEHQ Username that you registered with in step 3

Password box: Password of your DRIVEHQ Account that you registered in step 3

In Directory box type the name of the folder you had created recently../DUMPS in my case for example..

It should be something like this:

[IMG][http://i46.\[censored\].com/35hiopj.jpg](http://i46.[censored].com/35hiopj.jpg)[/IMG]

STEP 7. GOTO TestFTP If all details are good it will show..Working Perfectly !

STEP 8. For easier spreading use a binder...(TICK THE BOX ""Bind with another file"") It will join 2 files into one...For example you can use any FAKE PROGRAMS to bind it with for easier spreading ..Binders join 2 files and creates 1 from these 2 files..When that file is opened..Both files will be opened..I will give you some FAKE PROGRAMS U CAN BIND THE SERVER WITH..

LINK: <http://www.multiupload.com/2CFAQEE88K>

or you can make your own one..if you are good at VB..

Change the Icon if you want to..Tick change icon and browse for iStealer folder and Open folder called Icon Pack so choose any of these...P

CLICK BUILD ----> The server will be created (it is a trojan !!! If you need to try the server if it is working good..turn off your antivirus and run it..than go to your DRIVEHQ Account and open DUMPS Folder and se if any file is created..If it is than it is working okay...

NOW What WE WIL BE DOING IS CRYPTING THE SERVER !!

For that you will need a crypter !!!

If you have money you will buy SCANTIME + RUNTIME Crypter ...It means that it cannot be detected by any antivirus while scanning it and it cannot be detected when the crypted file is opened..I RECOMMEND YOU TO BUY one of these from the market section..There are a lots of them..I found these FREE Crypting service RUNTM and SCANT so go here if intersted [CLICK ME](#)

If you dont have money but would like to have FUD Server u will find FREE SCANTIME CRYPTER It means this cannot be detected by any AV while scanning...but when it is opened it will become detected...

SCANTIME CRYPTERS ---> Please RATE and LEAVE Comments on THESE THREADS BELOW
!!! All credits to their CODERS

[\[Public\]\[100%FUD\] Scantime Crypter !!!! C0d3ak --=NEW=--](#)

[\[FUD\] Scantime Crypter -=C0d3ak=- v1.2](#)

[\[100% FUD\]\[Scantime\]nufcrule3 Crypter](#)

[\[Release\] t3c4i3's FUD Crypter\(Scantime\) v1.08 \[Updated 28th September\]](#)

CRYPTING is easy..just download any of these crypters...open..browse for your stealer server and click CRYPT...Than new server will be created..but SCANTIME so your Antivirus wont find nothing in it..To be sure the crypted server is working properly run it on yourself and go to your drivehq account and see for the dumps :P

SPREADING is not so easy if you think so..But i will tell you most useful methods...

1. YouTube (make a video or download someone elses and post a link to download (which will be your server))
2. FORUMS (NOT HACKFORUMS)
3. TEEN CHAT 123 ---> google it
4. OMEGLE ----> google it

SO JUST BE CREATIVE

This will be in your folder if you were sucessfull Open to see DUMPS :PSpoiler [\(Click to View\)](#)
[IMG]http://i50.[censored].com/4sirm9.jpg[/IMG]

WHY THE DUMPS ARE NOT COMING??

There are several things you have to know..

iStealer doesnt steal latest firefox Passwords
Victim has no remembered passwords
You have not spread it successfully

Victim uses OPERA, NETSCAPE or other browser...

AND AT THE END ""SORRY FOR MY ENGLISH""

LittleFighter™ - December 1, 2009, 6:34 am

great tut bro
thnx for it
now i will not make a new tut for it :P

Nice tutorial, looks like it took a while.

VeXer - December 1, 2009, 5:08 pm

Great Tutorial ! Very Usefull! Thanks!

jaypee89 - December 1, 2009, 5:16 pm

Great tutorial man, nice colors and all make it easier to read. I have a question though. So I bind the server to a picture and change the icon of my server to the jpeg icon, and I hide the .exe extension. When I try to send it via msn messenger however, the application icon shows up and the .exe extension becomes visible. Is there any way to keep the jpeg icon and hidden .exe extension so the victim actually thinks its a picture I'm sending? This has been annoying me for about a week now ?

-C0d3ak- - December 1, 2009, 6:09 pm
yeaah mines the best crypter lol

shneikid - December 1, 2009, 6:53 pm
Error creating process.

Any idea my AV&FIREWALL is turned off

Noup...msn detects it as .exe ...so u need better strategy...bind the server with kaspersky reseter for ex...than upload it to MULTIUPLOAD and make a video :P (Dec 1, 2009 07:53 PM)shneikid Wrote: [\[CITE\]](#) Error creating process.

Just put the your .exe into a rar file with winrar then send it through msn.

r4bb!t - December 5, 2009, 12:36 pm

nice tut thanX xD :P

Snipeshow - December 5, 2009, 1:11 pm

Wont connect to ftp for some reason. Login info is right and so is the folder.

r4bb!t - December 5, 2009, 2:17 pm

put [ftp.drivehq.com](ftp://drivehq.com) instead [ftp.something.com](ftp://something.com)

Snipeshow - December 5, 2009, 3:08 pm

Tried it. Doesnt connect. I know its right because it works on my other stealer and logger.

Jinx - December 5, 2009, 11:44 pm

Yeah I tried it aswell and it doesn't work for 3.0 nor 4.0 >.>

any help appreciated

I think that you should put <ftp.drivehq.com> instead <ftp.something.com>..If you did that..I dunno whats the problem..oo yea..Try to first make a folder called dumps in your online storage on ftp..

ink - December 20, 2009, 9:06 am

Lol the iStealer 4.0 download is infected.

<http://www.virustotal.com/analysis/791cedc6bc5106620ab4432d24b4811679c47fe491b527d8d3893d26cfea288f-1261328687>

terryfink - December 20, 2009, 9:15 am

yeah i followed everything, didnt work first time,i restarted my pc tried again and it works perfect..

(Jan 6, 2010 07:47 AM)simpsons Wrote: [\[CITE\]](#) Yes...My english is bad! ?

Did u mean how to spread it and get passwords?? ?

sammi67 - January 6, 2010, 6:53 am

nice tutorial, and i got into keyloggers and stuff a long time ago and sent it to like 20 people and once i got all their passwords and stuff i was like WTH DO I DO WITH THEM NOW =/ so i stopped doing it. then i told a couple of my mates about it and we tried making a keylogger and after everything we tried , we 3 couldnt do the thing i alone did even when i was young..shocking i know rite..im thinking about giving this a shot so i can somehow re assure myself that school isnt making me dumber by age :D

Anubis - January 6, 2010, 7:07 am

Keylogger and Stealer is completley different thing...P ?

sammi67 - January 6, 2010, 7:32 am

(Jan 6, 2010 08:07 AM)Anubis1423 Wrote: [\[CITE\]](#) Keylogger and Stealer is completley different thing...P ?

oh i thought this was a keylogger and i still have the same problem even though i got a new laptop . it always gives me a 'cannot connect to ftp' no matter what keylogger , stealer or ftp storage i use ?

Anubis - January 6, 2010, 7:41 am

(Jan 6, 2010 08:32 AM)sammi67 Wrote: [\[CITE\]](#) oh i thought this was a keylogger and i still have the same problem even though i got a new laptop . it always gives me a 'cannot connect to ftp' no matter what keylogger , stealer or ftp storage i use ?

I said build a server..even if it gives u that error..and try server on yourself...Not keylogger ..just stealer...because it melts down..?

ICE CUBE - January 6, 2010, 4:19 pm

so, i built it and i opened it myself and all i got on drivehq was my MSN password and thats it ..?

simpsons - January 7, 2010, 2:46 am

(Jan 6, 2010 07:50 AM)Anubis1423 Wrote: [\[CITE\]](#) Did u mean how to spread it and get passwords??
?Of course I tried, but the problem is that when someone has to send an on experiments and download anti-virus it signals a virus, can not discover the problem?

Anubis - January 7, 2010, 3:29 am

(Jan 6, 2010 05:19 PM)ICE CUBE Wrote: [\[CITE\]](#) so, i built it and i opened it myself and all i got on drivehq was my MSN password and thats it ..?

Because youz have only MSN password remembered in your pc and you use latest firefox.

Of course I tried, but the problem is that when someone has to send an on experiments and download anti-virus it signals a virus, can not discover the problem?[/QUOTE]

Crypt it ...xD Aww goshhh

simpsons - January 7, 2010, 5:17 am

[?rch3r] - January 9, 2010, 5:52 pm

Very Helpful always good to keep files FUD

TheAnonymousJoker - January 9, 2010, 6:55 pm

Thanks!!

<message too short>

EDIT

Cant connect to ftp

Anubis - January 10, 2010, 3:43 am

(Jan 9, 2010 06:52 PM)Arch3r Wrote: [\[CITE\]](#) Very Helpful always good to keep files FUDThanks
...Yeahhh ?

(Jan 9, 2010 07:55 PM)TheAnonymousJoker Wrote: [\[CITE\]](#) Thanks!!

<message too short>

EDIT

Cant connect to ftp

I said theres an error sometimes...if it says cannot connect to FTP try building a server and
openeing it on yourself and see if any logs came in your FTP!

Dumbo - January 13, 2010, 3:29 am

Thanks Sir , will try it and reply again

N!tzi.00x0 - January 17, 2010, 8:36 am

It's still FUD or don't anymore?

sql - January 17, 2010, 9:11 am

one of the most complete TUT..

Vaksar - January 17, 2010, 10:14 am

Always double check files.You can't be sure if this is infected or not.Thank you for sharing
NOTE : Do NOT use Virus Total . com !

MLT` - January 31, 2010, 12:37 pm

Before I run any of these files, I usually temporarily disable my internet. After trying to execute the

file, it gives me a message saying "Program cannot access the internet" and will not start up.

Why would it need to connect to the internet, besides keylogging my information?

crack_that - February 1, 2010, 3:22 am

great bro very nice tutorial thank you

Anubis - February 1, 2010, 3:57 am

(Jan 17, 2010 09:36 AM)N!tzi.00x0 Wrote: [\[CITE\]](#) It's still FUD or don't anymore?

Not FUD...S Download FUD Scantime crypter from forum and it will be again...D

Grey Goose - February 1, 2010, 7:32 am

Thx. Mate i love you.

luvguy1234 - February 1, 2010, 6:01 pm

hey i tried doing it...

everything worked great... i even created a file n bind it with a image file

after that tried testing it on myself

i generally use google chrome

n used ie too even running it

even the html file is created on my drivehq folder with the name of my pc

but inside its all blank why is it so...

it just shows these headings but nuthing written under it

am i doing some mistake

Program Protocol / Url Username Password

Delusional - February 1, 2010, 9:09 pm

useful thanks so much :)

jmr423 - February 5, 2010, 4:20 am

is this thing backdoored or not the link has a bunch of random files in it.

- **KG** - February 5, 2010, 5:33 am

Ok now going to follow this tut looks great :)

Mr.Unknown - February 5, 2010, 6:20 am

(Jan 31, 2010 01:37 PM)MLT` Wrote: [\[CITE\]](#) Before I run any of these files, I usually temporarily disable my internet. After trying to execute the file, it gives me a message saying "Program cannot access the internet" and will not start up.

Why would it need to connect to the internet, besides keylogging my information?

because it stores your keys at an online storage (the ftp part) and if it cant connect to the online storage it wont be able to save the keylogs

btw nice tut keep up the good work ;)

Sam Fisher - February 5, 2010, 6:40 am

Easy to follow, awesome tutorial.

Vector Dynamics - February 5, 2010, 7:54 am

Nice TUT, even I understand it :P

dafatman - February 9, 2010, 5:32 pm

avast! won't even let me download the stealer. :(False positive?

eNigMa7 - February 9, 2010, 6:21 pm

it only sends me the file that shows the username and password im using to login to filezilla with but like i logged into steam and msn messenger while running it so hopefully it would send me those passwords but it didn't.. Any ideas?

punish3r - February 10, 2010, 7:14 am

Thanks Good Tutorial

lekosta123 - February 10, 2010, 8:25 am

thanks for this post

Eagleized - February 12, 2010, 10:32 am

very nice

.....

ThaTorrentBoy - May 15, 2010, 3:25 pm

Awesome guide, thank you a lot!

kapitanluffy - May 16, 2010, 6:57 am

thanks..now all i need is a crypter..

Blue Orange - May 16, 2010, 8:33 am

The link for the Istealer in dead.

187z - May 16, 2010, 10:00 am

Istealer ftw, it got me like 5000 serials wooot.

Anubis - May 16, 2010, 11:01 am

(May 16, 2010 10:00 AM)187z Wrote: [\[CITE\]](#) Istealer ftw, it got me like 5000 serials wooot.
It doesnt steal serials =S

Use my signature

NakedBoss - May 17, 2010, 12:49 pm

Error when opening Loader.exe : Fixed, if anyone have the same trouble, get in here :

<http://www.computing.net/answers/windows-vista/component-comdlg32ocx-or-one/763.html>

Still have problems, when I test FTP it doesn't work, I built several anyway, I tested it foy my MSN password, nothings coming... What did i do wrong ?

EDIT² : Fixed again, binded in a program you gave, thanks, it's a f*cking great Tut !

Anubis - May 18, 2010, 5:48 am

(May 17, 2010 12:49 PM)NakedBoss Wrote: [\[CITE\]](#) EDIT² : Fixed again, binded in a program you gave, thanks, it's a f*cking great Tut !
YOure welcome

NakedBoss - May 18, 2010, 8:23 am

Now when I test FTP it says it works great (yes it does)

It might have a kind of activation time

trX - May 18, 2010, 8:39 am

Great tutorial, going to try this soon.

coded32 - May 18, 2010, 9:17 am

Superb TUT.....Wish you all the G00D LuCk's !

shikarii123 - May 18, 2010, 9:25 am

Simply Awesome :)

Great totutorial

MATTTT - May 20, 2010, 11:08 pm

"This file has been removed from the server, because the file has not been accessed in a long time."

:)

Brosa - May 20, 2010, 11:13 pm

This deserves an award good job man helpful to allot of people.

'qalle - May 22, 2010, 11:51 am
