Thread: [\[Hard\] \[Req\] Panel Scrolling System \[Hard\] \[Req\]](#)

TheVBNetwork - November 26, 2011, 3:11 pm

I need to be able to scroll down a list of buttons via a panel or picturebox or any other way you can think of... this is a picture example...
[img]http://vbnetwork.x10.mx/Prev.png[/img]
How Would i do this?

Coleak - November 26, 2011, 4:30 pm

Im pretty sure that is not possible to do with the default theme you are using.

idb. - November 26, 2011, 4:54 pm

Set the panels Auto-Scroll property to true.

TheVBNetwork - November 26, 2011, 5:15 pm

Yeah that worked... thanks....

I have another problem but i wont bother you any more

I am guessing that it is:
How to skin the scrollbar?

No... Just that when i set the form minimum size and the theme min size, i can still resize past the co-ordinates... i think its the theme overwriting the values but im not too sure, any ideas on how to fix?

Yea here:

```
Code Private Sub Form1_Resize(ByVal sender As Object, ByVal e As System.EventArgs) Handles Me.Resize
```

```
    Dim MinimumSize As Size = New Size(250, 150)
```

```
    If Width < MinimumSize.Width Then Width = MinimumSize.Width
```

```
    If Height < MinimumSize.Height Then Height = MinimumSize.Height
```

```
End Sub
```

In order to achieve scrolling you need to set the "AutoScroll" Property of the panel to "True".
